Parent Survey, Indicator #8	276

Overview of the State Performance Plan Development

Background

When the State Performance Plan (SPP) was developed in 2005, the State Superintendent of Public Instruction was Elizabeth Burmaster. Her “New Wisconsin Promise” promised to ensure the opportunity of a quality education for every child in the state. One of the key priorities of the initiative was special education. The New Wisconsin Promise included a commitment to provide effective pupil services, special education, and prevention programs to support learning and development for all students while preventing and reducing barriers to student success. In April 2008, Dr. Tony Evers was elected as Wisconsin’s State Superintendent of Public Instruction. Dr. Evers’ vision for Wisconsin is that every child must graduate ready for further education and the workforce. The state must align efforts so the students of Wisconsin benefit from both college and career preparation, learning the skills and knowledge necessary to be contributing members of our communities. To build on our long-standing commitment to public education, Wisconsin must recruit and retain quality educators, invest in innovation, ensure safe and respectful schools, advance accountability, and work toward fair and sustainable school funding, especially targeting schools with the neediest children.

The Wisconsin Department of Public Instruction (WDPI) has developed a Continuous Improvement and Focused Monitoring System (CIFMS) to achieve positive results for children with disabilities in Wisconsin while ensuring continued procedural compliance with state and federal laws and regulations. A key principle of an effective continuous improvement and focused monitoring system is input and feedback from a diverse group of stakeholders. To that end, the WDPI Special Education Team began working with Dr. W. Alan Coulter, then Director of the National Center for Special Education Accountability Monitoring (NCSEAM) and his staff on the development of CIFMS and the stakeholder process. In 2003, the State Superintendent approved the creation of an ad hoc group of stakeholders to advise the WDPI on its Continuous Improvement and Focused Monitoring System and later (beginning in 2005) the development and review of the State Performance Plan (SPP). The SPP Stakeholders (hereafter stakeholders) included parents of children with disabilities, parent advocates, special education administrators, regular education administrators, special education teachers, and school board representatives. After reviewing trend data and improvement activities, WDPI determined, with broad stakeholder input, the annual measurable and rigorous targets for the SPP indicators from 2005-06 through 2010-11. At least annually, WDPI met with the stakeholders, as well as the State Superintendent’s Council on Special Education (the state advisory panel), to review and revise the SPP and to give updates on the State’s progress. In addition to working with stakeholders to develop the State Performance Plan, the WDPI Special Education Team works collaboratively with the Wisconsin Department of Health Services (WDHS), the WDPI Office of Educational Accountability, WDPI Content and Learning and Title I Teams, and the WDPI Applications Development Team for information technology support.

In September 2010, WDPI made the decision to use the State Superintendent’s Advisory Council on Special Education (hereafter the Council) for obtaining broad stakeholder input related to the new indicators and revisions to the SPP. This was in response to the Council’s expressed desire for greater involvement in the development and review of the SPP and OSEP’s desire for input from the Council during OSEP’s verification visit to determine how WDPI uses its general supervision, State-reported data collection, and fiscal management systems to assess and improve State performance and to protect child and family rights. The Council represents a diverse stakeholder group including parents of children with disabilities, regular education, special education, school boards, charter schools, private schools, institutions of higher education, the Wisconsin Department of Corrections, the Wisconsin Department of Children and Families, and the Wisconsin Department of Health Services.

Part B State Performance Plan (SPP) for 2005-2012

Wisconsin
State

Also in 2010, OSEP directed States to extend their State Performance Plans for two additional years. This included setting targets for FFY 2011 and FFY 2012 and identifying improvement activities for each indicator. WDPI met with the Council in November 2010 to provide an overview of each indicator and highlight the improvement activities in the SPP aimed at improving outcomes. In January 2011, WDPI met with Council to set the new targets. Ann Bailey of North Central Regional Resource Center facilitated the meeting.

Wisconsin's Education System

Wisconsin has 424 public school districts, 18 public charter school districts, and two state agencies, the Wisconsin Department of Corrections (DOC) and the Wisconsin Department of Health Services (DHS), that report special education data to the WDPI. Only one school district in the state, the Milwaukee Public Schools, had an average daily membership (ADM) of over 50,000 students. This district is included in any sampling methodologies described under the 20 indicators in the SPP.

Wisconsin's 12 Cooperative Educational Service Agencies (CESAs) were created in 1964 to provide regional services to school districts that are within their geographical boundaries. Each CESA has a Regional Service Network (RSN) director funded with IDEA discretionary dollars. The RSN provides special education information and training to school districts within its boundaries.

Local control is a term often used to describe public school governance in the state. Wisconsin citizens participate in large numbers in local and state school decisions, even determining through a statewide nonpartisan election who shall serve the people as the State Superintendent of Public Instruction. Wisconsin is one of only 14 states that have an elected state superintendent.

Plan Contents

The SPP represents WDPI's eight-year plan for improving outcomes of children with disabilities in Wisconsin. Through an Annual Performance Report (APR), WDPI measures and reports on the performance of children with disabilities using the 20 indicators. The SPP is divided into 20 sections--the 20 indicators--which focus on outcomes for students with disabilities. Included with each indicator is baseline data, a description of the data collection system, rigorous and measurable targets, and strategies for improving outcomes.

20 Indicators:

1. Percent of youth with IEPs graduating from high school with a regular diploma.
2. Percent of youth with IEPs dropping out of high school.
3. Participation and performance of children with disabilities on statewide assessments:
 - A. Percent of the districts with a disability subgroup that meets the State's minimum "n" size that meet the State's AYP targets for the disability subgroup.
 - B. Participation rate for children with IEPs.
 - C. Proficiency rate for children with IEPs against grade level, modified and alternate academic achievement standards:

Part B State Performance Plan (SPP) for 2005-2012

Wisconsin

State

4. Rates of suspension and expulsion:
 - A. Percent of districts that have a significant discrepancy in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and
 - B. Percent of districts that have: (a) a significant discrepancy, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards
5. Percent of children with IEPs aged 6 through 21 served:
 - A. Inside the regular class 80% or more of the day;
 - B. Inside the regular class less than 40% of the day; and
 - C. In separate schools, residential facilities, or homebound/hospital placements.
6. Percent of preschool children with IEPs attending a:
 - A. Regular early childhood program and receiving the majority of special education and related services in the regular early childhood program; and
 - B. Separate special education class, separate school or residential facility.
7. Percent of preschool children aged 3 through 5 with IEPs who demonstrate improved:
 - A. Positive social-emotional skills (including social relationships);
 - B. Acquisition and use of knowledge and skills (including early language/ communication and early literacy); and
 - C. Use of appropriate behaviors to meet their needs.
8. Percent of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities.
9. Percent of districts with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification.
10. Percent of districts with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification.
11. Percent of children who were evaluated within 60 days of receiving parental consent for initial evaluation or, if the State establishes a timeframe within which the evaluation must be conducted, within that timeframe.
12. Percent of children referred by Part C prior to age 3, who are found eligible for Part B, and who have an IEP developed and implemented by their 3rd birthdays (early childhood transition).

Part B State Performance Plan (SPP) for 2005-2012

Wisconsin
State

13. Percent of youth aged 16 and above with an IEP that includes appropriate measureable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs. There must also be evidence that the student was invited to the IEP Team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority.
14. Percent of youth who are no longer in secondary school, had IEPs in effect at the time they left school, and were:
 - A. Enrolled in higher education within one year of leaving high school;
 - B. Enrolled in higher education or competitively employed within one year of leaving high school;
 - C. Enrolled in higher education or in some other postsecondary education or training program; or competitively employed or in some other employment within one year of leaving high school.
15. General supervision system (including monitoring, complaints, hearings, etc.) identifies and corrects noncompliance as soon as possible but in no case later than one year from identification.
16. Percent of signed written complaints with reports issued that were resolved within 60-day timeline or a timeline extended for exceptional circumstances with respect to a particular complaint, or because the parent (or individual or organization) and the public agency agree to extend the time to engage in mediation or other alternative means of dispute resolution, if available in the State.
17. Percent of adjudicated due process hearing requests that were adjudicated within the 45-day timeline or a timeline that is properly extended by the hearing officer at the request of either party or in the case of an expedited hearing, within the required timelines.
18. Percent of hearing requests that went to resolution sessions that were resolved through resolution session settlement agreements.
19. Percent of mediations held that resulted in mediation agreements.
20. State reported data (618 and State Performance Plan and Annual Performance Report) are timely and accurate.

Dissemination and Implementation of the State Performance Plan

WDPI is required to submit an Annual Performance Report (APR) to the Office of Special Education Programs on February 1 each year. WDPI reports to the public on the State's progress and slippage in meeting the measurable and rigorous targets found in the SPP by annually posting the APR on the department's website (<http://sped.dpi.wi.gov/>) in February. Presentations are given by WDPI at the Wisconsin Council of Administrators of Special Services (WCASS) and the State Superintendent's Conference on Special Education and Pupil Services Leadership Issues. The WDPI has a summary chart of SPP targets posted on the WDPI website for ease of review. All special education administrators and district administrators receive an annual email about the SPP and APR which includes links to the WDPI website. Weekly emails provide more detailed information about the various indicators. The State Superintendent's Council on Special Education is involved in the annual development and review of the SPP. The annual statewide special education leadership conference and the monthly meetings of the RSN are dedicated to

improvement activities related to the indicators. WDPI focuses its work on activities related to the 20 indicators in the SPP to improve outcomes for children with disabilities.

Public Reporting of Performance

LEAs are required to submit an annual Local Performance Plan (LPP) to the WDPI for review. The LPP is an internet application and serves as the IDEA flow-through and preschool funding mechanism that must be completed in substantially approvable form before a district may encumber and expend federal monies. Through the LPP, districts submit their IDEA flow-through and preschool budgets and provide assurance to WDPI of compliance with state and federal special education requirements. One component of the LPP is the Special Education District Profile, through which WDPI reports annually to the public on the performance of each LEA on the targets associated with Indicators 1-14. The Special Education District Profile is used to analyze LEA performance on each of the indicators in Wisconsin's State Performance Plan (<https://www2.dpi.state.wi.us/DistrictProfile/Pages/DistrictProfile.aspx>). The Special Education District Profile includes LEA data, state data, the target for each indicator, sources of data, and links to additional information about each indicator.

WDPI annually posts the performance results for each LEA on the department's website in May. For indicators 7, 8, and 14, WDPI has used the monitoring cycle to identify LEAs for data collection. Beginning in 2011, WDPI will collect Indicator 7 data from every LEA annually. The State gathers monitoring data from one-fifth of the LEAs in the state through an LEA *Procedural Compliance Self-Assessment* related to monitoring priority areas and SPP indicators. Over the course of the SPP, WDPI will monitor approximately 440 LEAs, including independent charter schools, the Wisconsin Department of Health Services, and the Wisconsin Department of Corrections. In addition, WDPI monitors the Wisconsin Educational Services Program for the Deaf and Hard of Hearing and the Wisconsin Center for the Blind and Visually Impaired. Wisconsin's public agencies have been divided into five cohorts of approximately 88 agencies each. One cohort is monitored each year beginning with the 2006-2007 school year. Each cohort is developed to be representative of the state for such variables as disability categories, age, race, and gender. The cycle includes LEAs from rural and urban areas of the state, as well as small, medium, and large school districts. Milwaukee Public Schools, the only LEA with an average daily membership of over 50,000, is included each year. Beginning in FFY 2011, WDPI will restart its five-year monitoring cycle.

WDPI will not report to the public any information on performance that would result in the disclosure of personally identifiable information about individual children or where the available data is insufficient to yield statistically reliable information. WDPI includes the most recently available performance data on each LEA and the date the data were obtained. Furthermore, WDPI will collect and report on the performance of each LEA on each of the sampling indicators at least once during the course of the SPP. For all other indicators for which WDPI is required to report at the LEA level, WDPI will report annually on every LEA.

Monitoring Priority: FAPE in the LRE

Indicator 1: Percent of youth with IEPs graduating from high school with a regular diploma.

(20 U.S.C. 1416 (a)(3)(A))

Measurement:

States must report using the graduation rate calculation and timeline established by the Department under the ESEA.

Overview of Issue/Description of System or Process:**Regular Diploma**

The requirements for obtaining a regular diploma in Wisconsin are the same for students with disabilities and students without disabilities. A graduate is defined as a student who has met the requirements established by a school board for a prescribed course of study.

Wisconsin statute 118.33(1)(a) defines the requirements for receipt of a high school diploma as: except as provided in 118.33(1)(d) (see below), a school board may not grant a high school diploma to any pupil unless the pupil has earned:

1. In the high school grades, at least 4 credits of English including writing composition, 3 credits of social studies including state and local government, 2 credits of mathematics, 2 credits of science and 1.5 credits of physical education.
2. In grades 7 to 12, at least 0.5 credit of health education.

The state superintendent encourages school boards to require an additional 8.5 credits selected from any combination of vocational education, foreign languages, fine arts and other courses.

A school board may identify alternative means to satisfy academic performance criteria under its high school graduation policy. Whatever approaches a school board chooses, it should be clearly stated within the local school board graduation policy and followed by individualized education program (IEP) teams or other staff involved in decisions about a student's academic performance. Under Wisconsin statute 118.33(1)(d), a school board may grant a high school diploma to a pupil who has not satisfied the requirements under 118.33(1)(a) if all of the following apply:

1. The pupil was enrolled in an alternative education program, as defined in s. 115.28(7)(e)1.
2. The school board determines that the pupil has demonstrated a level of proficiency in the subjects listed in par. (a) equivalent to that which he or she would have attained if he or she had satisfied the requirements under par. (a).

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

Baseline Data:

2004-05 SY	Regular Diploma	Certificate	HSED	Maximum Age	Cohort Dropouts	Regular Diploma Graduation Rate
Students with Disabilities	5,692	68	105	67	1,131	80.6%
Students without Disabilities	57,537	242	516	93	5,721	89.7%
All Students	63,229	310	621	160	6,852	88.8%

Data Source: From Wisconsin's Individual Student Enrollment System (ISES) as displayed on Wisconsin's Information Network for Successful Schools (WINSS) Website.

Discussion of Baseline Data:

Graduation data for all students in Wisconsin is collected through the Individual Student Enrollment System (ISES), which provides student level data. The graduation rate for both students with disabilities and students without disabilities is calculated as the number of students who graduated with a regular diploma divided by the number of students who graduated with a regular diploma plus the students who received a certificate, a high school equivalency diploma (HSED), or reached maximum age, plus the cohort dropouts. The cohort dropouts are the number of dropouts for a graduating class over four years (i.e., 12th grade dropouts for the graduating year + 11th grade dropouts for the prior year + 10th grade dropouts for 2 years prior + 9th grade dropouts for 3 years prior).

For the 2004-05 SY, there is a gap of 8.2% between the graduation rate of students with disabilities as compared to the graduation rate for all students. The state's goal is for students with disabilities to graduate at a rate comparable to students without disabilities. Because the graduation rate for all students includes both students with and without disabilities, it is necessary to examine the graduation rate for students without disabilities to have a clear understanding of the graduation gap. For the 2004-05 SY, the graduation rate for students without disabilities was 89.7%. The gap between the graduation rate for students with disabilities relative to students without disabilities is 9.1%.

Measurable and Rigorous Targets

The targets for this indicator are the same as the annual graduation rate targets under Title I of the Elementary and Secondary Education Act (ESEA).

FFY	Measurable and Rigorous Targets
2007 (2007-2008)	80% of students with disabilities will graduate with a regular diploma
2008 (2008-2009)	80% of students with disabilities will graduate with a regular diploma

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

2009 (2009-2010)	85% of students with disabilities will graduate with a regular diploma
2010 (2010-2011)	87% of students with disabilities will graduate with a regular diploma
2011 (2011-2012)	85% of students with disabilities will graduate with a regular diploma
2012 (2012-2013)	85% of students with disabilities will graduate with a regular diploma

1 B	Focused Monitoring (FM) Wisconsin has developed a Continuous Improvement and Focused Monitoring System (CIFMS) to achieve positive results for children with disabilities in Wisconsin while ensuring continued procedural compliance with state and federal laws and regulations. WDPI involves stakeholders in the ongoing development of CIFMS including the identification of priority areas for focused monitoring in Wisconsin. The CIFMS stakeholders analyzed statewide student outcome data to determine that improving graduation rates of students with disabilities should be a priority in Wisconsin. The CIFMS stakeholders identified student enrollment groups within the state from which a select number of school districts are identified for FM. WDPI uses trend data over a three-year period to identify districts for FM. The districts within each enrollment group most in need of improvement are selected for FM.	X	X	X	X	X	X			Graduation Workgroup LPP Consultant
1 B D	Focused Performance Reviews WDPI in collaboration with CESAs #7 and #5 originally developed the Special Education Data Retreat Model to provide a unique, structured forum where collaborative teams of special educators, administrators, along with regular educators evaluated their systems for design and delivery of special education and related services. Focused data analysis enables educators to identify potential root causes of the low graduation rate, leading toward the development of school/district plans to address identified needs and improve student outcomes. Some of the data analyzed includes graduation, dropout, suspension, expulsion, participation and performance on statewide assessments, and educational environments. Data is disaggregated by disability area, gender, and race/ethnicity whenever it is available. Statewide training was provided to give all Wisconsin school districts the opportunity to	X	X	X	X	X	X	X	X	Data Consultant Graduation Workgroup Reading Achievement Workgroup

	analyze their own data by a collaborative staff team, to identify areas of need based on the data analysis, and to work towards a plan to address those needs building/district wide. To accomplish this statewide training, a "Train the Trainers" model was used. A two-day facilitated training was conducted for all Regional Service Network (RSN) directors and school improvement service (SIS) directors in the state. A model set of data was used for training purposes. After the RSN and SIS directors were trained, each CESA conducted trainings for its own school districts. Two follow-up meetings were conducted to provide support and technical assistance to those responsible for conducting special education data retreats. This data analysis component was further refined and integrated into Wisconsin's FM process as a beginning point for districts selected for FM and renamed the Focused Performance Review (FPR). Data continues to be disaggregated by disability area, and race/ethnicity whenever available.									
1 C G	High School Task Force State Superintendent Elizabeth Burmaster convened a statewide High School Task Force to ensure Wisconsin high school students continue to graduate with the knowledge and skills they need to succeed in postsecondary education, the high-skills workplace, and as citizens of the global economy. Recommendations from the Task Force emphasize the need for rigorous, authentic learning using multiple instructional and assessment strategies; high schools that establish a personal connection for each student; learning plans that help individual students accomplish their goals; and solid business and community partnerships. To continue this work at the local level, WDPI sponsored a High School Summit focusing on high school redesign and showcasing promising practices in Wisconsin. 1 A B C D G	<p>Procedural Compliance Self-assessment</p> <p>Each year, the state gathers monitoring data from one-fifth of the LEAs in the state through an LEA self-assessment of procedural requirements related to monitoring priority areas and SPP indicators. For indicator 11, LEAs conduct a review of all initial evaluations where parental consent was received during the reporting period. Each year, the cohort districts are representative of the state considering such variables as disability categories, age, race, and gender. Milwaukee Public Schools, the only LEA with average daily membership of over 50,000, is included in the sample each year. WDPI will include every LEA in the state at least once during the course of the SPP. The self-assessment of procedural requirements includes data on each of the SPP indicators including the percent of children with parental consent to evaluate, who were evaluated and eligibility determined within 60 days (Indicator #11). LEAs report the self-assessment results to WDPI, along with planned corrective actions. LEAs are required to correct noncompliance as soon as possible, but no later than one year from identification.</p> <p>To assure valid and reliable data, WDPI provides web-based training in how to conduct the self-assessment. The self-assessment checklist includes standards for reviewing the procedural requirements. Information about the self-assessment is posted on the WDPI website at https://dpi.wi.gov/sped/educators/procedural-compliance-self-assessment.</p>								X	Procedural Compliance Workgroup LPP Consultants

	<ul style="list-style-type: none"> To maintain and expand a communication network for purposes of liaison among LEAs, CESAs, the WDPI and others including, but not limited to, parents and related agencies. To provide leadership to a continuing statewide initiative to assure a comprehensive staff development program. To model teamwork and collaboration in decision making and service delivery to generate creative solutions to mutually defined problems. 									
1 B C G	<p>Schools Identified for Improvement (SIFI)/Districts Identified for Improvement (DIFI)</p> <p>Wisconsin's Statewide System of Support (SSOS) is predicated on the concept that the role of the WDPI is to strengthen the capacity of local school districts to identify and effectively differentiate support to their lowest performing schools. To accomplish this, the WDPI has sorted each of its public school districts into one of three categories: high priority districts, priority districts, and all other districts. High priority districts are those which have missed Adequate Yearly Progress (AYP) as a district or been identified as a district in need of improvement (DIFI) and have Title I schools that are identified for improvement (SIFI) or missed AYP under No Child Left Behind (NCLB). In Wisconsin, high priority districts are required to assess the efficacy of their current district efforts to support school improvement using the 7 Characteristics of Successful Districts (Vision, Leadership, High Academic Standards, Standards of the Heart, Family, School and Community Partnerships, Professional Development, and Evidence of Success framework or a comparable model. Using five characteristic areas (1. Vision, Values and Culture; 2. Leadership and Governance; 3. Decision Making and Accountability; 4. Curriculum and Instruction; and 5. Professional Development and Staff Quality a team of district staff members conduct a Self-Assessment to evaluate the level and effectiveness of district support to high priority schools. The results of the self-assessment are validated by a team of exemplary educators through an onsite peer review process. The peer review is meant to validate and add to the findings of the self-</p>	X	X	X	X	X	X	X	X	<p>Title I Team</p> <p>Special Education Team's Graduation Workgroup</p> <p>Special Education Team's Reading Achievement Workgroup</p> <p>WDPI Urban Special Education Consultant</p> <p>FM co-chairs</p> <p>FM Graduation Technical Assistance Provider</p>

	assessment. As a result of these two processes, the WDPI determines which school improvement strategies are working well for the district and where the district is in need of technical assistance to improve the effectiveness of its support system. A plan for technical assistance and monitoring is developed collaboratively between the WDPI and the district. Collaboratively, the Title 1 and Special Education teams of WDPI worked with the Milwaukee Public Schools to create their DIFI improvement plan.									
1 A B C D E F G H	School Improvement: Focused Review of Improvement Indicators (FRII) During the 2007-08 SY, WDPI began working to expand upon the successful focused monitoring model previously utilized to provide districts a mechanism for conducting a similar process of data analysis and improvement planning around the SPP improvement indicators of math achievement, preschool outcomes, parent involvement, and post-high school outcomes. WDPI will also be working with CESA based Regional Service Network (RSN) providers to employ various technical assistance options, including statewide summits. WDPI is currently building the infrastructure to execute and support this process with statewide implementation. WDPI believes this refined school improvement process will not only address the needs of both urban and rural districts, but it will continue to promote data driven decision making as well as identifying promising practices that can be acknowledged and disseminated statewide. 	<p>materials and resource kits for distribution to the field. The specific intent of each of these efforts has been to provide Wisconsin school district staff with the information and skills they need to successfully address the unique learning and behavioral needs of children with a TBI, thus increasing graduation rates, reducing drop-outs, and reducing suspension and expulsion rates for behaviors due to TBI.</p> <p>The TBI project ended June 30, 2008. The WDPI continues to support the regionally based TBI trainers through twice yearly program support teacher meetings. WDPI also has an appointed member on the Governor's Brain Injury Advisory Council.</p>									
1 C D	<p>Wisconsin Assistive Technology Initiative (WATI), (http://www.wati.org/)</p> <p>The primary goal of the initiative is to improve outcomes and results for children and youth with disabilities through the use of assistive technology to access services, school programs and curriculum, and community activities. As a result, activities carried out by the initiative have a positive impact on graduation rates, drop-out rates, and suspension/expulsion rates. WATI is designed specifically to increase the capacity of school districts to provide AT services by making training and technical assistance available to teachers, therapists, administrators, and parents throughout Wisconsin. It accomplishes this by providing not only training and direct technical assistance but also specific strategies to increase the capacity of school districts to provide AT services. These include the development and dissemination of model forms, AT assessment manuals, recommended evaluation procedures, resource guides and other materials, and access to AT for trial use. WATI has both state-level services and regional services. Regional services are provided by 12 assistive technology consultants located in each of the 12 CESA regions in the state. Activities carried out at the state level include providing support and leadership to the regional AT consultants, providing specialized competency-based training, developing and conducting specialized summer institutes, developing resource guides</p>	X	X	X	X					WATI Grant Consultant

1 A B C D E G J	<p>Wisconsin Statewide Transition Initiative (WSTI), (www.wsti.org)</p> <p>WSTI is a state-wide systems change project that offers a comprehensive approach to providing transition services in the State of Wisconsin. WSTI utilizes a two-tiered service delivery model consisting of local school district Transition Action Teams and County Transition Advisory Councils. Point of Entry Manuals are developed for each CESA to identify county agency linkages. Twelve CESA-based transition coordinators, a project director, and a WDPI transition consultant provide transition support services, information dissemination, and staff development to parents, education professionals, and community agency professionals throughout Wisconsin. Currently each of the 12 CESAs receives mini-grants to improve transition services. WSTI participates in a state-wide transition conference each year. Networking meetings in each CESA are used to provide indicator #13 training. WSTI assists participating LEAs in using data from Indicators #1, #2, #13, and #14 to develop local improvement plans.</p> <p>WDPI has worked collaboratively with Dr. Ed O'Leary of the Mountain Plains Regional Resource Center to develop technical assistance on the correct implementation of transition requirements in IDEA. LEA personnel who participate in WSTI receive training in how to review transition requirements in IEPs using a transition checklist. The Office of Special Education Programs (OSEP) has recognized Wisconsin's work in the area of transition as a national model.</p> <p>WDPI collaborates with the National Secondary Transition Technical Assistance Center (NSTTAC) to improve outcomes for indicator #13. NSTTAC has provided training to CESA and LEA personnel on indicator #13</p>	X	X	X	X	X	X	X	X	WSTI Grant Consultant

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: FAPE in the LRE

Indicator 2: Percent of youth with IEPs dropping out of high school.

(20 U.S.C. 1416 (a)(3)(A))

Measurement:

States must report using the dropout data used in the ESEA graduation rate calculation and follow the timeline established by the Department under the ESEA.
--

Overview of Issue/Description of System or Process:

A dropout is defined as a student who was enrolled in school at some time during the previous school year, was not enrolled at the reporting time of the current school year (third Friday in September), has not graduated from high school or completed a state- or district-approved educational program, and does not meet any of the following exclusionary conditions:

- transfer to another school district, private school, or state- or district-approved educational program;
- temporary absence due to expulsion, suspension, or school-excused illness;
- death.

Students who complete the spring semester of the previous school year but are not enrolled by the third Friday in September of the current school year are considered summer dropouts or “no shows.” Summer dropouts are not counted as dropouts for the previous year. A dropout would be counted for the current school year if the student is not re-enrolled by the count date of the following school year.

Baseline Data:

2004-2005 SY Grades 7-12	Dropouts	Expected to Complete School Term	Dropout Rate
Students with Disabilities	1,152	55,012	2.094%
Students without Disabilities	6,174	369,513	1.671%
All Students	7,326	424,525	1.726%

Data Source: From Wisconsin's Individual Student Enrollment System (ISES) as displayed on Wisconsin's Information Network for Successful Schools (WINSS) Website

Discussion of Baseline Data:

Dropout data for all students in Wisconsin is collected through the Individual Student Enrollment System (ISES), which provides student-level data. The dropout rate for both students with disabilities and students without disabilities is calculated as the number of students in grades 7 through 12 who drop out of school during the given year, divided by the number of students expected to complete the school term in those grades. In 2005-06, the dropout rate for students with disabilities is 2.094%, compared to 1.671% for students without disabilities. This is a difference of .423%.

Measurable and Rigorous Targets

In January 2011, WDPI met with the State Superintendent's Advisory Council to review progress on this indicator. WDPI provided the Council a summary of trend data analysis including a test for the normality of sample variance and ranges within which new data are likely to fall based on the analysis of standard deviation. The State now has five years of data on Indicator 2. The Indicator 2 results over these five years have been consistent, with the mean ranging from 2.09% to 2.61%. In 2008, the targets began exceeding the range that could be reasonably expected, given three standard deviations from the trend mean (see graph below).

With Council input, WDPI set new annual targets for FFY 2008 through FFY 2012. The five years of trend data was used to set the realistic, yet rigorous targets below.

FFY	Measurable and Rigorous Targets
2008 (2008-2009)	No more than 2.49% of students with disabilities will drop out

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

FFY	Measurable and Rigorous Targets
2009 (2009-2010)	No more than 2.39% of students with disabilities will drop out
2010 (2010-2011)	No more than 2.29% of students with disabilities will drop out
2011 (2011-2012)	No more than 2.19% of students with disabilities will drop out
2012 (2012-2013)	No more than 2.09% of students with disabilities will drop out

2 C D	Autism Project, https://dpi.wi.gov/sped/program/autism For more than ten years, WDPI has developed and conducted statewide trainings for school staff in the area of autism. Four trainings are held annually in various locations throughout the state. Basic level trainings are offered for school staff with limited knowledge of educational programming for students with autism spectrum disorders. The basic level training presents an overview of autism spectrum disorders and discusses topics such as functional behavioral assessment, classroom programming, sensory issues, and communication strategies. Advanced level trainings are offered for more experienced school staff. The advanced training presents more complex information about issues in early childhood education of students with autism spectrum disorders. School staff from many different disciplines attend the trainings including special education teachers, directors of special education, regular education teachers, paraprofessionals, occupational and physical therapists, social workers, psychologists and speech and language pathologists. Each of these trainings includes strategies for preventing suspensions and expulsions, obtaining a diploma, and increasing the graduation rates of students with autism.	X	X	X	X	X	X	X	X	Autism Grant Consultant
2 C	Behavior Grant, https://dpi.wi.gov/sped/program/emotional-behavioral-disability Wisconsin school districts and CESAs cite student behavior as a high priority for staff development; new teachers report that classroom management is an area in which they feel least prepared. This IDEA statewide grant focuses on providing Wisconsin school district staff with the skills needed to successfully manage student behaviors in the classroom, particularly disruptive and aggressive student behaviors so that students stay in school and graduate. The grant supports the Annual Behavioral Institute as well as other technical assistance and materials.	X	X	X	X					Behavior Grant Consultant

2 B	Focused Monitoring (FM) Wisconsin has developed a Continuous Improvement and Focused Monitoring System (CIFMS) to achieve positive results for children with disabilities in Wisconsin while ensuring continued procedural compliance with state and federal laws and regulations. WDPI involves stakeholders in the ongoing development of CIFMS including the identification of priority areas for focused monitoring in Wisconsin. The CIFMS stakeholders analyzed statewide student outcome data to determine that improving graduation rates of students with disabilities should be a priority in Wisconsin. The CIFMS stakeholders identified student enrollment groups within the state from which a select number of school districts are identified for FM. WDPI uses trend data over a three-year period to identify districts for FM. The districts within each enrollment group most in need of improvement are selected for FM. Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
2 B D	Focused Performance Reviews WDPI in collaboration with CESAs #7 and #5 developed the Special Education Data Retreat Model to provide a unique, structured forum where collaborative teams of special educators, administrators, along with regular educators evaluated their systems for design and delivery of special education and related services. Focused data analysis enables educators to identify potential root causes of the low graduation rate, leading toward the development of school/district plans to address identified needs and improve student outcomes. Some of the data analyzed includes graduation, dropout, suspension, expulsion, participation and performance on statewide assessments, and educational environments. Data is disaggregated by disability area, gender, and race/ethnicity whenever it is available. Statewide training was provided to give all Wisconsin school districts the opportunity to analyze their own data by a collaborative staff team, to identify areas of need based on the data analysis, and to work towards a plan to address those needs building/district wide. To accomplish this statewide training, a "Train the Trainers" model was used. A two-day facilitated training was conducted for all Regional Service Network (RSN) directors and school improvement service (SIS) directors in the state. A model set of data was used for training purposes. After the RSN and SIS directors were trained, each CESA conducted trainings for its own school districts. Two follow-up meetings were conducted to provide support and technical assistance to those responsible for conducting special education data retreats. This data analysis component was further refined and integrated into Wisconsin's FM process as a beginning point for districts selected for FM and renamed the Focused Performance Review (FPR). Data continues to be disaggregated by disability area, and race/ethnicity whenever available.	X	X	X	X	X	X	X	X	Data Consultant Graduation Workgroup Reading Achievement Workgroup
2 C G	High School Task Force State Superintendent Elizabeth Burmaster convened a statewide High School Task Force to ensure Wisconsin high school students continue to graduate with the knowledge and skills they need to succeed in postsecondary education, the high-skills workplace, and as citizens of the global economy.	X	X							Task Force included members of the Special Education Team's Graduation Workgroup

	<p>Each school year, all Wisconsin LEAs, including charter schools, complete and submit an annual LPP to the WDPI for review. The LPP is an internet application and is the IDEA flow-through and preschool funding mechanism that must be completed in approvable form before a district may encumber and expend federal monies. Through the LPP, districts submit their IDEA flow-through and preschool budgets and provide assurance to WDPI of compliance with state and federal special education requirements. Districts are required to analyze their performance on specified indicators in the SPP, and develop and submit improvement activities for those indicators for which a district does not meet the established targets. The LPP is reviewed by a WDPI consultant assigned to work with the individual LEA.</p> <p>One component of the LPP is the Special Education District Profile, through which WDPI reports annually to the public on the performance of each LEA on the targets associated with Indicators #1-#14. The Special Education District Profile is used to analyze LEA performance on each of the indicators in the State Performance Plan (http://dpi.wi.gov/sped/lpp-profile.html). The Special Education District Profile includes LEA data, state data, the target for each indicator, data sources for each indicator, and a link to more information about each indicator.</p>									<p>Data Consultant</p> <p>Grants Specialist</p> <p>LPP Consultants</p>

	<p>within the school environment, c) individual classrooms and teachers, d) small group and simple student interventions for those at-risk, and e) individual student supports for students who have intensive and comprehensive needs across home, school, and community.</p> <p>The Wisconsin Statewide PBIS Implementation Project will provide technical assistance and coordinate professional development to help Wisconsin school districts establish and sustain PBIS within their respective schools. In addition, the project will gather and analyze specific data from all schools utilizing PBIS services.</p>									
2 A B C D G	<p>Procedural Compliance Self-assessment</p> <p>Each year, the state gathers monitoring data from one-fifth of the LEAs in the state through an LEA self-assessment of procedural requirements related to monitoring priority areas and SPP indicators. For indicator 11, LEAs conduct a review of all initial evaluations where parental consent was received during the reporting period. Each year, the cohort districts are representative of the state considering such variables as disability categories, age, race, and gender. Milwaukee Public Schools, the only LEA with average daily membership of over 50,000, is included in the sample each year. WDPI will include every LEA in the state at least once during the course of the SPP. The self-assessment of procedural requirements includes data on each of the SPP indicators including the percent of children with parental consent to evaluate, who were evaluated and eligibility determined within 60 days (Indicator #11). LEAs report the self-assessment results to WDPI, along with planned corrective actions. LEAs are required to correct noncompliance as soon as possible, but no later than one year from identification.</p> <p>To assure valid and reliable data, WDPI provides web-based training in how to conduct the self-assessment. The self-assessment checklist includes standards for reviewing the procedural requirements. Information about the self-assessment is posted on the WDPI website at http://sped.dpi.wi.gov/sped_spp-selfassmt.</p>								X	<p>Procedural Compliance Workgroup</p> <p>LPP Consultants</p>

2 C D	<p>Traumatic Brain Injury (TBI), http://sped.dpi.wi.gov/sped_tbi</p> <p>For the past ten years, the WDPI has directed discretionary dollars toward supporting a statewide project titled "Traumatic Brain Injury: Wisconsin's Response." This project has focused on providing statewide TBI trainings for graduate credit that permit school district staff to maintain recent training and experience in the area of TBI while fulfilling professional development plans under state requirements; establishing and maintaining a network of regionally-based TBI trainers to provide child-specific training, consultation, and technical assistance to district staff locally; establishing linkages with state teacher education institutions; and developing and updating training materials and resource kits for distribution to the field. The specific intent of each of these efforts has been to provide Wisconsin school district staff with the information and skills they need to successfully address the unique learning and behavioral needs of children with a TBI, thus increasing graduation rates, reducing drop-outs, and reducing suspension and expulsion rates for behaviors due to TBI.</p> <p>The TBI project ended June 30, 2008. The WDPI continues to support the regionally based TBI trainers through twice yearly program support teacher meetings. WDPI also has an appointed member on the Governor's Brain Injury Advisory Council.</p>	X	X	X	X					TBI Consultant
2 C D	<p>Wisconsin Assistive Technology Initiative (WATI), (http://www.wati.org/)</p> <p>WATI is a nationally recognized initiative whose mission is to ensure that every child in Wisconsin who needs assistive technology (AT) has equal and timely access to an appropriate evaluation and the provision and implementation of any needed AT devices and services. The primary goal of the initiative is to improve outcomes and results for children and youth with disabilities through the use of assistive technology to access services, school programs and curriculum, and community activities. As a result, activities carried out by the initiative have a positive impact on graduation rates, drop-out rates, and suspension/expulsion rates.</p>	X	X	X	X					WATI Grant Consultant

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	<p>WATI is designed specifically to increase the capacity of school districts to provide AT services by making training and technical assistance available to teachers, therapists, administrators, and parents throughout Wisconsin. It accomplishes this by providing not only training and direct technical assistance but also specific strategies to increase the capacity of school districts to provide AT services. These include the development and dissemination of model forms, AT assessment manuals, recommended evaluation procedures, resource guides and other materials, and access to AT for trial use.</p> <p>WATI has both state-level services and regional services. Regional services are provided by 12 assistive technology consultants located in each of the 12 CESA regions in the state. Activities carried out at the state level include providing support and leadership to the regional AT consultants, providing specialized competency-based training, developing and conducting specialized summer institutes, developing resource guides or other materials for use by school personnel and parents, and arranging special buys of AT products at reduced prices. In addition, a state-level lending library of AT items that is open to all school districts is maintained.</p> <p>In each CESA, the assistive technology consultants work with staff from the constituent school districts to help them develop and improve their AT services. These regional AT consultants provide training, technical assistance, and support to increase the capacity of school districts to provide effective and efficient AT services. They also have smaller lending libraries of AT available to their school districts.</p>									
2 A B E	<p>Wisconsin DPI Graduation Rate Workgroup</p> <p>In preparation for the peer review of Wisconsin's graduation rate by the US Department of Education, a cross-agency workgroup has been convened. The purpose of the workgroup is to compile necessary information about how Wisconsin DPI collects, analyzes, and utilizes graduation rate data. Currently, the group has completed collection of information to submit to the US</p>				X	X	X			FM Graduation Chair

	Department of Education for peer review in January 2010. The group will be expanded as the agency works to develop continuous and substantial targets for graduation rates, including for students with disabilities. Group members will be working on the development of new data displays, dissemination of information about the graduation data, and eventual professional development for districts and interested stakeholders.									
2 C D E F	Wisconsin Graduation Summit In response to a national call to improve student graduation rates, Wisconsin State Superintendent Anthony Evers will convene a one day state summit of local teams with the theme "Every Child a Graduate" in the Spring of 2010. The design and delivery of the Summit will be based on guidance and support from the America's Promise Alliance, national corporations, and state associations. The purpose of the Summit is to build local capacity by sharing best practice strategies that increase graduation rates, especially among students of color and students with disabilities. Districts invited to attend were selected based on high rates and/or disparities in dropouts. A related summit will be held in Milwaukee by the Milwaukee School District prior to the state Summit. Both summits will require participants to develop plans on how to sustain the momentum and continue exploration of the issues and strategies that can be used to ensure all Wisconsin students graduate. Districts will be encouraged to collaborate with community partners, and DPI hopes to convene subsequent meetings to provide support and information about research-based practices either at a state-wide or regional level. 	Data Analysis Charts and Improvement Planning Forms. Districts use the information to review their local outcomes in relation to local planning and improvement activities. The data analysis forms match the state data retreat procedure so districts can easily incorporate outcomes data into improvement planning.									
2 E	Wisconsin Response to Intervention Initiatives (RTI) WDPI has been working both internally and externally in creating a statewide framework for the implementation of RTI strategies within school districts. An internal workgroup comprised of personnel from the Special Education, Content and Learning, Student Services: Prevention and Wellness, and Title 1 School Support teams meet to work on devising the framework and inservicing districts. A second workgroup comprised of representatives from the aforementioned teams, as well as individuals from professional education and parent organizations from the state, and personnel from two national organizations who offer states support in RTI are working with the smaller internal workgroup to guide the full scale implementation process. An external taskforce has been working on overseeing the development of the framework. This group has representatives from professional and parent organizations, and school personnel including teachers and administrators. Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: FAPE in the LRE

Indicator 3: Participation and performance of children with disabilities on statewide assessments:

- A. Percent of the districts with a disability subgroup that meets the State's minimum "n" size that meet the State's AYP/AMO targets for the disability subgroup.
- B. Participation rate for children with IEPs.
- C. Proficiency rate for children with IEPs against grade level, modified and alternate academic achievement standards.

(20 U.S.C. 1416 (a)(3)(A))

Measurement:

- A. AYP percent = $\left[\frac{\text{(\# of districts with a disability subgroup that meets the State's minimum "n" size that meet the State's AMO targets for the disability subgroup)}}{\text{(total \# of districts that have a disability subgroup that meets the State's minimum "n" size)}} \right] \times 100$.
- B. Participation rate percent = $\left[\frac{\text{(\# of children with IEPs participating in the assessment)}}{\text{(total \# of children with IEPs enrolled during the testing window, calculated separately for reading and math)}} \right]$. The participation rate is based on all children with IEPs, including both children with IEPs enrolled for a full academic year and those not enrolled for a full academic year
- C. Proficiency rate percent = $\left[\frac{\text{(\# of children with IEPs enrolled for a full academic year scoring at or above proficient)}}{\text{(total \# of children with IEPs enrolled for a full academic year, calculated separately for reading and math)}} \right]$.

Overview of Issue/Description of System or Process:

ESEA Flexibility Waiver

The U.S. Department of Education (USED) offered states the opportunity to apply for flexibility on certain provisions of the federal Elementary and Secondary Education Act (ESEA, currently known as NCLB, the No Child Left Behind Act). WDPI submitted a request for flexibility to the USED on February 22, 2012. On July 6, 2012, State Superintendent Tony Evers announced that Wisconsin's request for waivers had been approved by the USED.

College and career ready expectations for all students

Expanding upon "Every Child a Graduate" to ensure Wisconsin graduates are prepared for success in college and career, WDPI is raising expectations and making changes to assessment and graduation requirements.

Standards & Assessments

- **Full implementation of Common Core State Standards (CCSS) and Common Core Essential Elements (CCEE):** Instruction based on CCSS and CCEE (alternate achievement standards) must be in place by the 2014-15 school year. Assessment of CCSS and CCEE proficiency will begin in the 2014-15 school year.
- **New Assessment Systems:** Proficiency on CCSS will be measured by new assessment systems being developed by the Smarter Balanced Assessment Consortium (replacing the Wisconsin Knowledge and Concepts Examination [WKCE]). Proficiency on the CCEE will be measured by the Dynamic Learning Maps Assessment (replacing the Wisconsin Alternate Assessment for Students with Disabilities [WAA-SwD]). Both assessments will be field tested in 2013-14 and required statewide in 2014-15. Beginning in 2014-15, these state assessments will move from fall to spring, and the high school assessment will move from grade 10 to grade 11. Both assessments will be given in grades 3-8 and 11. These online assessment systems will include end-of-year tests, as well as additional resources to help benchmark student progress throughout the year.
- **Raised Expectations:** The proficiency levels on the Smarter Balanced assessment will be benchmarked against national and international standards. As a transition, the WKCE will use cut scores based on the more rigorous NAEP scale to calculate proficiency in reading and mathematics.
 - o 2011-12: Current WKCE cut scores for proficiency remain in place for student-level reporting. WDPI will begin the process to convert WKCE cut scores, working collaboratively with WDPI's Technical Advisory Committee and testing vendor to field test NAEP-based cut scores on the WKCE. NAEP-based benchmarks will be applied for initial accountability calculations and provided on new school report cards.
 - o 2012-13: NAEP-based cut scores applied to all WKCE test results including student-level individual performance reports and accountability report cards in spring 2013.
 - o The cut score change does not apply to the Wisconsin Alternate Assessment for Students with Disabilities (WAA-SwD). WAA-SwD data are still included in accountability calculations.
- **College and Career Readiness:** WDPI is proposing use of the EXPLORE-PLAN-ACT + WorkKeys package (the ACT suite) and will request funds in the Wisconsin 2013-15 biennial budget to support administration of these assessments statewide. The data gathered from these assessments enable academic growth to be measured throughout high school. Results also inform students, parents, and educators about the extent to which students are on-track for college and career. These assessments are supplemental to the 11th grade Smarter Balanced assessment, which will be used to measure proficiency on the CCSS beginning in 2014-15.

State-developed differentiated recognition, accountability, and support

With the goal of developing a statewide accountability system that increases student achievement and promotes and supports school improvement across the state, WDPI worked with a statewide school accountability design team, other stakeholders, and the Technical Advisory Committee to establish accountability measures that 1) are fair; 2) raise expectations; and 3) provide meaningful measures to inform differentiated recognitions, intervention, and support.

Accountability Index

- Beginning in 2011-12, a comprehensive accountability index will replace the current ESEA Adequate Yearly Progress (AYP) system. The index approach uses multiple measures and classifies schools along a continuum of performance.
- Schools and districts will be held accountable for outcomes in four priority areas that comprise sub-scales of the index:
 - o Student achievement
 - o Student growth
 - o Closing achievement gaps

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

- On-track to graduation and postsecondary readiness
- Index scores will be provided for each of the four sub-scale areas.
- Index scores may be reduced because of Red Flags signifying poor performance in three other areas. Schools or districts failing to meet minimum expectations in the following areas will receive deductions to index scores.
 - Test Participation (elementary, middle, high school) –
 - Test participation rates falling below an acceptable level detrimentally affects the comparability of a school's assessment results. The expectation is for each school to have a minimum test performance rate of 95%.
 - Dropout rates (middle and high school) – Regardless of school performance, high dropout rates run counter to the goal of graduating all students prepared for college and careers through improving academic performance and retention. The expectation is for each school to have a maximum dropout rate of 6%.
 - Absenteeism (elementary, middle, high school) – Absenteeism is highly correlated with low performance; if students are not in school they do not have access to important content and instruction. This indicator compares the attendance of a school's students against a standard set by WDPI that reflects the relationship between poor attendance and poor student performance. The expectation is for each school to have a maximum absenteeism rate of 13%.
- Overall accountability scores will be a combination of priority area scores, adjusted for Red Flag deductions, on an index of 0-100.

State Accountability Ratings

- Accountability index scores (0-100) will place schools and districts into one of five categories along the performance continuum:
 - Significantly Exceeds Expectations
 - Exceeds Expectations
 - Meets Expectations
 - Meets Few Expectations
 - Fails to Meet Expectations
- These ratings will be reported annually in the School Report Card, and will drive supports.

Annual Measurable Objectives (AMOs)

- AMOs are required by USED as part of Wisconsin's waiver request. AMOs are annual goals for all students and subgroups in reading, mathematics, and graduation.
- New AMOs begin in 2011-12, with 2010-11 serving as the baseline year during which the AMOs were established. The AMOs are annual increases for all students and each subgroup for the next six years.
- AMOs were established using 2010-11 proficiency rates (reflecting NAEP-based cut scores) of the schools at the 90th percentile. All students and each subgroup will be expected to make annual improvement toward reaching that level of performance in six years, with a minimum 1% improvement each year.
- The AMOs expect higher levels of growth for students performing at lower levels of achievement, consistent with Wisconsin's goal of reducing the achievement gap between student groups.
- School performance on the AMOs will be included in the report card but are not factored into a school's accountability index score or accountability rating.

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

- Exit criteria for Priority and Focus schools will be tied to AMOs.

Subgroup Accountability

- A cell size of 20 students will be used for all accountability calculations, a change from 40 students. Reducing the cell size to 20 allows schools, districts, and the state to identify subgroups that may be struggling but would not be reported under larger cell size rules.
- A high-need supergroup that includes at least 20 students from the economically disadvantaged, English language learners, and students with disabilities subgroups will be applied only in cases in which at least two of these subgroups do not alone have the minimum group size of 20, but when combined, do meet cell size. This recognizes the importance of closely monitoring the needs of these groups and allows more schools to be included in accountability calculations.
- The accountability index is designed to emphasize the performance of every subgroup. The four sub-scale areas and index will prevent small subgroup performances from being masked.
- Report cards will include subgroup performance to increase transparency.

Assessment in Accountability

Reporting Year	Assessment	Role in accountability reporting
2011-12	WKCE	Current WKCE performance levels used for press release & individual student performance reports; NAEP-based performance levels used for initial school accountability report cards.
2012-13	WKCE	NAEP-based performance benchmarks used for WKCE student performance reports and school & district accountability report cards.
2013-14	WKCE Smarter Balanced and Dynamic Learning Maps	Continue using NAEP-based performance benchmarks for accountability report cards. Field test Smarter Balanced and Dynamic Learning Maps assessments and define performance benchmarks to be used across all participating states.
2014-15	Smarter Balanced and Dynamic Learning Maps	Fully implement Smarter Balanced and Dynamic Learning Maps assessments with consortia-defined performance benchmarks. Results used for accountability report cards.

District Accountability

- Currently, district accountability is based on the aggregate of all district students within three separate levels: elementary, middle, and high school. This will continue, with an accountability index score calculated for each of the levels.
- The district AMO is to have at least one of the three aggregate levels—elementary, middle or high school—in the *Meets Expectations* category or higher—and to have no individual school in the *Fails to Meet Expectations* category.
- The district will miss the AMO if its aggregate scores for all three levels fall below the *Meets Expectations* category, or if it has any individual school in the *Fails to Meet Expectations* category.
- For districts missing the AMO, the state superintendent may require that a district-level diagnostic review be completed to evaluate critical systems and structures within the central office, including but not limited to human resources, curriculum and instruction, finance, and leadership.

- District-level report cards will be provided following the 2012-13 school year.

Support and Intervention

- Overall Approach
 - WDPI will identify both high and low performing schools, but will focus interventions and supports on the lowest performing schools in the state.
 - Support and interventions will match the severity and duration of identified problems.
 - Districts will remain the entry point for school improvement and district reform.
 - WDPI will establish one statewide system of support for all publicly-funded schools, pending state funding. This replaces the current system, which only is funded by federal Title I dollars and, therefore, only requires interventions of the lowest-performing Title I schools.
 - Resources will be electronically available to all schools in the state that wish to conduct a self-assessment to establish a plan for continuous improvement.
 - Supports will include online resources, and technical assistance from the Wisconsin Response to Intervention (Rtl) Center, CESAs, and WDPI staff.
- Priority Schools
 - For 2012-13, the lowest performing Title I schools, as determined by achievement scores within the accountability index, comprising at least 5% of all Title I schools in the state will be identified as Priority Schools.
 - Beginning in fall 2012, Title I schools will no longer have to implement NCLB mandated Supplemental Education Services (SES) or provide students the opportunity to transfer to a higher-performing district school using Title I funds for transportation.
 - Instead, Title I Priority Schools will have the following options:
 - Contract with a state-approved turnaround partner to conduct a comprehensive, on-site diagnostic review of instructional policies, structures, and practices to identify potential barriers to student outcomes. Informed by the findings of the review, the school must develop a reform plan, which emphasizes improvements in the core instruction of reading and mathematics, in collaboration with their turnaround partner. The plans must be submitted to and approved by WDPI. Schools must continue to work with the turnaround partner to implement reform plans. Reform plans must include specific onsite interventions, such as extended learning time, targeted reading and mathematics supports, professional development and implementation assistance.
 - WDPI will conduct site visits, as well as reviews of data, implementation of reform plans, and budgets, as part of ongoing monitoring of reform implementation.
- Closure.
 - The state superintendent may intervene and direct specific actions for schools failing to show demonstrable improvement after four years.
- Focus Schools

- For 2012-13, Title I schools that show large gaps in reading scores, mathematics scores, or graduation rates between subgroups or low performance by high need subgroups, as determined by index calculations, will be identified as Focus Schools. Focus Schools will comprise at least 10% of all Title I schools in the state.
- Title I Focus Schools must participate in an online state-directed self assessment of the current core reading and math curriculum including interventions for struggling students. The school must develop an improvement plan based on the self assessment, and implement Response to Intervention (RtI). Specific interventions in the plan must address identified problem areas. The plan must be approved by WDPI.
- Supports will include online resources and technical assistance from the Wisconsin Response to Intervention (RtI) Center, Cooperative Education Service Agencies (CESAs), and WDPI staff.
- WDPI will conduct electronic reviews of each school's progress throughout the year.
- The state superintendent may intervene and direct specific actions for schools failing to show demonstrable improvement after four years.

School Recognition and Rewards

- The top performing schools will receive public recognition.
- The state will reward high performing and high progress schools in order to highlight student achievement and student growth.
- The state will identify a small sample of high performing schools to serve as models of best practices which can be shared and replicated statewide, particularly with those schools not meeting expectations.

Actual Target Data for 2011-12:**A. Percent of Districts Meeting the State's AMO Targets**

The Wisconsin Department of Public Instruction (WDPI) applied for and was granted a waiver of the requirements to determine Adequate Yearly Progress for LEAs and schools as part of requesting ESEA flexibility. Because WDPI has an approved ESEA flexibility request that includes a waiver of determining AYP, the state used AMO data for accountability reporting under 3.A.2.

As directed by OSEP, WDPI is reporting against the previous AYP targets because the state did not establish targets for the percent of districts meeting the Annual Measurable Objectives (AMO) in Reading and Math as part of the state's waiver for flexibility under Title I of the ESEA. Under Wisconsin's waiver, AMOs were set for student subgroups, with results to be reported by school. No statewide targets were set for the percentage of districts that meet subgroup AMOs, e.g. the students with disabilities subgroup (<http://www2.ed.gov/policy/eseaflex/approved-requests/wi.pdf>, pages 71-73).

AMO at the *district* level for students with disabilities (SwD) in Reading and Math is determined by whether the district (a) met the minimum cell size of 20 SwD for each grade span and if so, whether it (b) met the AMO of 19.8% in Reading and 28.2% in Math for 2011-12. In order to miss AMO at the district level for the SwD subgroup in Reading or Math, a district must miss AMO for that subject in all relevant grade spans (e.g., all grade spans in which the district has tested students). For most Wisconsin districts, there are three relevant grade spans (elementary, middle, and high). Many districts are K-12 districts and thus have students tested in all three grade spans. A small number of districts, however, such as union high school districts or K-8 districts, have only two or even one relevant grade span for AMO purposes. The use of grade spans for determining AMO is unique to the district level. At the school level, no grade spans are used for accountability purposes.

2011-2012 Data:

Part B State Performance Plan (SPP) for 2005-2010

 Wisconsin
 State

Ninety-eight LEAs met the minimum cell size for students with disabilities in all relevant grade spans. Of these 98 LEAs, no LEA missed the AMO threshold for the students with disabilities subgroup in all grade spans.

Percent = # of districts, by subject, that met 2011-2012 AMO targets for SwD, divided by # of districts that met the minimum SwD cell size (20 full academic year (FAY) SwD tested) times 100.

Subject	# of Districts Meeting 2011-12 AMO Requirements	# of Districts Meeting Min. SwD Cell Size	% of Districts Meeting AMO Targets for Disability Subgroup
Reading	98	98	100%
Math	98	98	100%

B. Participation rate for children with IEPs.

Please note: Wisconsin did not have any children with IEPs participating in alternate assessments against grade level standards for SY 2011-12.

Grade / Subject	# of Children with IEPs Participating in the Assessment	# of Children with IEPs	2011-12 Overall Participation Rate
3rd Gr. Reading	8,144	8,247	99%
3rd Gr. Math	8,188	8,247	99%
4th Gr. Reading	8,549	8,667	99%
4th Gr. Math	8,597	8,667	99%

State

10th Gr. Math	8,304	8.534	97%
---------------	-------	-------	-----

Data Source: From Wisconsin Student Assessment System (WSAS) 2011-12 SY.

Wisconsin continues to exceed the 95% target for the rate of children with disabilities participating in statewide testing. The State reports publicly on the participation of children with disabilities on statewide assessments at the district and school level with the same frequency and in the same detail as it reports on the assessments of nondisabled children, as required by 34 CFR §300.160(f). Wisconsin does not offer alternate assessments based on grade-level academic achievement standards or modified academic achievement standards.

3.C. Proficiency rate for children with IEPs against grade level, modified and alternate academic achievement standards.

In its application for flexibility under Title I of the ESEA, Wisconsin set ambitious but achievable annual measurable objectives in Reading and Math proficiency by subgroup. Wisconsin's approach to selecting AMOs was based on the following premise: in order for AMOs to be ambitious as well as achievable, targets must be set based on a combination of known data (i.e., what are the best schools able to accomplish?) and ambitious timelines that press a sense of urgency. Wisconsin's re-setting of proficiency is aligned with the National Assessment of Educational Progress (NAEP) proficiency levels. This sets an ambitious goal, and one that involves the need for rapid progress by groups that are traditionally under-achieving. For FFY 2011 reporting, the AMO for the students with disabilities subgroup in reading is 19.8%, increasing by 6% annually. For mathematics, the AMO for the students with disabilities subgroup is 28.2%, increasing by 7.4% annually.

For FFY 2011, WDPI is reporting proficiency data for the students with disabilities subgroup that are aligned with the National Assessment of Educational Progress (NAEP). This is baseline data. Roughly, the percentage of students identified as proficient based on the FFY 2011 reporting formula aligns with the percentage of students identified as advanced in previous years reporting. Thus the percentages appear to have declined, but in reality the bar has been set higher resulting in higher expectations for all students.

Grade / Subject	# of Children with IEPs Scoring at or Above Proficient Against Grade Level, Modified and Alternate Academic Achievement Standards	# of Children who Received a Valid Score and for whom a Proficiency Level was Assigned	2011-12 Overall Proficiency Rate
3rd Gr. Reading	1,402	8,144	17%
3rd Gr. Math	2,591	8,188	32%
4th Gr. Reading	1,435	8,549	17%
4th Gr. Math	2,570	8,597	30%
5th Gr. Reading	1,294	8,858	15%

3 E D	Assessment Grant , http://sped.dpi.wi.gov/sped_assessmt The WDPI funds a statewide initiative to narrow the achievement gap and provide tools to assess and document student performance for students with disabilities. Stephen N. Elliott, PhD, with assistance from Andrew T. Roach, PhD., served as consultants to the WDPI for several years with the expressed purpose of providing guidance and expertise around alternate assessment. Dr. Elliott is the Dunn Professor of Educational and Psychological Assessment and Special Education at Vanderbilt University. Dr. Roach is an Assistant Professor of Pediatrics and Special Education at Vanderbilt University. Both previously served at the University of Wisconsin. With their assistance and through this grant, the Wisconsin Alternate Assessment (WAA) for student with disabilities was designed, piloted, and refined. The WAA is disseminated at workshops throughout the state and through a WDPI mailing. An Administration Guidebook was developed and continues to be updated. Standard-setting workshops and validity and reliability studies continue to be an integral part of this grant.	X	X							Assessment Grant Assessment Workgroup

3 B	Focused Monitoring (FM) Wisconsin has developed a Continuous Improvement and Focused Monitoring System (CIFMS) to achieve positive results for children with disabilities in Wisconsin while ensuring continued procedural compliance with state and federal laws and regulations. WDPI involves stakeholders in the ongoing development of CIFMS including the identification of priority areas for focused monitoring in Wisconsin. The CIFMS stakeholders analyzed statewide student outcome data to determine that improving graduation rates of students with disabilities should be a priority in Wisconsin. The CIFMS stakeholders identified student enrollment groups within the state from which a select number of school districts are identified for FM. WDPI uses trend data over a three-year period to identify districts for FM. The districts within each enrollment group most in need of improvement are selected for FM. 3 B D	Focused Performance Reviews WDPI in collaboration with CESAs #7 and #5 developed the Special Education Data Retreat Model to provide a unique, structured forum where collaborative teams of special educators, administrators, along with regular educators evaluated their systems for design and delivery of special education and related services. Focused data analysis enables educators to identify potential root causes of the low graduation rate, leading toward the development of school/district plans to address identified needs and improve student outcomes. Some of the data analyzed includes graduation, dropout, suspension, expulsion, participation and performance on statewide assessments, and educational environments. Data is disaggregated by disability area, gender, and race/ethnicity whenever it is available. Statewide training was provided to give all Wisconsin school districts the opportunity to analyze their own data by a collaborative staff team, to identify areas of need based on the data analysis, and to work towards a plan to address those needs building/district wide. To accomplish this statewide training, a "Train the Trainers" model was used. A two-day facilitated training was conducted for all Regional Service Network (RSN) directors and school improvement service (SIS) directors in the state. A model set of data was used for training purposes. After the RSN and SIS directors were trained, each CESA conducted trainings for its own school districts. Follow-up meetings were conducted to provide support and technical assistance to those responsible for conducting special education data retreats. This data analysis component was further refined and integrated into Wisconsin's FM process as a beginning point for districts selected for FM and renamed the Focused Performance Review (FPR). Data continues to be disaggregated by disability area, and race/ethnicity whenever available.	X	X	X	X	X	X			Data Consultant Graduation Workgroup Reading Achievement Workgroup

3 E H	<p>GSEG on Alternate Assessments Based on Alternate Achievement Standards (AA-AAS) 2007-2011</p> <p>Wisconsin is participating in a GSEG grant, entitled, "A State Consortium to Examine the Consequential Validity of Alternate Assessments based on Alternate Achievement Standards: A Longitudinal Study." This grant was awarded to The North Central Regional Resource Center in October 2007. There are three states (Wisconsin, Michigan and Pennsylvania) included in this collaborative effort. The consortium will adopt a common framework and research processes for each State's evaluation of its own AA-AAS. The consortium will identify criteria that will operationally define "consequential evidence" that will serve as evidential variables. Data sources will include teacher and administrators using survey methodology. Various types of information will be collected, including beliefs and attitudes regarding AA-AAS in concert with student proficiency measures and school AYP status, along with 618 Federal Child Count information. The data will be collected within a longitudinal framework with involves comparisons of cross-sectional cohorts across grades. This design will allow for the collection of data that will provide consequential evidence at the elementary, middle and high school levels. Objectives for this grant include, convening a stakeholder feedback group in each state, developing instrumentation based on validity arguments, conducting a field-test on the instrumentation, developing a web-based survey, developing sample selection procedures, conducting surveys, developing data analysis procedures, reporting and dissemination.</p>			X	X	X	X			GSEG Assessment Workgroup

Wisconsin
State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	activities on a portion of the LEA self-assessments. Based on its review, WDPI provides technical assistance to LEAs, which may result in revisions to their planned corrective actions. LEAs report the status of their corrective actions to ensure correction within one year of identification of the noncompliance. WDPI verifies that all noncompliance has been corrected within one year. LEAs failing to correct noncompliance within one year of identification are required to report the reasons and the specific steps that will be implemented to correct the noncompliance. These LEAs are assigned to a more intensive level of oversight.									
3 B	Procedural Compliance Self-Assessment Process Each year the state gathers monitoring data from one-fifth of the LEAs in the state through an LEA self-assessment of procedural requirements related to monitoring priority areas and SPP indicators. LEAs conduct the self-assessment using a sample of student individualized education program (IEP) records. Each year, the cohort of districts are representative of the state considering such variables as disability categories, age, race, and gender. Milwaukee Public Schools, the only LEA with average daily membership of over 50,000, is included in the sample each year. WDPI will include every LEA in the state at least once during the course of the SPP. The self-assessment of procedural requirements includes data on each of the SPP indicators. LEAs report the self-assessment results to WDPI, along with planned corrective actions. LEAs are required to correct noncompliance as soon as possible, but no later than one year from identification. To assure valid and reliable data, WDPI provides web-based training in how to conduct the self-assessment, including how to create random samples for review. The self-assessment checklist includes standards for reviewing the procedural requirements. Information about the self-assessment is posted on the WDPI website at http://sped.dpi.wi.gov/sped_spp-selfassmt . LEAs with noncompliance correct it through developing and implementing agency-wide corrective action plans. WDPI staff provide technical assistance and conduct periodic reviews of progress to ensure correction of noncompliance as soon as possible, but no later than one year from identification of noncompliance. WSTI provides training to assist with the correction of noncompliance of transition		X	X	X	X	X	X		Procedural Compliance Workgroup LPP Consultants

State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	<p>requirements.</p> <p>Annually, WDPI reviews all LEA self-assessments and conducts validation activities on a portion of the LEA self-assessments. Based on its review, WDPI provides technical assistance to LEAs, which may result in revisions to their planned corrective actions. LEAs report the status of their corrective actions to ensure correction within one year of identification of the noncompliance. WDPI verifies that all noncompliance has been corrected within one year. LEAs failing to correct noncompliance within one year of identification are required to report the reasons and the specific steps that will be implemented to correct the noncompliance. These LEAs are assigned to a more intensive level of oversight.</p>									
3 C D	<p>Responsive Education for All Children (REACH), http://www.reachwi.org (Technical Assistance and Resource Clearinghouse)</p> <p>The purpose of this statewide initiative is to help Wisconsin schools establish and sustain the capacity to make systemic improvement needed to reduce barriers to learning and enable <u>all</u> students to experience success, including students with disabilities.</p> <p>REACH provides a research-based framework and professional development resources for Wisconsin schools to use to support school improvement. Within the framework, instructional options, professional development and collaborative partnerships help to support all members of the system (teachers, families, others) as they identify and implement strategies that promote positive student outcomes. A multi-tier prevention/intervention model including universal, selected, and targeted options serves as the basis for decision making. All students, including students with disabilities, are addressed through the initiative. REACH serves as a vehicle to assist schools in implementing Early Intervening Services and “response to intervention” (RTI).</p> <p>The REACH Initiative includes:</p>	X	X	X	X	X	X			<p>REACH Grant</p> <p>REACH Grant Consultant</p> <p>Completed</p>

The Technical Assistance Center also trains expert mentors to guide schools through the implementation of the framework. Four REACH regional centers to provide training and technical assistance supporting the REACH framework and tools throughout the state. District incentive grants to a limited number of high needs schools to support REACH framework implementation. 									
3	<p>School Improvement: Focused Review of Improvement Indicators (FRII)</p> <p>During the 2007-08 SY, WDPI began working to expand upon the successful focused monitoring model previously utilized to provide districts a mechanism for conducting a similar process of data analysis and improvement planning around the SPP improvement indicators of math achievement, preschool outcomes, parent involvement, and post-high school outcomes. WDPI will also be working with CESA based Regional Service Network (RSN) providers to employ various technical assistance options, including statewide summits. WDPI is currently building the infrastructure to execute and support this process with statewide implementation. WDPI believes this refined school improvement process will not only address the needs of both urban and rural districts, but it will continue to promote data driven decision making as well as identifying promising practices that can be acknowledged and disseminated statewide.</p>					X	X	X	X	Data Consultant Graduation Workgroup Reading Achievement Workgroup LPP Consultant FRII Workgroup FRII Coordinator
3 B C G	<p>Schools Identified for Improvement (SIFI)/Districts Identified for Improvement (DIFI)</p> <p>Wisconsin's Statewide System of Support (SSOS) is predicated on the concept that the role of the WDPI is to strengthen the capacity of local school districts to identify and effectively differentiate support to their lowest performing schools. To accomplish this, the WDPI has sorted each of its 426 public school districts into one of three categories: high priority districts, priority districts, and all other districts. High priority districts are those which</p>	X	X	X	X	X	X	X	X	Title I Team Special Education Team's Graduation Workgroup Special Education Team's Reading

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	<p>have missed Adequate Yearly Progress (AYP) as a district or been identified as a district in need of improvement (DIFI) and have Title I schools that are identified for improvement (SIFI) or missed AYP under No Child Left Behind (NCLB).</p> <p>In Wisconsin, high priority districts are required to assess the efficacy of their current district efforts to support school improvement using the 7 Characteristics of Successful Districts (Vision, Leadership, High Academic Standards, Standards of the Heart, Family, School and Community Partnerships, Professional Development, and Evidence of Success, http://www.dpi.state.wi.us/cssch/cssovrvw1.html) framework or a comparable model. Using five characteristic areas (1. Vision, Values and Culture; 2. Leadership and Governance; 3. Decision Making and Accountability; 4. Curriculum and Instruction; and 5. Professional Development and Staff Quality, http://www.dpi.state.wi.us/ssos/pdf/dsahandbk.pdf), a team of district staff members conduct a Self-Assessment to evaluate the level and effectiveness of district support to high priority schools. The results of the self-assessment are validated by a team of exemplary educators through an onsite peer review process. The peer review is meant to validate and add to the findings of the self-assessment. As a result of these two processes, the WDPI determines which school improvement strategies are working well for the district and where the district is in need of technical assistance to improve the effectiveness of its support system. A plan for technical assistance and monitoring is developed collaboratively between the WDPI and the district.</p> <p>Collaboratively, the Title 1 and Special Education teams of WDPI worked with the Milwaukee Public Schools to create their DIFI improvement plan in Fall of 2007. Using the findings from a FM visit as well as other data, specific activities were created to improve outcomes for students with disabilities in the areas of reading and math. Increased focus, resources and time were allotted to increase student achievement in these areas, Pre-kindergarten through Grade12.</p>									Achievement Workgroup

C D	<p>WATI is a nationally recognized initiative whose mission is to ensure that every child in Wisconsin who needs assistive technology (AT) has equal and timely access to an appropriate evaluation and the provision and implementation of any needed AT devices and services. The primary goal of the initiative is to improve outcomes and results for children and youth with disabilities through the use of assistive technology to access services, school programs and curriculum, and community activities. As a result, activities carried out by the initiative have a positive impact on graduation rates, drop-out rates, and suspension/expulsion rates.</p> <p>WATI is designed specifically to increase the capacity of school districts to provide AT services by making training and technical assistance available to teachers, therapists, administrators, and parents throughout Wisconsin. It accomplishes this by providing not only training and direct technical assistance but also specific strategies to increase the capacity of school districts to provide AT services. These include the development and dissemination of model forms, AT assessment manuals, recommended evaluation procedures, resource guides and other materials, and access to AT for trial use.</p> <p>WATI has both state-level services and regional services. Regional services are provided by 12 assistive technology consultants located in each of the 12 CESA regions in the state. Activities carried out at the state level include providing support and leadership to the regional AT consultants, providing specialized competency-based training, developing and conducting specialized summer institutes, developing resource guides or other materials for use by school personnel and parents, and arranging special buys of AT products at reduced prices. In addition, a state-level lending library of AT items that is open to all school districts is maintained.</p> <p>In each CESA, the assistive technology consultants work with staff from the constituent school districts to help them develop and improve their AT services. These regional AT consultants provide training, technical assistance,</p>									Consultant

Data on the website indicates growth in not only the numbers of students with disabilities taking the WKCE, but also an increase in the percent of students with disabilities scoring at the proficient and advanced levels. The WINSS Successful School Guide includes the following resources: Standards and Assessment, Continuous School Improvement, Data Analysis, and Best Practices.	X	X	X	X	X	X	X	X	Data Consultant
3 E	Wisconsin Response to Intervention Initiatives (RTI) WDPI has been working both internally and externally in creating a statewide framework for the implementation of RTI strategies within school districts. An internal workgroup comprised of personnel from the Special Education, Content and Learning, Student Services: Prevention and Wellness, and Title 1 School Support teams has been meeting monthly to work on devising the framework and inservicing districts. A second group was created in November 2007 comprised of individuals assigned to attend the National Summit on RTI in December 2007. This group had representatives from the aforementioned teams, as well as individuals from professional education and parent organizations from the state, and personnel from two national organizations who offer states support in RTI. This group is working with the smaller internal workgroup to guide the full scale implementation process. An external taskforce has been working for the past two years on overseeing the development of the framework. This group has representatives from professional and parent organizations, and school personnel including teachers and administrators. Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: FAPE in the LRE

Indicator 4: Rates of suspension and expulsion:

- A. Percent of districts that have a significant discrepancy in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and
- B. Percent of districts that have: (a) a significant discrepancy, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

(20 U.S.C. 1416(a)(3)(A); 1412(a)(22))

Measurement:

A.Percent = [(# of districts that have a significant discrepancy in the rates of suspensions and expulsions for greater than 10 days in a school year of children with IEPs) divided by the (# of districts in the State)] times 100.

B.Percent = [(# of districts that have: (a) a significant discrepancy, by race or ethnicity, in the rates of suspensions and expulsions of greater than 10 days in a school year of children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards) divided by the (# of districts in the State)] times 100.

Include State's definition of "significant discrepancy."

Overview of Issue/Description of System or Process:

Out of school suspensions are defined as absences from school imposed by the school administration for noncompliance with school district policies or rules, for threatening to destroy school property, or for endangering the property, health, or safety of those at school (see §120.13(1)(b), Wis. Stats.). According to Wis. Stats., s. 118.16(1m), "The period during which a pupil is absent from school due to a suspension or expulsion under s. 120.12 or s. 119.25 is neither an absence without an acceptable excuse for the purposes of sub (1)(a) nor an absence without legal cause for the purposes of sub (1)(c)."

Expulsions are defined as absences from school for purposes of discipline as imposed by the school board for violation of school district rules; threats against school property; or conduct which endangers the property, health, or safety of those at school. Expulsion is a formal school board action defined in Wis. Stats., 120.13 (1)(c), and 119.25 (first-class city school district).

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

Wisconsin annually collects district-level disability data, disaggregated by race/ethnicity, for students aged 3 through 21 in special education. Wisconsin Department of Public Instruction (WDPI) uses the number of children with out-of-school suspensions/expulsions totaling greater than ten days as reported on the Report of Children with Disabilities Subject to Disciplinary Removal under Part B of the Individuals with Disabilities Education Act as well as its public enrollment data when calculating risk ratio.

Background Information on 4A

In 2004, the State compared students with disabilities across local educational agencies (LEAs). This was necessary as comparable data of students without disabilities suspended/expelled for more than ten days is not collected. A student may have had a single suspension/expulsion of greater than ten days or may have had multiple suspensions summing to greater than ten days.

Baseline Data for FFY 2004 (2004-2005) - Indicator 4A:

School Year	# Districts with Significant Discrepancy	Total # of Districts	Percent of Districts with Significant Discrepancy
2004-05	16	439	3.64%

Data Source: School Performance Report and 2004 child count

Calculation for Indicator 4A:

$$16/439 = 0.0364$$

$$0.0364 \times 100 = 3.64\%$$

Discussion of Baseline Data for Indicator 4A:

The percent of districts identified by the State as having a significant discrepancy in the rates of suspensions and expulsions of children with disabilities for greater than 10 days in during the 2004-05 school year was 3.64%. Sixteen districts in the state were identified with significant discrepancy.

State's definition of significant discrepancy:

1. For PK-12 districts, the identification rate for significant discrepancy is 3.29% or higher.
2. For union high schools, the identification rate for significant discrepancy is 6.96% or higher.
3. A minimal cell size of four students suspended/expelled for more than 10 days.

To determine the definition of significant discrepancy and set targets, stakeholders examined data in a variety of ways including ranking districts by their percentage of students with disabilities suspended/expelled for more than ten days and by calculating standard deviation from the mean. Stakeholders chose to set the target for the 2005-06 school year (SY) as 1.75 standard deviations above the mean. This standard deviation of

1.75% was first computed for PK-12 districts, and then for districts that only include grades 9-12 (union high schools). For PK-12 districts, this established an identification rate for significant discrepancy as 2.93% or higher. Using the same standard deviation of 1.75%, significant discrepancy was established at 6.96% or higher for union high schools. Stakeholders chose to compute the significant discrepancy for union high school apart from PK-12 districts after considering the unique circumstances of union high schools. Union high schools are comprised of a single school – a high school with grades 9-12. Union high schools only have a population of students in the age range when students are more typically removed (suspended/expelled). This can lead to a higher percentage of suspensions/expulsions than in all other LEAs. In establishing these targets, the stakeholders analyzed 2004-05 data and set a percentage target that reflects the goal of reducing by one school district the total number of districts identified each year with a significant discrepancy.

Beginning with the 2005-06 SY, WDPI established a minimal cell size of four students with disabilities suspended/ expelled for more than 10 days in order to align the district identification process for this indicator with the disproportionality indicators (#9 and #10). WDPI also adjusted the threshold for identification of significant discrepancy for this indicator from 2.93% to 3.29%. This adjustment was due to the availability of a more complete data set than was available at the time the original threshold was set. Previously, one school district with the highest rate of suspensions and expulsions of children with disabilities for greater than 10 days in a school year in the state was not included in the data set when the threshold was computed. After this district's data was included in the data set, the threshold was recalculated using the 1.75% standard deviation to identify significant discrepancy in PK-12 districts.

Background Information on 4B

In 2011, OSEP directed WDPI to revise its methodology for calculating Indicator 4B to ensure the criteria was nondiscriminatory. In preparation for revising the State's definition of significant discrepancy, Wisconsin participated in conference calls hosted by OSEP, attended related professional development at the OSEP Mega Conference, and reviewed all technical assistance provided by OSEP and WESTAT. WDPI involved the State Superintendent's Council on Special Education (stakeholders) during the development and application of the revised methodology. The following definition was submitted to OSEP for review and was found to be an acceptable comparison methodology as found in 34 CFR §300.170. This criterion establishes a single State bar that applies to all race/ethnicities and is nondiscriminatory.

State's definition of significant discrepancy, by race or ethnicity:

1. Cell size: Districts are identified for having significant discrepancy if they meet the minimum n size of 4 students with disabilities for a given race/ethnicity suspended/expelled for more than ten days; and
2. Risk: , Have a risk for any racial/ethnic group greater than 2 standard deviations above the statewide risk for a given reporting period,
3. Consecutive Years: WDPI does not require districts to meet the above criteria for consecutive years. LEAs meeting the criteria for one year are identified with significant discrepancy.

If districts are identified as having significant discrepancy, based on race or ethnicity, they are required to form district wide teams that include the Director of Special Education. The district teams meet with Department staff to review the policies, procedures, and practices relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards to determine they are race neutral, in compliance with Part B of IDEA 2004, and to determine whether noncompliance (if identified) contributes to the significant

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

discrepancy. The review process for each district is documented and filed with the WDPI. If WDPI identifies noncompliance, then the state verifies the district with noncompliance (1) is correctly implementing the specific regulatory requirements based on a review of updated data; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the district, consistent with OSEP Memorandum 09-02 dated October 17, 2008.

Districts with significant discrepancy, based on race or ethnicity, revise, if necessary, policies, procedures, and practices. Further, the districts are required to develop and implement improvement plans to address their significant discrepancy, based on race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs. Districts are also required to attend WDPI's annual Summer Institute on Addressing Disproportionality (now known as CREATE). This institute features both national and local efforts, initiatives, and issues involved in understanding, identifying, and addressing disproportionality in special education, including discipline.

Baseline Data for Indicator 4B (data from 2009-10):

School Year	Total Number of Districts	Number of Districts with Significant Discrepancy by race or ethnicity	Number of Districts with policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements	Indicator 4B: Percent of Districts
2009-2010	442	5	0	0%

Calculation for Indicator 4B:

$$0/442 = 0.0000$$

$$0 \times 100 = 0\%$$

To determine the percent of districts with significant discrepancy by race and ethnicity, WDPI divided zero districts with (a) a significant discrepancy, by race or ethnicity, in the rates of suspensions and expulsions of greater than 10 days in a school year of children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards by 442, the total number of LEAs, times 100. The total number of LEAs includes 426 public school districts and 16 independent charter schools.

Discussion of Baseline Data:

The State examined the data disaggregated by race and ethnicity to determine if significant discrepancies are occurring in the rates of long-term suspensions and expulsions of children with IEPs. The State's examination included the rates of suspensions and expulsions for children with IEPs among LEAs within the State.

Using the State's criteria, WDPI identified five LEAs with significant discrepancy in the rates of suspensions and expulsions of children with disabilities for greater than ten days in a school year during 2009-10. Three LEAs were identified with significant discrepancy for African-American

students, one LEA was identified as having significant discrepancy for African-American, American Indian, and Hispanic students, and one district was identified as having significant discrepancy for Hispanic students.

The minimum “n” size of four students with disabilities for a given race/ethnicity suspended/expelled for more than 10 days resulted in excluding 441 LEAs from the calculation of significant discrepancy for American Indian; of those districts 429 (97%) had no cases of suspension or expulsion for American Indian students. The minimum n size also resulted in excluding 441 districts for from the calculation for Asian students. Of those districts, 436 (99%) had no cases of suspension or expulsion greater for than ten days for Asian students. Of the 434 LEAs excluded from the calculation for African American students, 411 (95%) had no cases of suspension or expulsion greater for than ten days. 422 of the 437 LEAs excluded from the calculation for Hispanic students (97%) had zero cases of suspensions and expulsions greater than ten days.

Districts are aware of the requirements that are activated when a child with a disability has been suspended or expelled from school for more than ten days. They are also aware of the negative effects of long-term suspensions and expulsions on a child’s future success in school and beyond. Districts in Wisconsin are using positive behavioral interventions and supports to proactively address behavior challenges and keep children in school. Many districts also participate in CREATE (see Indicator 9 for more information). For these reasons, most of the districts in Wisconsin do not meet the minimum cell size because they are not suspending and removing children with disabilities for more than ten days. The minimum cell size of four allows the Department to target resources on the neediest districts. It also allows for slight variance in population in very small districts.

WDPI reviewed the State’s policies, procedures and practices related to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, as required by 34 CFR §300.170(b). The State has *Model Local Educational Agency Special Education Policies and Procedures* for LEAs to meet their obligation to establish and implement special education requirements. WDPI also has sample forms and notices for use in the IEP team process to assist districts in complying with state (Chapter 115) and federal (IDEA) special education requirements. The sample forms and the model policies are posted on the Department’s web site (http://sped.dpi.wi.gov/sped_forms06).

Annually, all LEAs in the state are required to report whether the district adopted without substantive modifications the State’s *Model Local Educational Agency Special Education Policies and Procedures* and model IEP forms and notices for use in the IEP team process, or adopted locally developed special education policies and procedures and IEP forms and notices. LEAs that adopted locally developed or substantively modified special education policies and procedures or IEP forms and notices, submitted them to WDPI for review and approval. WDPI reviewed submissions for consistency with state and federal requirements. IEP forms and notices are an indicator of local practices. The *Model Local Educational Agency Special Education Policies and Procedures* include policies and procedures regarding the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, as required by 34 CFR §300.170(b).

WDPI investigates complaints based on requirements related to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards. In addition, WDPI monitors districts compliance related to these requirements through the procedural compliance self-assessment.

The five LEAs identified with significant discrepancy (4A and 4B) were required to complete a needs assessment related to policies, procedures, and practices that impact suspension and expulsion rates, including the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards and revise as necessary to ensure that policies, procedures, and practices comply with Part B, as required by 34 CFR 300.146. The LEAs completed the review (and revised, if necessary, noncompliant policies, procedures, and/or practices) and were required to submit an improvement plan directed at decreasing the number of students with disabilities suspended or expelled for greater

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

than ten days in a school year. All LEAs used a team review process. Based on the State's review of the five LEA's policies, procedures, and practices relating to the development and implementation of IEPs, the use of positive behavioral interventions, and supports and procedural safeguards to ensure compliance with IDEA pursuant to 34 CFR §300.107(b), WDPI identified no districts with policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements.

If WDPI identifies noncompliance with identified requirements of Part B, then the state verifies the district with noncompliance (1) is correctly implementing the specific regulatory requirements based on a review of updated data; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the district, consistent with OSEP Memorandum 09-02 dated October 17, 2008.

Measurable and Rigorous Targets:

Targets for 4A were set with stakeholder input. Targets for 4B were set by the Office of Special Education Programs.

FFY	Measurable and Rigorous Target
2005 (2005-2006)	4A. No more than 3.42% of districts will be identified by the State as having a significant discrepancy in the rates of suspensions and expulsions of children with disabilities for greater than ten days in a school year. 4B. N.A.
2006 (2006-2007)	4A. No more than 3.19% of districts will be identified by the State as having a significant discrepancy in the rates of suspensions and expulsions of children with disabilities for greater than ten days in a school year. 4B. N.A.
2007 (2007-2008)	4A. No more than 2.96% of districts will be identified by the State as having a significant discrepancy in the rates of suspensions and expulsions of children with disabilities for greater than ten days in a school year. 4B. N.A.
2008 (2008-2009)	4A. No more than 2.73% of districts will be identified by the State as having a significant discrepancy in the rates of suspensions and expulsions of children with disabilities for greater than ten days in a school year. 4B. N.A.
2009 (2009-2010)	4A. No more than 2.51% of districts will be identified by the State as having a significant discrepancy in the rates of suspensions and expulsions of children with disabilities for greater than ten days in a school year. 4B. 0% of districts will have (a) a significant discrepancy, by race or ethnicity, in the rate of suspensions and

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

FFY	Measurable and Rigorous Target
	expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.
2010 (2010-2011)	<p>4A. No more than 2.28% of districts will be identified by the State as having a significant discrepancy in the rates of suspensions and expulsions of children with disabilities for greater than ten days in a school year.</p> <p>4B. 0% of districts will have (a) a significant discrepancy, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.</p>
2011 (2011-2012)	<p>4A. No more than 2.05% of districts will be identified by the State as having a significant discrepancy in the rates of suspensions and expulsions of children with disabilities for greater than ten days in a school year.</p> <p>4B. 0% of districts will have (a) a significant discrepancy, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.</p>
2012 (2012-2013)	<p>4A. No more than 1.82% of districts will be identified by the State as having a significant discrepancy in the rates of suspensions and expulsions of children with disabilities for greater than ten days in a school year.</p> <p>4B. 0% of districts will have (a) a significant discrepancy, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.</p>

Improvement Activities/Timelines/Resources:

Wisconsin
State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
4 A B C	Academy for New Special Education Leadership An academy for personnel new to special education leadership positions was developed. The purpose of this professional development opportunity is to increase the knowledge, skills, and dispositions of new directors of special education regarding current special education issues, including the SPP Indicators.				X	X	X	X	X	WDPI Special Education Team
4 C D	Autism Project, https://dpi.wi.gov/sped/program/autism For more than ten years, WDPI has developed and conducted statewide trainings for school staff in the area of autism. Four trainings are held annually in various locations throughout the state. Basic level trainings are offered for school staff with limited knowledge of educational programming for students with autism spectrum disorders. The basic level training presents an overview of autism spectrum disorders and discusses topics such as functional behavioral assessment, classroom programming, sensory issues, and communication strategies. Advanced level trainings are offered for more experienced school staff. The advanced training presents more complex information about issues in early childhood education of students with autism spectrum disorders. School staff from many different disciplines attend the trainings including special education teachers, directors of special education, regular education teachers, paraprofessionals, occupational and physical therapists, social workers, psychologists and speech and language pathologists. Each of these trainings includes strategies for preventing suspensions and expulsions, obtaining a diploma, and increasing the graduation rates of students with autism.	X	X	X	X	X	X	X	X	Autism Grant Consultant
4 C	Behavior Grant, https://dpi.wi.gov/sped/program/emotional-behavioral-disability Wisconsin school districts and CESAs cite student behavior as a high priority for staff development; new teachers report that classroom management is an area in which they feel least prepared. This IDEA statewide grant focuses on providing Wisconsin school district staff with the skills needed to successfully manage student behaviors in the classroom, particularly disruptive and aggressive student behaviors so that students stay in school and graduate. 	The Children Come First (CCF) Advisory Committee is established in state statute and is a cabinet-level committee with members appointed by the Secretary of the Department of Health and Family Services. In its ninth year of operation, this council is committed to improving services for children with severe emotional disturbance. Its vision is to create a comprehensive, flexible array of services and natural supports ensuring that children with SED remain with their families and in the community. Its primary role is to provide counsel and oversight to these programs. The Assistant State Superintendent of the Division for Learning Support: Equity and Advocacy and the State Director of Special Education serve on this council. Children from all parts of the state are served through integrated services projects.									Superintendent of the Division for Learning Support: Equity and Advocacy State Director of Special Education
4 C D E F G H I	Culturally Responsive Education for All: Training and Enhancement (CREATE). Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	System (CIFMS) to achieve positive results for children with disabilities in Wisconsin while ensuring continued procedural compliance with state and federal laws and regulations. WDPI involves stakeholders in the ongoing development of CIFMS including the identification of priority areas for focused monitoring in Wisconsin. The CIFMS stakeholders analyzed statewide student outcome data to determine that improving graduation rates of students with disabilities should be a priority in Wisconsin. The CIFMS stakeholders identified student enrollment groups within the state from which a select number of school districts are identified for FM. WDPI uses trend data over a three-year period to identify districts for FM. The districts within each enrollment group most in need of improvement are selected for FM.									
4 B D	Focused Performance Reviews WDPI in collaboration with CESAs #7 and #5 developed the Special Education Data Retreat Model to provide a unique, structured forum where collaborative teams of special educators, administrators, along with regular educators evaluated their systems for design and delivery of special education and related services. Focused data analysis enables educators to identify potential root causes of the low graduation rate, leading toward the development of school/district plans to address identified needs and improve student outcomes. Some of the data analyzed includes graduation, dropout, suspension, expulsion, participation and performance on statewide assessments, and educational environments. Data is disaggregated by disability area, gender, and race/ethnicity whenever it is available. Statewide training was provided to give all Wisconsin school districts the opportunity to analyze their own data by a collaborative staff team, to identify areas of need based on the data analysis, and to work towards a plan to address those needs building/district wide. To accomplish this statewide training, a "Train the Trainers" model was used. A two-day facilitated training was conducted for all Regional Service Network (RSN) directors and school improvement service (SIS) directors in the state. A model set of data was used for training purposes. After the RSN and SIS directors were trained, each CESA conducted trainings for its own school districts. Two follow-up meetings were conducted to provide support and technical assistance to those responsible for conducting special education data	X	X	X	X	X	X	X	X	Data Consultant Graduation Workgroup Reading Achievement Workgroup

4 A B C D F H	<p>Linguistically Culturally Diverse (LCD) II Populations: American Indian and Spanish Speaking</p> <p>The original Linguistically Culturally Diverse (LCD) guides were written as companion guides to the publication <i>Language Sample Analysis (LSA), the Wisconsin Guide</i>. LSA was first published in 1992 and then revised and updated in 2005. The LCD companion guides were added to provide speech language pathologists (SLPs) a process to differentiate a language disorder from a language difference. Given the cultural bias within most formal measures, the LSA was expanded to document current language status in English or three other languages and their dialects. These included Spanish, Hmong and African American.</p> <p>The LCD workgroup reviewed the LCD guides in August of 2009 to determine if the material could be utilized not only for SLPs but also for general educators to address over identification of various minority students in special education. LCD I was published in 1997) and LCD II was published in 2003.</p> <p>The workgroup found the guides to contain outdated terminology regarding the various cultures described in the guides. This language was determined to be insulting in today's environment. As a result the guides were removed from publication sales. However, it was determined that the information regarding language, dialects and sound system of typically developing English Language Learners from the various populations identified was a continued need. As a</p>					X	X	X	X	<p>Special education team staff</p> <p>Content and Learning team staff</p> <p>Outside experts</p>

4 A	<p>The Local Performance Plan (LPP) http://sped.dpi.wi.gov/sped_lpp</p> <p>Each school year, all Wisconsin LEAs, including charter schools, complete and submit an annual LPP to the WDPI for review. The LPP is an internet application and is the IDEA flow-through and preschool funding mechanism that must be completed in approvable form before a district may encumber and expend federal monies. Through the LPP, districts submit their IDEA flow-through and preschool budgets and provide assurance to WDPI of compliance with state and federal special education requirements. Districts are required to analyze their performance on specified indicators in the SPP, and develop and submit improvement activities for those indicators for which a district does not meet the established targets. The LPP is reviewed by a WDPI consultant assigned to work with the individual LEA.</p> <p>One component of the LPP is the Special Education District Profile, through which WDPI reports annually to the public on the performance of each LEA on the targets associated with Indicators #1-#14. The Special Education District Profile is used to analyze LEA performance on each of the indicators in the State Performance Plan (https://dpi.wi.gov/sped/educators/local-performance-plans-profile).</p> <p>The Special Education District Profile includes LEA data, state data, the target for each indicator, data sources for each indicator, and a link to more information about each indicator.</p>	X	X	X	X	X	X	X	X	<p>Data Coordinator</p> <p>Data Consultant</p> <p>Grants Specialist</p> <p>LPP Consultant</p>

	<p>needs; goal setting; selecting content and designing professional development to address identified needs; providing training and learning opportunities, collaboration and implementation; and ongoing data collection and program evaluation. This model reflects the National Staff Development Council's standards for staff development (http://www.nsdc.org/index.cfm) and the Wisconsin Educator Standards (http://dpi.wi.gov/tepd/watsnew.html).</p> <p>Chapter PI 34, Wisconsin Administrative Code, the Wisconsin's Quality Educator Initiative, has established standards for teachers, administrators, and pupil services professionals in Wisconsin. One of the requirements to receive a license as a teacher, administrator, or pupil services professional is that an applicant demonstrate proficient performance in knowledge, skills, and dispositions. One way teachers may renew their license is by successfully completing a professional development plan. The RSN assists teachers, administrators, and pupil services professionals in meeting these standards.</p>									
4 C D F	<p>Resource and Planning Guide for School-Based Occupational Therapy and Physical Therapy</p> <p>The Department of Public Instruction created a book to explain how occupational therapists and physical therapists collaborate with educators, administrators, and parents to support the mission of education in the environment of the schools. This book answers questions about who occupational therapists and physical therapists are, what their purpose is in schools, and how, working with educators and parents, they help Wisconsin's children acquire the skills and knowledge they need to participate alongside other children in school and, eventually, assume positive adult roles in the community.</p>					X	X			OT Consultant PT Consultant Planning Group
4	<p>School Improvement: Focused Review of Improvement Indicators (FRII)</p> <p>During the 2007-08 SY, WDPI began working to expand upon the successful focused monitoring model previously utilized to provide districts a mechanism for conducting a similar process of data analysis and improvement planning around the SPP improvement indicators of math achievement, preschool outcomes, parent involvement, and post-high school outcomes. WDPI will also be working with CESA based Regional Service Network (RSN) providers to</p>					X	X	X	X	Data Consultant Graduation Workgroup Reading Achievement

4 B C G	<p>Schools Identified for Improvement (SIFI)/Districts Identified for Improvement (DIFI)</p> <p>Wisconsin's Statewide System of Support (SSOS) is predicated on the concept that the role of the WDPI is to strengthen the capacity of local school districts to identify and effectively differentiate support to their lowest performing schools. To accomplish this, the WDPI has sorted each of its 426 public school districts into one of three categories: high priority districts, priority districts, and all other districts. High priority districts are those which have missed Adequate Yearly Progress (AYP) as a district or been identified as a district in need of improvement (DIFI) and have Title I schools that are identified for improvement (SIFI) or missed AYP under No Child Left Behind (NCLB).</p> <p>In Wisconsin, high priority districts are required to assess the efficacy of their current district efforts to support school improvement using the 7 Characteristics of Successful Districts (Vision, Leadership, High Academic Standards, Standards of the Heart, Family, School and Community Partnerships, Professional Development, and Evidence of Success, http://www.dpi.state.wi.us/cssch/cssovrvw1.html) framework or a comparable model. Using five characteristic areas (1. Vision, Values and Culture; 2. Leadership and Governance; 3. Decision Making and Accountability; 4. Curriculum and Instruction; and 5. Professional Development and Staff Quality, http://www.dpi.state.wi.us/ssos/pdf/dsahandbk.pdf), a team of district staff members conduct a Self-Assessment to evaluate the level and effectiveness of district support to high priority schools. The results of the self-assessment are validated by a team of exemplary educators through an onsite peer review process. The peer review is meant to validate and add to the findings of the</p>	X	X	X	X	X	X	X	X	<p>Title I Team</p> <p>Special Education Team's Graduation Workgroup</p> <p>Special Education Team's Reading Achievement Workgroup</p>

	<p>self-assessment. As a result of these two processes, the WDPI determines which school improvement strategies are working well for the district and where the district is in need of technical assistance to improve the effectiveness of its support system. A plan for technical assistance and monitoring is developed collaboratively between the WDPI and the district.</p> <p>Collaboratively, the Title 1 and Special Education teams of WDPI worked with the Milwaukee Public Schools to create their DIFI improvement plan in Fall of 2007. Using the findings from a FM visit as well as other data, specific activities were created to improve outcomes for students with disabilities in the areas of reading and math. Increased focus, resources and time were allotted to increase student achievement in these areas, Pre-kindergarten through Grade12.</p>									
4 C D	<p>Traumatic Brain Injury (TBI), http://sped.dpi.wi.gov/sped_tbi</p> <p>For the past ten years, the WDPI has directed discretionary dollars toward supporting a statewide project titled "Traumatic Brain Injury: Wisconsin's Response." This project has focused on providing statewide TBI trainings for graduate credit that permit school district staff to maintain recent training and experience in the area of TBI while fulfilling professional development plans under state requirements; establishing and maintaining a network of regionally-based TBI trainers to provide child-specific training, consultation, and technical assistance to district staff locally; establishing linkages with state teacher education institutions; and developing and updating training materials and resource kits for distribution to the field. The specific intent of each of these efforts has been to provide Wisconsin school district staff with the information and skills they need to successfully address the unique learning and behavioral needs of children with a TBI, thus increasing graduation rates, reducing drop-outs, and reducing suspension and expulsion rates for behaviors due to TBI.</p> <p>The TBI project ended June 30, 2008. The WDPI continues to support the regionally based TBI trainers through twice yearly program support teacher meetings. WDPI also has an appointed member on the Governor's Brain Injury</p>	X	X	X	X					TBI Consultant

	Advisory Council.									
4 C D	<p>Wisconsin Assistive Technology Initiative (WATI), (http://www.wati.org/) WATI is a nationally recognized initiative whose mission is to ensure that every child in Wisconsin who needs assistive technology (AT) has equal and timely access to an appropriate evaluation and the provision and implementation of any needed AT devices and services. The primary goal of the initiative is to improve outcomes and results for children and youth with disabilities through the use of assistive technology to access services, school programs and curriculum, and community activities. As a result, activities carried out by the initiative have a positive impact on graduation rates, drop-out rates, and suspension/expulsion rates.</p> <p>WATI is designed specifically to increase the capacity of school districts to provide AT services by making training and technical assistance available to teachers, therapists, administrators, and parents throughout Wisconsin. It accomplishes this by providing not only training and direct technical assistance but also specific strategies to increase the capacity of school districts to provide AT services. These include the development and dissemination of model forms, AT assessment manuals, recommended evaluation procedures, resource guides and other materials, and access to AT for trial use.</p> <p>WATI has both state-level services and regional services. Regional services are provided by 12 assistive technology consultants located in each of the 12 CESA regions in the state. Activities carried out at the state level include providing support and leadership to the regional AT consultants, providing specialized competency-based training, developing and conducting specialized summer institutes, developing resource guides or other materials for use by school personnel and parents, and arranging special buys of AT products at reduced prices. In addition, a state-level lending library of AT items that is open to all school districts is maintained.</p> <p>In each CESA, the assistive technology consultants work with staff from the constituent school districts to help them develop and improve their AT services.</p>	X	X	X	X					WATI Grant Consultant

	These regional AT consultants provide training, technical assistance, and support to increase the capacity of school districts to provide effective and efficient AT services. They also have smaller lending libraries of AT available to their school districts.									
4 A C D	<p>WDPI Disproportionality Institute</p> <p>Annually, WDPI sponsors an institute on addressing disproportionality for districts identified with over-representation. The first half of the institute is for a general audience that includes representatives from LEAs, parents, stakeholders and WDPI staff. Districts identified with disproportionate over-representation are required to bring to the institute teams comprised of general and special education staff. Keynote speakers at the institute have included Beth Harry and Janette Klingner, co-authors of the book "Why Are So Many Minority Students in Special Education?"; Shelley Zion, Project Coordinator for NCCRESt; Allen Coulter, then Director of the National Center for Special Education Accountability Monitoring (NCSEAM); and Dan Losen, Senior Legal and Policy Research Associate for the Harvard Civil Rights Project. Presentations were given on national and local efforts, initiatives, and issues involved in understanding, identifying, and addressing racial disproportionality.</p> <p>The second half of the institute is for a targeted audience comprised of teams from districts identified with significant disproportionality and representatives from each of the 12 cooperative educational service agencies (CESAs). Department liaisons work with the district teams to analyze data and develop improvement plans. In addition to assistance from department staff, assistance is provided by national experts (i.e., Dan Losen and representatives from NCCRESt, the Equity Alliance at Arizona State University, North Central Regional Resource Center, and the Access Center). Following the institute, districts submit an evaluation and improvement plan. The department liaison provides ongoing technical assistance with implementation of the plan. This may include onsite visits, conference calls, and other support as required. The department liaison also conducts progress monitoring, including both reviewing data and implementation of the plan.</p>	X	X	X	X	X	X			<p>Disproportionality Workgroup</p> <p>NCCRESt, North Central Regional Resource Center</p> <p>The Access Center</p>

	WDPI's positive approach to addressing issues of disproportionality paired with individualized technical assistance based on each districts' needs has resulted a general sense of acceptance and willingness on the part of most districts, to reflectively analyze data and commit to examining issues that may contribute to disproportionality. This attitude of ownership is reflected in the development and implementation of district improvement plans and initiatives.									
4 A C D E	<p>WDPI Disproportionality Workgroup</p> <p>WDPI commits significant staff time and resources to addressing disproportionality. WDPI's workgroup to address disproportionality consists of 11 staff members. These staff members serve as liaisons to identified districts. The workgroup also consists of cross-agency staffs that serve in an advisory capacity and assist with providing technical assistance.</p> <p>WDPI provides on-going targeted technical assistance and conducts monitoring activities if districts are identified as having disproportionate representation (both under-representation and over-representation) that is a result of inappropriate identification. WDPI also provides general technical assistance to other districts within the state and other pertinent stakeholders.</p> <p>WDPI has established a disproportionality webpage (sped.dpi.wi.gov/sped_spp-disp) that provides information and resources for all districts, but is especially beneficial to districts that have been identified as having significant disproportionality.</p>	X	X	X	X	X	X	X	X	Disproportionality Workgroup
4 A B E	<p>Wisconsin DPI Graduation Rate Workgroup</p> <p>In preparation for the peer review of Wisconsin's graduation rate by the US Department of Education, a cross-agency workgroup has been convened. The purpose of the workgroup is to compile necessary information about how Wisconsin DPI collects, analyzes, and utilizes graduation rate data. Currently, the group has completed collection of information to submit to the US Department of Education for peer review in January 2010.</p> <p>The group has expanded as the agency works to develop continuous and substantial targets for graduation rates, including for students with disabilities.</p>					X	X			FM Graduation Chair

	Group members will be working on the development of new data displays, dissemination of information about the graduation data, and eventual professional development for districts and interested stakeholders.									
4 C D E F	Wisconsin Graduation Summit In response to a national call to improve student graduation rates, Wisconsin State Superintendent Anthony Evers convened a one day state summit of local teams with the theme "Every Child a Graduate" in the Spring of 2010. The design and delivery of the Summit was based on guidance and support from the America's Promise Alliance, national corporations, and state associations. The purpose of the Summit is to build local capacity by sharing best practice strategies that increase graduation rates, especially among students of color and students with disabilities. Districts invited to attend were selected based on high rates and/or disparities in dropouts. A related summit was held in Milwaukee by the Milwaukee School District following the state Summit. Both summits required participants to develop plans on how to sustain the momentum and continue exploration of the issues and strategies that can be used to ensure all Wisconsin students graduate. Districts are encouraged to collaborate with community partners, and DPI hopes to convene subsequent meetings to provide support and information about research-based practices either at a state-wide or regional level. 4 C G	<p>Wisconsin Statewide Parent-Educator Initiative (WSPEI), (http://sped.dpi.wi.gov/sped_parent)</p> <p>The WSPEI is a WDPI state discretionary project that serves parents, educators, and others interested in parent-educator partnerships for children with disabilities. Two statewide coordinators and 27 CESA-based parent liaisons collaborate with LEA staff, more than 150 LEA-based parent liaisons, staff from the Wisconsin Family Assistance Center (WI FACETS), and the statewide Parent Training and Information Centers (PTIC) to facilitate positive relationships between staff and parents of children with disabilities.</p> <p>Wisconsin schools and families use the resources of WSPEI and WI FACETS to assist them in reaching out to involve families and provide information about special education in the various ways that diverse families require. WSPEI and WI FACETS work together closely, holding bimonthly collaboration meetings that include a Special Education administrator from the Milwaukee Public Schools. CESA and district parent liaisons from WSPEI also collaborate regionally and locally with WI FACETS staff and parent leaders. WSPEI's unique contribution to this collaborative structure is that parent liaisons are parents of children with disabilities, selected and hired by LEAs and CESAs to work within LEAs to promote parent involvement. WI FACETS' unique contribution is their focus on minority and underserved families, providing outreach and training to Wisconsin's communities of Native American, African American, Latino, and Hmong families. Both projects provide parent leadership on advisory committees and workgroups of WDPI's other major technical assistance initiatives. Because of this, WDPI is able to disseminate parent training and parent-focused materials that are consistent with training and materials provided to school staff. In addition, technical assistance initiatives model family-school partnerships and facilitate co-presentation by an educator and parent to combined audiences.</p>	X	X	X	X	X	X	X	X	WSPEI Grant Consultant

| E) Clarify/examine/develop policies & procedures | J) Other |

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: FAPE in the LRE

Indicator 5: Percent of children with IEPs aged 6 through 21:

- A. Inside the regular class 80% or more of the day;
- B. Inside the regular class less than 40% of the day; and
- C. In separate schools, residential facilities, or homebound/hospital placements

(20 U.S.C. 1416(a)(3)(A))

Measurement:

- A. Percent = [(# of children with IEPs served inside the regular class 80% or more of the day) divided by the (total # of students aged 6 through 21 with IEPs)] times 100.
- B. Percent = [(# of children with IEPs served inside the regular class less than 40% of the day) divided by the (total # of students aged 6 through 21 with IEPs)] times 100.
- C. Percent = [(# of children with IEPs served in separate schools, residential facilities, or homebound/hospital placements) divided by the (total # of students aged 6 through 21 with IEPs)] times 100.

Overview of Issue/Description of System or Process:

When calculating the amount of time a child with a disability is removed from the regular classroom, LEAs must be aware that removal from the regular class is not the same concept as the amount of special education a child receives according to his or her individualized education program (IEP). The WDPI established an internal workgroup to provide training on this distinction and to ensure the accurate reporting of environment code data by LEAs.

Procedures to Ensure Accuracy of Environment Data:

The WDPI's Federal Student Data Report (child count) is used to collect individual student records and complete Table 1 and Table 3 of the federal data reports submitted to OSEP. A new internet application was launched in 2002 to replace the diskette collection system. This application was designed to improve the accuracy and efficiency of the data collection for the federal reports. It has proven popular with local educational agencies (LEAs) and has eliminated common problems inherent in the old diskette system.

Beginning in 2005-06 SY, WDPI's Individual Student Enrollment System (ISES) formed the basis of the Child Count, FAPE, and Exiting Special Education data reports submitted to OSEP. ISES collects individual student records for all students (students with and without disabilities) using a

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

unique student identifier (number). This system is designed to improve the accuracy and efficiency of the federal data collection. This system allows students to be tracked over time and for like comparisons to be made for students with and without disabilities. ISES was first used for collecting the Exiting Special Education data during the 2005-06 SY and for the Child Count and FAPE data during the 2007-08 SY.

Each year, WDPI staff offer training on federal data collection at inservice meetings sponsored by software vendors. Hundreds of LEA staff from across the state attend the trainings. Annually, WDPI staff review and update directions and software for the Federal Student Data Report and post it to the special education team and the Individual Student Enrollment System data elements websites.

Baseline Data for FFY 2004 (2004-2005):

Environment Ages 6-21

	Student Count	Total Students	Percent
Inside the regular class 80% of the day	55,991	113,225	49.45%
Inside the regular class less than 40% of the day	13,813	113,225	12.20%
In separate schools, residential facilities, or homebound/hospital placements	1,636	113,225	1.44%

Data Source: Federal Student Data Report

Discussion of Baseline Data:

During the 2004-05 school year, nearly half (49.45%) of all children with disabilities ages 6 to 21 were educated for the majority of the school day with their nondisabled peers, the least restrictive environment (LRE) on the continuum of placement options.

As stakeholders analyzed trend data, they noted an increase in the number of children served in the least restrictive environment. Only 43.2% of the students counted on December 1, 2000, were educated for the majority of the school day with their nondisabled peers compared to 49.45% in 2004. This change represents an increase of nearly 6.25% over the last four years in the number of students receiving special education and related services in the least restrictive environment. If trends continue, the number of children served in the least restrictive environment will improve to 60% in 2010-2011.

During the 2004-05 school year, 13.64% of children with disabilities received special education and related services in either separate facilities (served in public or private separate schools, residential placements, or homebound or hospital placements) or were removed from the regular class more than 60% of the day (12.20% plus 1.44% equal 13.64%). This number is also an improvement from the December 1, 2000, total of 16.35% for the same two categories. Thus, the number of children who received special education and related services in the most restrictive placements declined over time by approximately 2.71%.

It should be noted that the chart above does not include an analysis of the number of children with disabilities removed from the regular class 21% to 60% of the day. 36.91% of children with disabilities receive special education and related services in the regular classroom between 21% and 60% of the day (100% minus 49.45% in the least restrictive categories from the table above minus 13.64% in the last two categories in the table above equals 36.91%).

5 A B C	Academy for New Special Education Leadership An academy for personnel new to special education leadership positions was developed. The purpose of this professional development opportunity is to increase the knowledge, skills, and dispositions of new directors of special education regarding current special education issues, including the SPP Indicators.				X	X	X	X	X	WDPI Special Education Team
5 B D E F H	Assistive Technology Lending Center (ATLC) The Assistive Technology Lending Center project is a vehicle in which the DPI will improve the outcomes for students with disabilities through the provision of high end assistive technology (AT) equipment in the area of Alternate and Augmentative Communication (AAC) purchased by the state for loan to school districts to use with students at no cost. High-end alternative and augmentative communication assistive technology equipment is defined as equipment with a unit cost of \$6,000 or more. The center will be available to any Wisconsin LEA staff who are looking for AAC to try with a student ages 3 to 21 with an IEP or a referral for assessment.					X	X	X	X	WDPI ATLC grant liaison and CESA 2 lending center staff
5 C D F	Autism Project, https://dpi.wi.gov/sped/program/autism For more than ten years, WDPI has developed and conducted statewide trainings for school staff in the area of autism. Four trainings are held annually in various locations throughout the state. Basic level trainings are offered for school staff with limited knowledge of educational programming for students with autism spectrum disorders. The basic level training presents an overview of autism spectrum disorders and discusses topics such as functional behavioral assessment, classroom programming, sensory issues, and communication strategies. Advanced level trainings are offered for more experienced school staff. The advanced training presents more complex information about issues in early childhood education of students with autism spectrum disorders. School staff from many different disciplines attend the trainings including special education teachers, directors of special education, regular education teachers, paraprofessionals, occupational and physical therapists, social workers, psychologists and speech and language pathologists. Each of these trainings					X	X	X	X	WDPI Autism Consultant Contracted Experts

	includes strategies for preventing suspensions and expulsions, obtaining a diploma, and increasing the graduation rates of students with autism.									
5 C D	Circles Of Life Conference The Circles of Life Conference is a WDPI sponsored event that has been in existence for twenty-four years. The annual conference is for families who have children of any age with disabilities or special health care needs and the professionals who support and provide services for them. <i>Circles of Life</i> is a unique opportunity to develop new skills, garner the latest information, and form lasting friendships. The conference includes nationally known keynote speakers, topical sectionals, parent listening sessions, family fun night, roundtable discussions on such topics as individualized service plans and serving adolescents with Asperger's Syndrome through social-communication intervention.	X	X	X	X	X	X	X	X	Parent Involvement Consultant
5 C D G	Creating the Good Life: Improving Outcomes for Students with Cognitive Disabilities The First Annual State-wide Conference for educators working with students with cognitive disabilities was held on August 10-21, 2007 to address issues and current trends regarding inclusive practices. This conference is cosponsored by the Department of Public Instruction, Wisconsin's 12 Cooperative Educational Service Agencies and the University of Wisconsin-Oshkosh. The conference has provided educators with a variety of relevant topics including: Using Dance & Creative Movement to Enhance Instruction in Inclusive Classrooms; Inclusive Practices: Determining Where We Belong; Stories of Elementary Inclusion; Fostering Belonging and Friendships; Friendships with Non-Disabled Peers; Unlocking Opportunities for Students with Cognitive Disabilities; and Developing Best Practice Goals: Blending Transition, Post School Outcomes and General Education for Students with Disabilities. 5 A C D	Data Verification Workgroup WDPI created a Data Verification Workgroup to ensure the accuracy of educational environment data. The Data Verification Workgroup has developed, with the assistance of the National Center on Special Education Accountability and Monitoring (NCSEAM) staff, a data verification protocol to monitor the accurate reporting of school-age environment data. The workgroup conducts data	X	X	X						Data Verification Workgroup

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	<p>verification activities in local education agencies using the protocol. A procedures manual for LEA data verification includes criteria for selection of districts for onsite monitoring.</p> <p>WDPI develops training materials to ensure districts accurately report early childhood and school-age environment codes. Online training (including a Powerpoint presentation) for LEAs stresses the importance of data accuracy and provides examples of how to accurately determine environment codes (http://dpi.wi.gov/sped/cc_data.html). This training is updated on a regular basis.</p> <p>The workgroup expanded its verification efforts to include the LEA's data management systems. First, it modified and adapted the Appendix B Verification questions from OSEP's continuous improvement and focused monitoring system (CIFMS) accountability manual to use at the LEA level. As a result of piloting this tool in local educational agencies, WDPI made further modifications to provide a more concise means of understanding the LEA's data management systems. The process also provides the LEA with a natural starting point to develop an improvement plan.</p> <p>To ensure accurate reporting of environment data, the Data Verification Workgroup worked collaboratively with the WDPI Procedural Compliance Workgroup to develop a worksheet to be used by LEAs in conjunction with the state's model IEP forms. This worksheet provides technical assistance to LEAs in calculating and documenting environment codes for submission on the Federal Student Data Report.</p>									
5 B D	<p>Focused Performance Reviews</p> <p>WDPI in collaboration with CESAs #7 and #5 developed the Special Education Data Retreat Model to provide a unique, structured forum where collaborative teams of special educators, administrators, along with regular educators evaluated their systems for design and delivery of special education and related services. Focused data analysis enables educators to identify potential root causes of the low graduation rate, leading toward the development of school/district plans to address identified needs and improve student outcomes.</p>		X	X	X	X	X	X	X	<p>Data Consultant</p> <p>Graduation Workgroup</p> <p>Reading Achievement Workgroup</p>

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	Some of the data analyzed includes graduation, dropout, suspension, expulsion, participation and performance on statewide assessments, and educational environments. Data is disaggregated by disability area, gender, and race/ethnicity whenever it is available. Statewide training was provided to give all Wisconsin school districts the opportunity to analyze their own data by a collaborative staff team, to identify areas of need based on the data analysis, and to work towards a plan to address those needs building/district wide. To accomplish this statewide training, a "Train the Trainers" model was used. A two-day facilitated training was conducted for all Regional Service Network (RSN) directors and school improvement service (SIS) directors in the state. A model set of data was used for training purposes. After the RSN and SIS directors were trained, each CESA conducted trainings for its own school districts. Two follow-up meetings were conducted to provide support and technical assistance to those responsible for conducting special education data retreats. This data analysis component was further refined and integrated into Wisconsin's FM process as a beginning point for districts selected for FM and renamed the Focused Performance Review (FPR). Data continues to be disaggregated by disability area, and race/ethnicity whenever available.									
5 A D J	High Cost Initiative As part of the Keeping the Promise initiative, the state superintendent set aside High-Cost Special Education Aid funds (IDEA discretionary dollars) to reimburse Wisconsin schools for services to children with severe disabilities. Eligible students are those ages 3-21 who have been determined by an IEP team to have impairment and a need for special education and who because of the severity of their disabilities require multiple and/or high cost special education services, related services, assistive technology, special adaptive equipment needs, etc. Due to the cost of these services, districts are under extraordinary financial pressure. Some of the children and youth served under this initiative include those with hearing impairments, cognitive disabilities, physical impairments, autism, emotional/behavioral disorders, traumatic brain injury and other health impairments. The high-cost funds enabled schools to place and serve those with severe disabilities in their local school districts.	X	X	X	X	X	X	X	X	3 Special Education Team Consultants

5 B C D	Least Restrictive Environment (LRE) and Separate Schools During the 2008-09 school year, WDPI focused on monitoring placement in separate schools for students with disabilities. There are three separate schools for students with significant disabilities in Wisconsin. During the 2008-09 WDPI selected a random sample of students attending these schools and reviewed their IEPs to see how IEP teams documented their discussions about LRE placement at the separate schools. Technical Assistance was provided to each of the separate schools.				X	X	X			WDPI Education Consultants
5 A	The Local Performance Plan (LPP) https://dpi.wi.gov/sped/educators/local-performance-plans Each school year, all Wisconsin LEAs, including charter schools, complete and submit an annual LPP to the WDPI for review. The LPP is an internet application and is the IDEA flow-through and preschool funding mechanism that must be completed in approvable form before a district may encumber and expend federal monies. Through the LPP, districts submit their IDEA flow-through and preschool budgets and provide assurance to WDPI of compliance with state and federal special education requirements. Districts are required to analyze their performance on specified indicators in the SPP, and develop and submit improvement activities for those indicators for which a district does not meet the established targets. The LPP is reviewed by a WDPI consultant assigned to work with the individual LEA. One component of the LPP is the Special Education District Profile, through which WDPI reports annually to the public on the performance of each LEA on the targets associated with Indicators #1-#14. The Special Education District Profile is used to analyze LEA performance on each of the indicators in the State Performance Plan (https://dpi.wi.gov/sped/educators/local-performance-plans-profile). The Special Education District Profile includes LEA data, state data, the target for each indicator, data sources for each indicator, and a link to more information about each indicator. 	assistance and coordinate professional development to help Wisconsin school districts establish and sustain PBIS within their respective schools. In addition, the project will gather and analyze specific data from all schools utilizing PBIS services.									
5 B	<p>Procedural Compliance Self-Assessment Process</p> <p>Each year the state gathers monitoring data from one-fifth of the LEAs in the state through an LEA self-assessment of procedural requirements related to monitoring priority areas and SPP indicators. LEAs conduct the self-assessment using a sample of student individualized education program (IEP) records. Each year, the cohort of districts are representative of the state considering such variables as disability categories, age, race, and gender. Milwaukee Public Schools, the only LEA with average daily membership of over 50,000, is included in the sample each year. WDPI will include every LEA in the state at least once during the course of the SPP. The self-assessment of procedural requirements includes data on each of the SPP indicators LEAs report the self-assessment results to WDPI, along with planned corrective actions. LEAs are required to correct noncompliance as soon as possible, but no later than one year from identification.</p> <p>To assure valid and reliable data, WDPI provides web-based training in how to conduct the self-assessment, including how to create random samples for review. The self-assessment checklist includes standards for reviewing the procedural requirements. Information about the self-assessment is posted on the WDPI website at http://sped.dpi.wi.gov/sped_spp-selfassmt. LEAs with noncompliance correct it through developing and implementing agency-wide corrective action plans. WDPI staff provide technical assistance and conduct periodic reviews of progress to ensure correction of noncompliance as soon as possible, but no later than one year from identification of noncompliance. WSTI provides training to assist with the correction of noncompliance of transition requirements.</p> <p>Annually, WDPI reviews all LEA self-assessments and conducts validation activities on a portion of the LEA self-assessments. Based on its review, WDPI</p>		X	X	X	X	X	X	X	Procedural Compliance Workgroup LPP Consultants

State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	provides technical assistance to LEAs, which may result in revisions to their planned corrective actions. LEAs report the status of their corrective actions to ensure correction within one year of identification of the noncompliance. WDPI verifies that all noncompliance has been corrected within one year. LEAs failing to correct noncompliance within one year of identification are required to report the reasons and the specific steps that will be implemented to correct the noncompliance. These LEAs are assigned to a more intensive level of oversight.									
5 C D	Program Support Teacher Meetings Each year, the program consultants on the Special Education Team design and host program support meetings for interested stakeholders, including parents, school district staff, educational administration, paraprofessionals, and higher education faculty. The overarching goal of these program support meetings is to disseminate innovative information and current resources to the field. At these meetings, program consultants typically present information and training aimed at reducing the graduation gap and dropout rates. Specific topics include research-based strategies to increase student engagement, establish a positive school climate, increase options for student learning, and enhance staff knowledge and skills. These opportunities will continue in future years.						X	X	X	Program Area Consultants
5 C D	Resource and Planning Guide for School-Based Occupational Therapy and Physical Therapy The Department of Public Instruction created a book to explain how occupational therapists and physical therapists collaborate with educators, administrators, and parents to support the mission of education in the environment of the schools. This book answers questions about who occupational therapists and physical therapists are, what their purpose is in schools, and how, working with educators and parents, they help Wisconsin's children acquire the skills and knowledge they need to participate alongside other children in school and, eventually, assume positive adult roles in the community. 5 C D	<p>Wisconsin Assistive Technology Initiative (WATI), (http://www.wati.org/)</p> <p>WATI is a nationally recognized initiative whose mission is to ensure that every child in Wisconsin who needs assistive technology (AT) has equal and timely access to an appropriate evaluation and the provision and implementation of any needed AT devices and services. The primary goal of the initiative is to improve outcomes and results for children and youth with disabilities through the use of assistive technology to access services, school programs and curriculum, and community activities. As a result, activities carried out by the initiative have a positive impact on graduation rates, drop-out rates, and suspension/expulsion rates.</p> <p>WATI is designed specifically to increase the capacity of school districts to provide AT services by making training and technical assistance available to teachers, therapists, administrators, and parents throughout Wisconsin. It accomplishes this by providing not only training and direct technical assistance but also specific strategies to increase the capacity of school districts to provide AT services. These include the development and dissemination of model forms, AT assessment manuals, recommended evaluation procedures, resource guides and other materials, and access to AT for trial use.</p> <p>WATI has both state-level services and regional services. Regional services are provided by 12 assistive technology consultants located in each of the 12 CESA regions in the state. Activities carried out at the state level include providing support and leadership to the regional AT consultants, providing specialized competency-based training, developing and conducting specialized summer institutes, developing resource guides or other materials for use by school personnel and parents, and arranging special buys of AT products at reduced prices. In addition, a state-level lending library of AT items that is open to all</p>	X	X	X	X					WATI Grant Consultant

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: FAPE in the LRE

Indicator 6: Percent of children aged 3 through 5 with IEPs attending a:

- A. Regular early childhood program and receiving the majority of special education and related services in the regular early childhood program; and
- B. Separate special education class, separate school or residential facility.

(20 U.S.C. 1416(a)(3)(A))

Measurement:

- A. Percent = $\left[\frac{\text{\# of children aged 3 through 5 with IEPs attending a regular early childhood program and receiving the majority of special education and related services in the regular early childhood program}}{\text{total \# of children aged 3 through 5 with IEPs}} \right] \times 100$.
- B. Percent = $\left[\frac{\text{\# of children aged 3 through 5 with IEPs attending a separate special education class, separate school or residential facility}}{\text{total \# of children aged 3 through 5 with IEPs}} \right] \times 100$.

Overview of Issue/Description of System or Process:

Annually on October 1, the Wisconsin Department of Public Instruction (WDPI) collects data on all children ages 3 through 5 receiving special education and related services under IDEA according to the educational environment in which these services were received. These data provide a measure of the extent to which children with individualized education programs (IEPs) who receive special education and related services are educated in settings with typically developing peers. Educational environment data for children ages 3 through 5 are reported by age, disability, race/ethnicity, gender, and limited English proficiency status. LEAs use decision rules to determine the appropriate educational environment category for reporting each 3 through 5-year old. Selection of the appropriate reporting category involves a multi-step process: identifying the type of program the child attends (regular or special education), if any; identifying the number of hours per week in attendance at a regular early childhood program (at least 10 hours), if applicable; then identifying the setting in which the child receives the majority of special education and related services (see training materials on Indicator 6 webpage at http://sped.dpi.wi.gov/sped_spp-environmt).

Procedures to Ensure Accuracy of Environment Data:

The Individual Student Enrollment System (ISES) is the electronic data system used by WDPI to collect the Child Count from local educational agencies. ISES collects individual student records for all students (students with and without disabilities) using a unique student identifier (number). This system is designed to improve the accuracy and efficiency of the federal data collection. This system allows students to be tracked over time and comparisons to be made for students with and without disabilities. Throughout the year, WDPI offers training on accurate and timely reporting of Indicator 6 data. Online modules and other technical assistance are also provided on the department's website at http://sped.dpi.wi.gov/sped_spp-environmt.

Baseline Data for FFY 2011 (2011-2012):**Environment Ages 3-5**

	Student Count	Total Students	Percent
Regular early childhood program and receiving the majority of special education and related services in the regular early childhood program	4,989	16,106	30.98%
Separate special education class, separate school or residential facility	4,170	16,106	25.89%

Data Source: *Individual Student Enrollment System (ISES)*

Discussion of Baseline Data:

During the 2011-12 school year, 30.98% of all children with disabilities ages 3 to 5 received the majority of special education and related services in a regular early childhood program with their nondisabled peers. During the same school year, 25.89% of children with disabilities ages 3 to 5 received special education and related services in a separate class, separate school, or residential facility. These data show, approximately 5% more children are receiving special education and related services in the regular early childhood program. It should be noted the chart above does not include other early childhood environments such as home or a service provider location or other location not included in the measurement.

In January 2013, the State Superintendent's Council on Special Education met to set targets for Indicator 6 for FFY 2012. Information was provided to the Council on Indicator 6, including definitions related to the indicator, the measurements, a preschool environment code decision tree, data from the 2011-12 SY (no trend data was available), and three options for each target. Following deliberations, the stakeholders chose the most rigorous options, agreeing on the following targets:

6 A B C	Academy for New Special Education Leadership An academy for personnel new to special education leadership positions was developed. The purpose of this professional development opportunity is to increase the knowledge, skills, and dispositions of new directors of special education regarding current special education issues, including the SPP Indicators.				X	X	X	X	X	WDPI Special Education Team
6 B D E F H	Assistive Technology Lending Center (ATLC) The Assistive Technology Lending Center project is a vehicle in which the WDPI will improve the outcomes for students with disabilities through the provision of high end assistive technology (AT) equipment in the area of Alternate and Augmentative Communication (AAC) purchased by the state for loan to school districts to use with students at no cost. High-end alternative and augmentative communication assistive technology equipment is defined as equipment with a unit cost of \$6,000 or more. The center will be available to any Wisconsin LEA staff who are looking for AAC to try with a student ages 3 to 21 with an IEP or a referral for assessment. 	lasting friendships. The conference includes nationally known keynote speakers, topical sectionals, parent listening sessions, family fun night, roundtable discussions on such topics as individualized service plans and serving adolescents with Asperger's Syndrome through social-communication intervention.									
6 C D G	Creating the Good Life: Improving Outcomes for Students with Cognitive Disabilities The First Annual Statewide Conference for educators working with students with cognitive disabilities was held on August 10-21, 2007 to address issues and current trends regarding inclusive practices. This conference is cosponsored by the Department of Public Instruction, Wisconsin's 12 CESAs and the University of Wisconsin-Oshkosh. The conference has provided educators with a variety of relevant topics including: Using Dance & Creative Movement to Enhance Instruction in Inclusive Classrooms; Inclusive Practices: Determining Where We Belong; Stories of Elementary Inclusion: Fostering Belonging and Friendships; Friendships with Non-Disabled Peers: Unlocking Opportunities for Students with Cognitive Disabilities; and Developing Best Practice Goals: Blending Transition, Post School Outcomes and General Education for Students with Disabilities. 6 A B D F H	Data Collection and Analysis Enhancing quality of data has been an emphasis of the State. The Statewide Preschool Environments Coordinator works with MPS and Early Childhood Special Education PSTs to ensure Preschool Environment data are accurate and submitted timely.							X	X	Statewide Preschool Environments coordinator WDPI ECSE consultant
6 A C D	Data Verification Workgroup WDPI created a Data Verification Workgroup to ensure the accuracy of educational environment data. The Data Verification Workgroup has developed, with the assistance of the National Center on Special Education Accountability and Monitoring (NCSEAM) staff, a data verification protocol to monitor the accurate reporting of environment data. The workgroup conducts data verification activities in local education agencies using the protocol. A procedures manual for LEA data verification includes criteria for selection of districts for onsite monitoring.	X	X							Data Verification Workgroup

Part B State Performance Plan (SPP) for 2005-2010

State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	<p>WDPI developed training materials to ensure districts accurately report early childhood and school-age environment codes. Online training (including a Powerpoint presentation) for LEAs stresses the importance of data accuracy and provides examples of how to accurately determine environment codes (http://dpi.wi.gov/sped/cc_data.html). This training is updated on a regular basis.</p> <p>Each year, WDPI staff offer training on federal data collection at inservice meetings sponsored by software vendors. Hundreds of LEA staff from across the state attend the trainings. Annually, WDPI staff review and update directions and software for the Federal Student Data Report and post them to the special education team and the Individual Student Enrollment System data elements websites. The workgroup expanded its verification efforts to include the LEA's data management systems. First, it modified and adapted the Appendix B Verification questions from OSEP's continuous improvement and focused monitoring system (CIFMS) accountability manual to use at the LEA level. As a result of piloting this tool in local education agencies, WDPI made further modifications to provide a more concise means of understanding the LEA's data management systems. The process also provides the LEA with a natural starting point to develop an improvement plan.</p> <p>To ensure accurate reporting of environment data, the Data Verification Workgroup worked collaboratively with the WDPI Procedural Compliance Workgroup to develop a worksheet to be used by LEAs in conjunction with the state's model IEP forms. This worksheet provides technical assistance to LEAs in calculating and documenting environment codes for submission on the Federal Student Data Report. Additional resources including a decision tree for determining the appropriate educational environment code for children ages 3 through 5 along with a Q & A document were also posted on the special education team website.</p>									
6 B D	<p>Focused Performance Reviews</p> <p>WDPI in collaboration with CESAs #7 and #5 developed the Special Education Data Retreat Model to provide a unique, structured forum where collaborative teams of special educators, administrators, along with regular educators evaluated</p>	X	X	X	X	X	X	X	X	Data Consultant Graduation Workgroup

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	their systems for design and delivery of special education and related services. Focused data analysis enabled educators to develop internal accountability leading toward the development of school/district plans to address identified needs and improve student outcomes. Some of the data analyzed includes graduation, dropout, suspension, expulsion, participation and performance on statewide assessments, and educational environments. Data is disaggregated by disability area, gender, and race/ethnicity whenever it is available. Statewide training was provided to give all Wisconsin school districts the opportunity to analyze their own data by a collaborative staff team, to identify areas of need based on the data analysis, and to work towards a plan to address those needs building/district wide. To accomplish this statewide training, a "Train the Trainers" model was used. A two-day facilitated training was conducted for all Regional Service Network (RSN) directors and school improvement service (SIS) directors in the state. A model set of data was used for training purposes. After the RSN and SIS directors were trained, each CESA conducted trainings for its own school districts. Two follow-up meetings were conducted to provide support and technical assistance to those responsible for conducting special education data retreats. This data analysis component is integrated into Wisconsin's Focused Monitoring (FM) process as a beginning point for districts selected for FM and renamed the Focus Performance Review.									Reading Achievement Workgroup
6 A D J	High Cost Initiative As part of the Keeping the Promise initiative, the state superintendent set aside High-Cost Special Education Aid funds (IDEA discretionary dollars) to reimburse Wisconsin schools for services to children with severe disabilities. Eligible students are those ages 3-21 who have been determined by an IEP team to have impairment and a need for special education and who because of the severity of their disabilities require multiple and/or high cost special education services, related services, assistive technology, special adaptive equipment needs, etc. Due to the cost of these services, districts are under extraordinary financial pressure. Some of the children and youth served under this initiative include those with hearing impairments, cognitive disabilities, physical impairments, autism, emotional/behavioral disorders, traumatic brain injury and other health impairments. The high-cost funds enabled schools to place and serve those with	X	X	X	X	X	X	X	X	3 Special Education Team Consultants

	severe disabilities in their local school districts.									
6 A B C D F G H	Interagency Agreements WDPI and WDHS have created an advisory workgroup to guide the revision of current state interagency agreements related to Part C and Part B. The plan for this work includes a meeting of primary state partners, regional focus groups to identify practice issues, and implementation and training on the revised interagency agreement. The intent is to utilize the state agreement as a template for local early intervention and early childhood special education programs to develop local agreements. The activities associated with transition between programs including referral, transition planning conferences, and development and implementation of IEP by the child's 3rd birthday are important aspects of the interagency agreements. 	above listed training and resources and assists LEAs with accurate reporting. Web-based resources used in this training are available at www.prechooloptions.org and at www.collaboratingpartners.com . A video describing community approaches to expanding preschool delivery of services options has been developed and may be viewed at http://www.wisconsinsig.org/best/video.htm .									
6 B	Procedural Compliance Self-Assessment Each year the state will gather monitoring data from one-fifth of the LEAs in the state through an LEA self-assessment of procedural requirements related to monitoring priority areas and SPP indicators. LEAs conduct the self-assessment using a sample of student individualized education program (IEP) records. Each year the cohort of districts are representative of the state considering such variables as disability categories, age, race, and gender. Milwaukee Public Schools, the only LEA with average daily membership of over 50,000, is included in the sample each year. WDPI will include every LEA in the state at least once during the course of the SPP. The self-assessment of procedural requirements includes data on each of the SPP indicators including requirements related to Indicator #6. LEAs will report the self-assessment results to WDPI, along with planned corrective actions. LEAs will be required to correct noncompliance as soon as possible, but no later than one year from identification (see Indicator #15).		X	X	X	X	X	X	X	Procedural Compliance Workgroup
6 C D	Program Support Teacher Meetings Each year, the program consultants on the Special Education Team design and host program support meetings for interested stakeholders, including parents, school district staff, educational administration, paraprofessionals, and higher education faculty. The overarching goal of these program support meetings is to disseminate innovative information and current resources to the field. At these meetings, program consultants typically present information and training aimed at reducing the graduation gap and dropout rates. Specific topics include research-based strategies to increase student engagement, establish a positive school climate, increase options for student learning, and enhance staff knowledge and skills. These opportunities will continue in future years.						X	X	X	WDPI Early Childhood Special Education Consultant

6 C	Speech and Language Pathology WDPI published Language Sample Analysis: The Wisconsin Guide Revised. The guide describes assessment, service delivery options and monitoring progress for speech and language pathology services in natural settings. In the past, the most common service delivery method for speech and language therapy was for the speech-language pathologist to work independently as they pulled students out of their regular classrooms for individual or small-group treatment sessions. With the recent emphasis on providing service in the least restrictive environment, a child's natural environment, and better generalization of treatment, the WDPI has utilized this publication to provide a framework for SLPs to assess a child in a natural setting, implement intervention and monitor intervention in contexts that provide for natural opportunities for communication or for practicing the targeted communication behavior (for example, instruction, play, large group activities, recreation and leisure, routine, vocational settings). Numerous trainings have been provided by the WDPI's speech and language consultant locally, regionally and state-wide to facilitate assessment, service delivery and data collection for students with communicative disorders in natural and least restrictive environments. 6 F G	WESP-DHH Outreach The number one identified need in Wisconsin for 200 children born per year with hearing loss and their families is increased access to appropriate intervention services provided by qualified professionals regarding the unique needs of infants, toddlers and preschoolers who have a hearing loss. Many families, statewide, cannot access services from early intervention professionals who lack resources in their communities and/or travel hours to connect with early intervention professionals who are knowledgeable about the needs of deaf and hard of hearing infants. In part, this is due to the relative low incidence of hearing loss, and the difficulty in serving a population through our current system of services provided by individual counties and/or school districts. In many cases, there is not a "critical mass" of children with hearing loss; a county or school district may only have one or two children in their program with hearing loss, which may not justify a full or even part-time staff member with the necessary training and breadth of knowledge necessary to serve this population. In addition, other factors may contribute to the lack of access to appropriate intervention services, including: 1)Lack of understanding of eligibility criteria as it applies to children with hearing loss; 2) lack of understanding and experience amongst service providers that infants and							X	X	WDPI Outreach staff

	<p>toddlers who are deaf and hard of hearing have a unique set of needs (including access to sign language and listening skills development strategies); and 3) even with enough resources to support a staff member, a void in qualified professionals that can support young children who are deaf or hard of hearing and their families.</p> <p>Because our Birth to 3 and early childhood programs are not able to consistently provide intervention services from a provider who has a broad and in-depth understanding for the needs of children with hearing loss, there is a need to provide "supports" to our current system. Parents do not have access to the critical information that will assist them in making educated decisions about educational and communication options for their child and advocating for services that will support these choices. The Guide By Your Side Program (GBYS) will support the provision of this information. In addition, while the Deaf Mentor Program (DMP) addresses the need to support families who choose sign language as a primary communication mode, WI is not currently able to provide similar in-depth support for the needs of families who choose to develop listening and spoken language skills (LSLS), thus there is a need to provide LSLS supports to families through the Home Early Listening Program (HELP).</p>									
6 A B C D E F G H	<p>Wisconsin School for the Visually Handicapped (WSVH), http://www.wcbvi.k12.wi.us/</p> <p>The Wisconsin School for the Visually Handicapped (WSVH) and the Wisconsin Center for the Blind and Visually Impaired (WCBVI) work together to serve students across the state who are blind or visually impaired. Students attending WSVH are actively involved in statewide and district-wide assessments with the appropriate accommodations. The WCBVI Outreach staff work with students who are not placed at the school to ensure adequate evaluations are completed and service is provided by the school district. There is ongoing outreach consultation with district staff. The graduation rate of students who are blind or visually impaired is similar to their sighted peers. Students receive ongoing research through transition services and are given the opportunity to work with WCBVI Outreach staff in a six-week Summer Employment Program to help prepare them for the adult world. A counselor is available at WSVH to meet with students to</p>						X	X	X	<p>WSVH Staff</p> <p>WCBVI Outreach staff</p>

	address behaviors that may lead to suspension or expulsion and help guide students in decision making. Students are given the opportunity to meet with the counselor one-on-one to help deal with other social issues.									
6 C G	<p>Wisconsin Statewide Parent-Educator Initiative, (http://sped.dpi.wi.gov/sped_parent)</p> <p>The WSPEI is a WDPI state discretionary project that serves parents, educators, and others interested in parent-educator partnerships for children with disabilities. Two statewide coordinators and 27 CESA-based parent liaisons collaborate with LEA staff, more than 150 LEA-based parent liaisons, and staff from the Wisconsin FACETS (WI FACETS) and the statewide Parent Training and Information Center, to facilitate positive relationships between staff and parents of children with disabilities.</p> <p>Wisconsin schools and Wisconsin families use the resources of WSPEI and WI FACETS to assist them in reaching out to involve families and provide information about special education in the diverse ways that diverse families require. WSPEI and WI FACETS work together closely, holding bimonthly collaboration meetings that include an MPS Special Education administrator. CESA and district parent liaisons from WSPEI also collaborate regionally and locally with WI FACETS staff and parent leaders. WSPEI's unique contribution to this collaborative structure is that parent liaisons are parents of children with disabilities, selected and hired by LEAs and CESAs to work within LEAs to promote parent involvement. WI FACETS' unique contribution is their focus on minority and underserved families, providing outreach and training to Wisconsin's communities of Native American, African American, Latino, and Hmong families. Both projects provide parent leadership on advisory committees and workgroups of WDPI's other major technical assistance initiatives. Because of this, WDPI is able to disseminate parent training and parent-focused materials that are consistent with training and materials provided to school staff. In addition, technical assistance initiatives model family-school partnerships and facilitate co-presentation by an educator and parent to combined audiences.</p>	X	X	X	X	X	X	X	X	WSPEI Grant Consultant

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: FAPE in the LRE

Indicator 7: Percent of preschool children aged 3 through 5 with IEPs who demonstrate improved:

- A. Positive social-emotional skills (including social relationships);
- B. Acquisition and use of knowledge and skills (including early language/ communication and early literacy); and
- C. Use of appropriate behaviors to meet their needs.

(20 U.S.C. 1416 (a)(3)(A))

Measurement:

Outcomes:

- A. Positive social-emotional skills (including social relationships);
- B. Acquisition and use of knowledge and skills (including early language/communication and early literacy); and
- C. Use of appropriate behaviors to meet their needs.

Progress categories for A, B and C:

1. Percent of preschool children who did not improve functioning = $[(\# \text{ of preschool children who did not improve functioning}) \div (\# \text{ of preschool children with IEPs assessed})] \times 100$.
2. Percent of preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers = $[(\# \text{ of preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers}) \div (\# \text{ of preschool children with IEPs assessed})] \times 100$.
3. Percent of preschool children who improved functioning to a level nearer to same-aged peers but did not reach it = $[(\# \text{ of preschool children who improved functioning to a level nearer to same-aged peers but did not reach it}) \div (\# \text{ of preschool children with IEPs assessed})] \times 100$.
4. Percent of preschool children who improved functioning to reach a level comparable to same-aged peers = $[(\# \text{ of preschool children who improved functioning to reach a level comparable to same-aged peers}) \div (\# \text{ of preschool children with IEPs assessed})] \times 100$.
5. Percent of preschool children who maintained functioning at a level comparable to same-aged peers = $[(\# \text{ of preschool children who maintained functioning at a level comparable to same-aged peers}) \div (\# \text{ of preschool children with IEPs assessed})] \times 100$.

Summary Statements for Each of the Three Outcomes (use for FFY 2008-2009 reporting):

Summary Statement 1: Of those preschool children who entered or exited the preschool program below age expectations in each Outcome, the percent of those preschool children who substantially increased their rate of growth by the time they turned 6 years of age or exited the program.

Measurement for Summary Statement 1:

Percent = # of preschool children reported in progress category (c) plus # of preschool children reported in category (d) divided by [# of preschool children reported in progress category (a) plus # of preschool children reported in progress category (b) plus # of preschool children reported in progress category (c) plus # of preschool children reported in progress category (d)] times 100.

Summary Statement 2: The percent of preschool children who were functioning within age expectations in each Outcome by the time they turned 6 years of age or exited the program.

Measurement for Summary Statement 2: Percent = # of preschool children reported in progress category (d) plus [# of preschool children reported in progress category (e) divided by the total # of preschool children reported in progress categories (a) + (b) + (c) + (d) + (e)] times 100.

Overview of Issue/Description of System or Process:

Since July 1, 2011, all local educational agencies (LEAs) are required to annually collect Indicator 7 Child Outcomes data for all children entering and exiting early childhood special education. Wisconsin uses the ECO Child Outcomes Summary Form (COSF) to collect data, which includes the criteria for defining “comparable to same-aged peers” as a child who has been assigned a score of 6 or 7 on the COSF. Assessments are conducted by a team that includes the child’s parents, teachers, and others supporting the child in daily routines in typical environments. Data is gathered about how a child is functioning in everyday routines and settings; ongoing assessment of a child’s level of functioning is compared to same-age peers; and the Indicator 7 Decision Tree and Bucket List are used when determining the ratings. The process for completing the COSF includes a team meeting that involves the parents and professionals, and utilizes multiple sources of information. Data is reported electronically to the WDPI via the Special Education Web Portal through a secure login. Entry data is reported within 60 days of a child’s entry date. Exit data is reported within 30 days of the child’s exit date.

A list of approved assessments for collecting supporting evidence to determine ratings is available at:

<http://www.collaboratingpartners.com/documents/ChildOutcomesAssessmentResources92013.pdf>

Resources (Decision Tree, bucket list/rating definitions, and COSF form) used to determine ratings are available at:

<http://www.collaboratingpartners.com/disabilities-indicators-3-7-requirements-forms.php>

Baseline Data: Preschool Children Exiting 2008-2009

A. Positive social-emotional skills (including social relationships):	Number of children	% of children
a. Percent of children who did not improve functioning	20	2.3%
b. Percent of children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	91	10.4%
c. Percent of children who improved functioning to a level nearer to same-aged peers but did not reach	155	17.8%
d. Percent of children who improved functioning to reach a level comparable to same-aged peers	262	30.0%
e. Percent of children who maintained functioning at a level comparable to same-aged peers	344	39.4%
Total	N=872	100%

B. Acquisition and use of knowledge and skills (including early language/communication and early literacy):	Number of children	% of children
a. Percent of children who did not improve functioning	13	2.3%
b. Percent of children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	118	13.5%
c. Percent of children who improved functioning to a level nearer to same-aged peers but did not reach	203	23.3%
d. Percent of children who improved functioning to reach a level comparable to same-aged peers	389	44.6%

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

e. Percent of children who maintained functioning at a level comparable to same-aged peers	149	17.1%
Total	N=872	100%

C. Use of appropriate behaviors to meet their needs:	Number of children	% of children
a. Percent of children who did not improve functioning	12	1.4%
b. Percent of children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	62	7.1%
c. Percent of children who improved functioning to a level nearer to same-aged peers but did not reach	98	11.2%
d. Percent of children who improved functioning to reach a level comparable to same-aged peers	234	26.8%
e. Percent of children who maintained functioning at a level comparable to same-aged peers	466	53.4%
Total	N=872	100%

Baseline Data for Preschool Children Exiting 2008-2009:

Summary Statements	% of children
Outcome A: Positive social-emotional skills (including social relationships)	
1. Of those preschool children who entered or exited the preschool program below age expectations in Outcome A, the percent who substantially increased their rate of growth by the time they turned 6 years of age or exited the program.	79.0%
2. The percent of preschool children who were functioning within age expectations in Outcome A by the time they turned 6 years of age or exited the program.	69.5%

Outcome B: Acquisition and use of knowledge and skills (including early language/communication and early literacy)		
1. Of those preschool children who entered or exited the preschool program below age expectations in Outcome B, the percent who substantially increased their rate of growth by the time they turned 6 years of age or exited the program.		81.9%
2. The percent of preschool children who were functioning within age expectations in Outcome B by the time they turned 6 years of age or exited the program.		61.7%
Outcome C: Use of appropriate behaviors to meet their needs		
1. Of those preschool children who entered or exited the preschool program below age expectations in Outcome C, the percent who substantially increased their rate of growth by the time they turned 6 years of age or exited the program.		81.8%
2. The percent of preschool children who were functioning within age expectations in Outcome C by the time they turned 6 years of age or exited the program.		80.3%

Discussion of Baseline Data

Annually, WDPI requires 1/5 of LEAs in the state to report entry status data. Each LEA reports on their cohort of children until all children have exited early childhood special education, moved or turned 6 years of age. The number of children being reported has increased each year. The following chart lists the number of districts reporting Indicator 7 data and the total number of children reported.

Year	# of Children	# of Districts Represented in Sample
2006-2007	30	17
2007-2008	450	91
2008-2009	872	154

An analysis of the FFY 2008 data reveals for Outcome Area A, the majority of children either improved their positive social-emotional skills (including social relationships) to reach a level comparable to their same-aged peers (30%) or maintained functioning at a level comparable to their same-aged peers (39.4%). For Outcome Area B, the majority of children (44.6%) increased their acquisition and use of knowledge and skills (including early language/communication and early literacy) to reach a level comparable to their same-aged peers. For Outcome Area C, more than half of the children (53.4%) maintained at a level comparable to their same-aged peers, appropriate behaviors to meet their needs. In all three outcome areas, nearly 80% of children substantially increased their rate of growth by the time they turned 6 years of age or exited the program. Acquisition and use of knowledge and skills (including early language/communication and early literacy) had the lowest percent of preschool children who were functioning within age expectations by the time they turned 6 years of age or exited the program. When reviewing the data, the SPP Stakeholders speculated that this may be due to the number of children with speech and language delays.

To ensure timely and accurate reporting of data, enhancements to the child outcomes training materials during the 2008-2009 school year emphasized use of the Decision Tree (http://www.collaboratingpartners.com/OSEP/pdf/4.2decision_tree.pdf) by district teams to enhance the decision-making process in determining the entry or exit rating. Additionally, a *Child Outcomes Fidelity Self Assessment* was developed for use by districts and Cooperative Education Service Agency (CESA) training and technical assistance providers. The intent of the *Child Outcomes Fidelity Self Assessment* is to provide an overview of the fourteen key points that ensure a district's system for gathering and reporting child outcomes is

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

being implemented with fidelity. Potential action steps to enhance a district's current system are supported by State training and technical assistance staff. The *Child Outcomes Fidelity Self Assessment* can be found at: <http://www.collaboratingpartners.com/OSEP/forms.htm>.

Finally, the State's child outcomes database is reviewed bi-monthly for missing or inaccurate data. State training and technical assistance staff communicate with districts about needed data corrections. At the end of the 2008-2009 year, staff analyzed data for trends and/or inconsistencies. This information is used to develop statewide training and technical assistance.

The charts below show the percentage of children by Outcome Area for the past three years.

Measurable and Rigorous Targets for Indicator 7:

Summary Statements	Targets FFY 2009 (% of children)	Targets FFY 2010 (% of children)	Targets FFY 2011 (% of children)	Targets FFY 2012 (% of children)
Outcome A: Positive social-emotional skills (including social relationships)				

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

1. Of those children who entered or exited the program below age expectations in Outcome A, the percent who substantially increased their rate of growth by the time they exited the program	79.2	79.4	79.6	79.8
2. The percent of children who were functioning within age expectations in Outcome A by the time they exited the program	69.7	69.9	70.1	70.3

Summary Statements	Targets FFY 2009 (% of children)	Targets FFY 2010 (% of children)	Targets FFY 2011 (% of children)	Targets FFY 2012 (% of children)
Outcome B: Acquisition and use of knowledge and skills (including early language/communication and early literacy)				
1. Of those children who entered or exited the program below age expectations in Outcome B, the percent who substantially increased their rate of growth by the time they exited the program	82.1	82.3	82.5	82.7
2. The percent of children who were functioning within age expectations in Outcome B by the time they exited the program	61.9	70.1	70.3	70.5

Summary Statements	Targets FFY 2009 (% of children)	Targets FFY 2010 (% of children)	Targets FFY 2011 (% of children)	Targets FFY 2012 (% of children)
Outcome C: Use of appropriate behaviors to meet their needs				
1. Of those children who entered or exited the program below age expectations in Outcome C, the percent who substantially increased their rate of growth by the time they exited the program	82.0	82.2	82.4	82.6

Wisconsin
State

2. The percent of children who were functioning within age expectations in Outcome C by the time they exited the program	80.4	80.5	80.6	80.7
--	------	------	------	------

Provide a rationale for your targets based on your analyses of data quality and strategies for program improvement:

A review of the Indicator #7 progress data for 2006-2007, 2007-2008 and 2008-2009 and baseline summary Statement percentages was held with the SPP Stakeholders. The following decision was made:

- Summary Statement #1: Increase targets .2% for each outcome each year.
- Summary Statement #2: Increase targets .2% for percentages below 80% and .1% for percentages at or above 80%.

Key points that influenced this decision were:

- Desire to convey the message for the need to improve outcomes.
- It is difficult to determine a pattern in the data at this point in time because Indicator #7 data have only been gathered for three years. Furthermore, the growing number of children in the sample and the time factor between entry and exit points (which can be up to 3 years) may also cause a change in data trends.
- The relative newness of the system and limited data to properly analyze and identify factors influencing results.

Since the State was moving from a sampling model to a data census in FFY 2011, WDPI did not propose revising targets in FFY 2009. The targets for FFY 2011 and FFY 2012 were set using the previously established process.

7 F G	<p>WESP-DHH Outreach</p> <p>The number one identified need in Wisconsin for 200 children born per year with hearing loss and their families is increased access to appropriate intervention services provided by qualified professionals regarding the unique needs of infants, toddlers and preschoolers who have a hearing loss. Many families, statewide, cannot access services from early intervention professionals who lack resources in their communities and/or travel hours to connect with early intervention professionals who are knowledgeable about the needs of deaf and hard of hearing infants. In part, this is due to the relative low incidence of hearing loss, and the difficulty in serving a population through our current system of services provided by individual counties and/or school districts. In many cases, there is not a "critical mass" of children with hearing loss; a county or school district may only have one or two children in their program with hearing loss, which may not justify a full or even part-time staff member with the necessary training and breadth of knowledge necessary to serve this population. In addition, other factors may contribute to the lack of access to appropriate intervention services, including: 1) Lack of understanding of eligibility criteria as it applies to children with hearing loss; 2) lack of understanding and experience amongst service providers that infants and toddlers who are deaf and hard of hearing have a unique set of needs (including access to sign language and listening skills development strategies); and 3) even with enough resources to support a staff member, a void in qualified professionals that can support young children who are deaf or hard of hearing and their families.</p> <p>Because our Birth to 3 and early childhood programs are not able to consistently</p>				X	X	X	X	X	WDPI Outreach staff

Part B State Performance Plan (SPP) for 2005-2010

State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	provide intervention services from a provider who has a broad and in-depth understanding for the needs of children with hearing loss, there is a need to provide “supports” to our current system. Parents do not have access to the critical information that will assist them in making educated decisions about educational and communication options for their child and advocating for services that will support these choices. The Guide By Your Side Program (GBYS) will support the provision of this information. In addition, while the Deaf Mentor Program (DMP) addresses the need to support families who choose sign language as a primary communication mode, WI is not currently able to provide similar in-depth support for the needs of families who choose to develop listening and spoken language skills (LSLS), thus there is a need to provide LSLS supports to families through the Home Early Listening Program (HELP).									
7 F G	Young Dual Language Learners (DLL): The Dual Language Learners Initiative provides professional development, technical assistance and resources to community partners regarding culturally and linguistically responsive practices for young children, birth-6. The DLL Leadership Team, comprised of 25 stakeholders, and its smaller Steering Committee, were created as part of this initiative to help coordinate and advance efforts on behalf of young children who are dual language learners and their families throughout the state. In addition, the DLL initiative collaborates with other state initiatives in order to include the strengths and needs of dual language learners and their families in different statewide trainings such as those provided by Wisconsin Model Early Learning Standards, Preschool Options, and Wisconsin Pyramid Model for social emotional competence						X	X	X	Early Dual Language Learner Leadership Committee

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: FAPE in the LRE

Indicator 8: Percent of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities..

(20 U.S.C. 1416(a)(3)(A))

Measurement:

Percent = [(# of respondent parents who report schools facilitated parent involvement as a means of improving services and results for children with disabilities divided) by the (total # of respondent parents of children with disabilities)] times 100.

The Wisconsin Department of Public Instruction (WDPI) worked with the National Center on Special Education Accountability Monitoring (NCSEAM) and the North Central Regional Resource Center (NCRRC), national and regional technical assistance centers established by the Office of Special Education Programs (OSEP), to develop a method for data collection in Wisconsin. OSEP approved the State's sampling plan prior to the FFY 2005 data collection. WDPI utilized a parent survey created by NCSEAM that included the Part B scale, "Schools' Efforts to Partners with Parents," and the 619 scale, "Preschool Special Education Partnership Efforts and Quality of Services."

Description of Methodology

Sample and Stratification Types

WDPI implemented a sampling design to collect information on this indicator from parent and primary caregivers throughout the state. The annual sample for this indicator consists of parents and primary caregivers of children with disabilities reported to WDPI on the annual child count. The sampling plan incorporated five unique aspects of all types of educational entities. Children and youth with disabilities receive Part B special education services through education entities in Wisconsin that can be operationally defined by five specific categories. These include:

Category 1—LEAs in which all schools are charter schools

Category 2—LEAs with one or more charter schools

Category 3—LEAs containing no charter schools

Category 4—Milwaukee Public Schools (MPS)

Category 5—State schools, Department of Health and Family Services (DHFS), and Department of Corrections (DOC)

Table 1 below shows the general configuration of these categories, along with information about the number of entities in each category ("N"), percent of entities in the state (Percent of N), and percent of children and youth aged 3-21 in the state served within each categorical area (Percent Served in Part B). Wisconsin has 12 cooperative educational service agencies (CESAs) distributed geographically throughout the state

that serve as regional resource providers to their member districts in such areas as special education, instructional services, and instructional technology. CESAs assist with the data collection process.

Table 1: Wisconsin Educational Entities				
LEA Category	Entity Status	N	Percent of N	Percent Served in Part B
1	LEAs are Charter Schools	11	2.49%	Less than 1%
2	LEAs have some Charter Schools	72	16.52%	33%
3	LEAs do not have Charter Schools	354	81.00%	53%
4	Milwaukee Public Schools	1	>1	13%
5	State Schools, DHFS, and DOC	4	>1	Less than 1%
Totals		442	100%	100%

Table 1 describes the various educational entities in which data is collected from members of the “sampling frame,” that is, eligible parents and primary caregivers whose children and youth with disabilities received special education services based on the 2004 child count. To ensure that all eligible parents and primary caregivers are included in the sample, WDPI employs a data collection strategy that involves a sampling process proportionally drawn to be representative of three major stratification types:

1. **Stratification Based on LEA Enrollment.** Selection based on LEAs in Category 2 and Category 3. The total number of LEAs that compose this stratification level is 426, which includes about 96% of the LEAs in the state and accounts for 86% of Part B children and youth served in special education programs statewide.
2. **Stratification Based on Milwaukee Public Schools (MPS).** Selection based on LEAs in Category 4. States are required to annually sample from all LEAs with an Average Daily Membership that exceeds 50,000 children. In Wisconsin, this stratification level includes one LEA (MPS) and accounts for 13% of children and youth served in special education programs statewide.
3. **Stratification Based on Educational Entity Category.** Selection based on educational entities in Category 1 and Category 5. This stratification level includes 15 LEAs and accounts for approximately 1% of children and youth served in special education programs statewide.

The purpose for clustering the LEA categories into the three strata is: (1) to ensure that parents whose children and youth with disabilities were receiving services in all types of education entities could be included in the sample, (2) to ensure that the widest range of educational entities could be included in the sampling pool, particularly those that serve low-incidence disabilities and (3) to facilitate the overall logistics involved with data collection. Because one data collection strategy cannot be employed to serve all of these purposes simultaneously, the following section will describe the sample selection and data collection strategy for each level of stratification.

Sample Selection and Data Collection Strategy for Baseline Sample (2005-06 SY)

Baseline data from the 2005-06 school year for the sampling indicators (indicator #8) is collected from seventeen LEAs, including MPS. Parents of children and youth with disabilities were randomly selected from each LEA by WDPI. WDPI assigned the children and youth with disabilities in each of the LEAs with a random number. The numbers were sorted numerically from low to high. WDPI then selected the required number of children and youth for the LEA sample size. This cohort is representative of the state for such variables as disability categories, age, race, and gender. The cycle includes LEAs from rural and urban areas of the state, as well as small, medium, and large school districts. Milwaukee Public Schools, the only LEA with an average daily membership of over 50,000, is included in the sample. (See respondent characteristics in Tables 4-7 below.)

Sample Selection and Data Collection Strategy Beginning with the 2006-2007 School Year**1. Stratification Based on LEA Enrollment**

Stratification based on LEA enrollment involves a process in which LEAs in Categories 2 and 3 are combined and sampled according to student enrollment of all general and special education students. LEAs in these two categories are classified in Table 2 according to enrollment groups identified previously by stakeholders (see indicator #1). The column entitled "Number of LEAs in Level" reflects the total number of LEAs in each enrollment group or level, minus the LEAs sampled for the 2005-2006 baseline data. The column entitled "Number Sampled Per Year" reflects approximately one-fifth of the number of LEAs in each enrollment level that will be selected annually over a five-year period. For example, of the 224 LEAs in Level F, 45 entities will be randomly selected each year without replacement. All LEAs will be included in the sample within the six-year period (the course of the SPP), but once an LEA has been selected for sampling in any given year, it will not be "eligible" for selection again.

Table 2: Enrollment Levels of Category 2 and 3 LEAs

Enrollment Level	Total Student Enrollment	Number of LEAs in Level	Number Sampled Per Year
A	10,000 - 25,000	8	2
B	5,001 - 10,000	14	3
C	3,001 - 5,000	32	7
D	2,001 - 3,000	29	6
E	1,001 - 2,000	102	20
F	0 - 1,000	224	45
Totals		409	83

Selecting the sample for this stratification level involves a two-stage process. The first stage involves selecting LEAs by the same "roster" method of sampling as in the Public Agency Procedural Compliance Self-assessment (see indicator #15). Each year of the SPP cycle beginning in 2006-2007, a cohort of one-fifth of all LEAs completes a Public Agency Procedural Compliance Self-assessment. Each cohort is representative of the State for pupil enrollment, areas of disability, gender, ethnicity, and race. MPS is involved each year. The same roster of LEAs gathers parent

involvement data in the year that they complete the Procedural Compliance Self-assessment. Every LEA in the state is involved in the parent involvement data collection once during the course of the SPP.

Following selection of one-fifth of the LEAs for the respective year of data collection, a second stage ensues to select eligible parents of children and youth with disabilities. WDPI assigns the children and youth with disabilities in each of the LEAs with a random number. The numbers are sorted numerically from low to high. WDPI then selects the required number of children and youth for the LEA sample size. WDPI ensures a sample is randomly selected that is representative of parents of children and youth with disabilities by race/ethnicity and disability categories.

2. Stratification Based on MPS

To ensure that parents and primary caregivers of children and youth with disabilities living in large metropolitan areas are adequately represented in the sample and to adhere to OSEP requirement, MPS is sampled every year because it has an average daily membership of over 50,000. Each of the other LEAs in the state collects the data in one year only. The annual sample of parents randomly selected from MPS is proportionate in size and representative of race/ethnicity when compared to the random sample of parents from the cohort of other LEAs selected for a given fiscal year.

A roster method is used to select randomly a proportionate number of MPS schools per year without replacement until all schools have been selected. Following selection of schools for the respective year of data collection, WDPI ensures a sample of eligible parents of children and youth with disabilities is randomly selected that is representative of all parents of children and youth with disabilities by race/ethnicity and disability categories.

3. Stratification Based on Educational Entity Type

Stratification by educational entity type includes LEAs in which all schools are charter schools; the state schools, including the Wisconsin School for the Visually Handicapped (WSVH) and the Wisconsin School for the Deaf (WSD); the Department of Corrections (DOC); and the Department of Health and Family Services (DHFS). While these entities serve only about 1% of the of the children and youth with disabilities receiving special education services in Wisconsin, they represent low incidence disabilities as well as incarcerated youth with disabilities.

Sample Size

In the 2005 FFY, seventeen LEAs collected baseline data for Indicator #8. A sample size of 383 students was determined by using the 2004 annual statewide child count and a sampling calculator made available on the web by Creative Research Systems (<http://www.surveysystem.com/sscalc.htm#ssneeded>). The number of parents selected for this sample reflected a confidence level of 95%, with a confidence interval of + or – 5%. The remainder of LEAs in the state were distributed among the remaining five fiscal years in accordance with the monitoring cycle established as part of the Public Agency Procedural Compliance Self-assessment (Indicator #15). Subsequent to the State's development of its Indicator #8 sampling plan and the plan's approval by the Office of Special Education Programs (OSEP), OSEP required that the State publicly report individual LEA results for Indicator #8. To ensure a consistent process that randomly selected students by LEA, the sampling calculator made available on the web by Creative Research Systems was employed again for each LEA sample. The number of parents selected for individual LEA samples reflects a confidence level of 95%, with a confidence interval of + or – 10%. The result was a larger random sample of parents who were requested to complete the Parent Survey in FFY 2006, and a larger group of respondents. The size of the groups of respondents at the LEA level ensures that confidentiality of the parents and students will not be breached in the required public reporting by LEA. As indicated previously, the sample of schools and districts will be selected without replacement, and the size of the sample of parents that the

State randomly selects should remain fairly consistent for the remaining four sampling years. Respondent group size may increase with improved follow up strategies.

Instrumentation

WDPI used the Part B Parent Survey and the 619 Parent Survey developed by NCSEAM. A copy of the internet version of the two surveys is attached. Survey directions instruct the parent to provide one of six responses to each item to report the extent to which the item was performed by their school during the previous school year. The six response options are: very strongly disagree, strongly disagree, disagree, agree, strongly agree, and very strongly agree. Beginning in FFY 2008, the size of the Part B Parent Survey was reduced to include only demographic items and the first 25 items in the Part B Parent Survey developed by NCSEAM. The 619 Parent Survey includes only demographic items and the items that correspond to the revised Part B Survey items. These items comprise the items used for the data analysis described below. The length of the original Part B survey was cited by parents, survey helpers, and other stakeholders as a deterrent to participation, so the CIFMS stakeholders advised the WDPI to shorten the survey.

Data Collection Procedures

Data collection procedures involve the utilization of an internet parent survey, along with a range of other options to ensure widest coverage and return rate possible. Internet and non-internet options are described below:

1. Internet Survey. The WDPI worked with the NCRRC to provide the NCSEAM Parent Survey online. The WDPI ensures an adequate response rate to the survey, including responses from under-represented populations and families of color, by working with local school districts, Wisconsin's Parent Training and Information Center and Milwaukee Community Parent Resource Center (both at Wisconsin Family Assistance Center for Education, Training, and Support (WI FACETS)), the Parent Service Center in Milwaukee Public Schools, and WDPI's Wisconsin Statewide Parent-Educator Initiative (WSPEI) Parent Liaisons. Initial questions on the internet survey direct respondents to either the Part B (ages 6-21) items or the 619 (ages 3-5) items, both of which are available online in English, Spanish and Hmong.

2. Non-Internet Options. In the event the parent or primary caregiver indicates they do not have access to the internet, or would prefer not to participate using the internet, the following options are offered: (1) mail the parent survey to the parent or primary caregiver, or (2) administer and record survey responses over the phone or in person. Multiple contacts are made to ensure a high response rate. Mailed surveys are available for both age groups in English, Spanish and Hmong.

Data Analysis Procedures

The Wisconsin Department of Public Instruction is employing a performance measurement approach to assessing the quality of school efforts to facilitate parent involvement. Methodologies for performance measurement in public agencies and programs are described in publications by the United States Government Accountability Office (2005), the United States Office of Management and Budget (2004), the National Institute of Standards and Technology (2006), and the Oak Ridge Associated Universities (2005). The NCSEAM national stakeholder group set a standard that was defined as a .95 likelihood of a parent response of 'agree,' 'strongly agree,' or 'very strongly agree' with 18 of the 25 items from the Part B survey scale described above. WDPI adopted this national standard of eighteen items as measures of performance. The items include:

- The school explains what options parents have if they disagree with school.
- The school communicates regularly with parents regarding their child's progress.
- Parents discuss with school staff how their child will participate in assessments.

- Schools provide written justification to parents for services provided to the student outside regular classes.
- Teachers and administrators seek out parent input.
- Teachers and administrators ensure that parents have fully understood the Procedural Safeguards.
- Parents are considered an equal partner with teachers and professionals.
- All of parents' concerns and recommendations are documented on the IEP.
- Teachers and administrators show sensitivity to the needs of students with disabilities.
- The school offers parents different ways to communicate with teachers.
- Teachers and administrators encourage parents to participate in the decision-making process.
- Each child's evaluation report is written in terms that parents understand.
- Parents discuss accommodations and modifications for their child with school staff.
- Teachers treat parents as team members
- Teachers and administrators respect the culture and language of parents.
- Written information parents receive is written in a way understandable to parents.
- Teachers are available to speak with parents.
- Information is provided to parents in a language they understand.

Determination of whether the state special education system is meeting performance goals for school efforts to involve parents is determined by using a version of process capability analysis. The OMB (2003) defines performance goals and targets:

- *Performance goals* are the target levels of performance expressed as a measurable objective, against which actual achievement can be compared. Performance goals can be stated as either outcomes or outputs, but to be complete they should incorporate targets and timeframes into a performance measure.
- *Targets* are the quantifiable or otherwise measurable characteristics that tell how well a program must accomplish a performance measure.

A capability analysis is defined by the National Institutes of Standards and Technology (NIST; 2006): "Process capability analysis entails comparing the performance of a process against its specifications. We say that a process is capable if virtually all of the possible variable values fall within the specification limits." Process capability is assessed by plotting process specification limits on a histogram with observations. A specification limit marks the minimum or maximum tolerable value for a performance measure. The NIST describes the conclusion that may be determined with this form of analysis: "If the histogram falls within the specification limits, then the process is capable."

The capability analysis employed by WDPI uses the observed lowest performance limit on any of the performance measures, and a lower specification limit determined by the Continuous Improvement and Focused Monitoring System (CIFMS) stakeholders. The lower performance limit represents the lowest level of performance on any of the 18 performance indicators addressed in the statewide survey. Minimum limits, or "lower specification limits," may be set for performance indicators to identify the lowest level of performance on any indicator that is tolerable. The lower performance limit may be compared to a lower specification limit to determine whether performance is within a tolerable range, if an increase in the lower performance limit indicating improvement has occurred, or if a decrease in the lower performance limit indicating performance slippage has occurred. In 2006, the CIFMS stakeholders identified annual targets for the lower specification limit. In coming years, the lower performance limit may be compared to the lower specification limit to determine progress or slippage. The CIFMS stakeholders determined that by

2011, the lower specification limit would be 87.5%, meaning that the lower performance limit should be equal to or greater than 87.5%, and that performance on all 18 of the performance indicators, as measured by a statewide survey of parents, would fall between 87.5% and 100%. The advantages of this approach over target setting utilizing measures of central tendency – mean, median, and mode - is that it ensures that the most difficult performance indicators are addressed in the process of improvement and that an expected high level of performance across all the performance indicators in the long-run.

Both internet and non-internet methods of data collection were processed in the manner in which the raw data were obtained. In the case of the internet, where the majority of completed surveys were obtained, responses were processed through a web-based database. In the case of mailed or parent surveys completed “face-to-face,” responses were scanned for entry into a database. In the case of phone surveys, the survey administrator entered data into the web-based survey form. This data was processed essentially the same as data collected through having parents or primary caregivers complete the survey over the internet. A question on the survey permits analysis according to who entered the data.

For each of the 18 performance measures, the proportion of parents who agreed that schools had performed that measure during the previous school year by responding to that item with “agree,” “strongly agree,” or “very strongly agree” was calculated. The distribution of performance measure percentages was used to calculate the lower performance limit. WDPI determined that fifteen of the 619 survey items were the same as 15 of the 18 performance measures previously listed. The proportion of parents of preschoolers who agreed that schools had performed each of those measures during the previous school year was calculated on the 15 performance measures separately and used to determine the 619 lower performance limit. The two calculations were weighted by the respective number of respondents and added to determine the percent of respondent parents who report schools facilitated parent involvement as a means of improving services and results for children with disabilities.

Results

Respondent Characteristics

The 2005-2006 baseline was established from 348 respondent parents and primary caregivers drawn from seventeen LEAs. Three-hundred and nine (309) parents provided valid responses to the Wisconsin Part B Survey. Chart 1 summarizes the representation of grades in the Part B respondent group.

Table 4 summarizes the representation of children in race and ethnic categories in the Part B respondent group, as reported by parents completing the survey.

Table 4: Percent Representation of Race/Ethnicity Categories in Respondent Group	
Race/Ethnicity	Percent Representation in Respondent Group
Black or African American	7.7%
American Indian or Native Alaskan	7.7%
Asian or Pacific Islander	1.3%
White	75%
Hispanic or Latino	3%
Multi-racial	3.7%
Other	1.7%

Table 5 summarizes the representation of children in disability categories in the Part B respondent group, as reported by parents completing the survey.

Table 5: Percent Representation of Disability Categories in Respondent Group	
<u>Disability</u>	<u>Percent Representation in Respondent Group</u>
Autism	5.9%
Cognitive Disability	7.7%
Emotional Behavioral Disability	12.2%
Hearing Impairment	2.1%
Orthopedic Impairment	1.0%
Other Health Impairment	10.1%
Significant Developmental Delay	1.0%
Specific Learning Disability	27.9%
Speech/Language Impairment	18.5%
Traumatic Brain Injury	1.4%
Visual Impairment	0.0%
Multiple/Don't Know	12.2%

Thirty-nine (39) parents provided valid responses to the Wisconsin 619 Survey.

Table 6 summarizes the representation of children in race and ethnic categories in the 619 respondent group, as reported by parents completing the survey.

Table 6: Percent Representation of Race/Ethnicity Categories in Respondent Group	
<u>Race/Ethnicity</u>	<u>Percent Representation in Respondent Group</u>
Black or African American	5.1%
American Indian or Native Alaskan	0%
Asian or Pacific Islander	2.6%
White	79.5%
Hispanic or Latino	2.6%
Multi-racial	10.3%
Other	0%

Table 7 summarizes the representation of children in disability categories in the 619 respondent group, as reported by parents completing the survey.

Table 7: Percent Representation of Disability Categories in Respondent Group	
Disability	Percent Representation in Respondent Group
Autism	10.3%
Cognitive Disability	5.1%
Emotional Behavioral Disability	0%
Hearing Impairment	2.6%
Orthopedic Impairment	2.6%
Other Health Impairment	0%
Significant Developmental Delay	2.6%
Specific Learning Disability	5.1%
Speech/Language Impairment	64.1%
Traumatic Brain Injury	0%
Visual Impairment	0%
Multiple/Don't Know	7.7%

Survey Reliability Analysis

The reliability of the statewide survey conducted by WDPI was determined using WINSTEPS (Linacre, 2006). WINSTEPS provides an analysis of “person reliability” and “item reliability,” which designer Linacre identifies are “equivalent to KR-20, Cronbach Alpha, and the Generalizability Coefficient” (p. 193). Person reliability is “equivalent to the traditional ‘test reliability,’” and low item reliability is an indication that the sample size is “too small for stable item estimates based on the current data” (p. 320). The reliability estimates calculated for the performance measures in the Part B survey are a person reliability of 0.96, and an item reliability of 0.97. The reliability estimates calculated for the performance measures in the 619 survey are a person reliability of 0.93 and an item reliability of 0.88. These estimates indicate that the survey has sufficient reliability according to levels previously suggested in evaluation research (Peterson, 1994).

Performance Measure Percentages

Figure 2 presents the distribution of percent parent agreement to the 15 performance measures of the 619 survey. The item performance measures range from the lower (79.5%) to upper (100%) performance limits

Figure 3 presents the distribution of percent parent agreement to the 18 performance measures. In this presentation of the distribution, the item performance measures range from the lower (71.1%) to upper (96.4%) performance limits with the median at 89.9% of this distribution.

Figure 3: Percent of Parents Endorsing Part B Item Performance Indicators

Overview of Issue/Description of System or Process:

Students with involved parents, regardless of background, are more likely to:

- Earn higher grades and test scores;
- Enroll in higher-level programs;
- Be promoted and earn credits;
- Adapt well to school and attend regularly;
- Have better social skills and behavior; and
- Graduate and go on to higher education. (Peterson, L. & Kreider, H., 2005)

The involvement of families in the education of their children is therefore a factor in achieving the desired outcomes in indicators #1 through #14. Family involvement research has demonstrated repeatedly that schools' efforts to involve families are essential for school-wide family involvement

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

to occur. Indicator #8 is a direct measure of family perceptions of how schools facilitated parent involvement. The NCSEAM Part B Parent Survey and 619 Parent Survey, used to collect Wisconsin's data, elicit responses that correspond to communication between school and home, equal partnership between parents and educators, and provision of information about special education rights and issues.

Baseline Data for FFY 2005 (2005-2006):

Based on the 2005-2006 distribution of proportionate agreement, 72.04% of respondent parents reported that schools facilitated parent involvement as a means of improving services and results for children with disabilities.

Calculation:

$309/348$ (Part B respondents) \times 71.1 (Part B lower performance limit) = 21969.9

$39/348$ (619 respondents) \times 79.5 (619 lower performance limit) = 3100.5

$21969.9 + 3100.5 = 25070.4$

$25070.4 \div 348$ (total respondents) = 72.04%

FFY	Measurable and Rigorous Target
2005 (2005-2006)	72.04% of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities.
2006 (2006-2007)	72.3% of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities.
2007 (2007-2008)	76.1% of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities.
2008 (2008-2009)	79.9% of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities.
2009 (2009-2010)	70.0% of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities.
2010 (2010-2011)	72.5% of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities.
2011 (2011-2012)	75.0% of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities.

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

2012 (2012-2013)

77.5% of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities.

8 B C D F G	Children Come First (CCF) Advisory Committee The Children Come First (CCF) Advisory Committee is established in state statute and is a cabinet-level committee with members appointed by the Secretary of the Department of Health and Family Services. In its ninth year of operation, this council is committed to improving services for children with severe emotional disturbance. Its vision is to create a comprehensive, flexible array of services and natural supports ensuring that children with SED remain with their families and in the community. Its primary role is to provide counsel and oversight to these programs. The Assistant State Superintendent of the Division for Learning Support: Equity and Advocacy and the State Director of Special Education serve on this council. Children from all parts of the state are served through integrated services projects.						X	X	X	WDPI Administration
8 C G	The Circles Of Life Conference The Circles of Life Conference is a WDPI sponsored event that has been in existence for twenty-four years. The annual conference is for families who have children of any age with disabilities or special health care needs and the professionals who support and provide services for them. <i>Circles of Life</i> is a unique opportunity to develop new skills, garner the latest information, and form lasting friendships. The conference includes nationally known keynote speakers, topical sectionals, parent listening sessions, family fun night, roundtable discussions on such topics as individualized service plans and	X	X	X	X	X	X	X	X	Parent Involvement Consultant

8 A B C D E F G H	Focused Performance Reviews WDPI in collaboration with CESAs #7 and #5 originally developed the Special Education Data Retreat Model to provide a unique, structure forum where collaborative teams of special educators, administrators, along with regular educators evaluated their systems for design and delivery of special education and related services. Focused data analysis enables educators to identify potential root causes of the low graduation rate, leading toward the development of school/district plans to address identified needs and improve student outcomes. Some of the data analyzed includes graduation, dropout, suspension, expulsion, participation and performance on statewide assessments, and educational environments. Data is disaggregated by disability area, gender, and race/ethnicity whenever it is available. Statewide training was provided to give all Wisconsin school districts the opportunity to analyze their own data by a collaborative staff team, to identify areas of need based on the data analysis, and to work towards a plan to address those needs building/district wide. To accomplish this statewide training, a "Train the Trainers" model was used. A two-day facilitated training was conducted for all Regional Service Network (RSN) directors and school improvement service (SIS) directors in the state. A model set of data was used for training purposes. After the RSN and SIS directors were trained, each CESA conducted trainings for its own school districts. Two follow-up meetings were conducted to provide support and technical assistance to those responsible for conducting special education data retreats. This data analysis component was further refined and						X	X	X	FRII Coordinator Data Consultant DPI Assistant Director of Special Education FRII Workgroup FRII Pilot District Teams

8 A B C D E F G H	<p>School Improvement: Focused Review of Improvement Indicators (FRII)</p> <p>Wisconsin has developed a Continuous Improvement and Focused Monitoring System (CIFMS) to achieve positive results for children with disabilities in Wisconsin while ensuring continued procedural compliance with state and federal laws and regulations. WDPI involves stakeholders in the ongoing development of the CIFMS including the identification of priority areas for focused monitoring in Wisconsin. The CIFMS stakeholders analyzed statewide student outcome data to determine that improving graduation rates of students with disabilities should be a priority in Wisconsin. The CIFMS stakeholders identified student enrollment groups within the state from which a select number of school districts are identified for FM. WDPI uses trend data over a three-year period to identify districts for FM. The districts within each enrollment group most in need of improvement are selected for FM. During the 2009-2010 SY, WDPI expanded upon the successful focused monitoring model and incorporated materials to allow for the inclusion of all improvement indicators. This new process is called the Focused Review of Improvement Indicators (FRII).</p>					X	X	X	X	FRII Workgroup FRII Coordinator

Part B State Performance Plan (SPP) for 2005-2010

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: Disproportionality

Indicator 9: Percent of districts with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification.

(20 U.S.C. 1416(a)(3)(C))

Measurement:

Percent = [(# of districts with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification) divided by the (# of districts in the State)] times 100.
Include State's definition of "disproportionate representation."

Based in its review of the 618 data for FFY 2008, describe how the State made its annual determination that the disproportionate representation it identified (consider both over and under representation) of racial and ethnic groups in special education and related services was the result of inappropriate identification as required by §§300.600(d)(3) and 300.602(a), e.g., using monitoring data; reviewing policies, practices and procedures, etc. In determining disproportionate representation, analyze data, for each district, for all racial and ethnic groups in the district, or all racial and ethnic groups in the district that meet a minimum 'n' size set by the State. Report on the percent of districts in which disproportionate representation of racial and ethnic groups in special education and related services is the result of inappropriate identification, even if the determination of inappropriate identification was made after the end of the FFY2008 reporting period, i.e., after June 30, 2009. If inappropriate identification is identified, report on corrective actions taken.

Overview of Issue/Description of System or Process:

Wisconsin annually collects district-level data, disaggregated by race/ethnicity, for students aged 6 through 21 in special education and in all disability categories. Wisconsin Department of Public Instruction (WDPI) uses child count data to complete the *Report of Children with Disabilities Receiving Special Education under Part B of the Individuals with Disabilities Education Act*. All children with disabilities as reported on the state's child count are included when determining disproportionality. As directed by OSEP, WDPI includes under-representation, as well as over-representation, in the definition of disproportionate representation.

WDPI reports and analyzes data consistent with the Department's Final Guidance on Maintaining, Collecting, and Reporting Racial and Ethnic Data to the U.S. Department of Education, issued on October 19, 2007 (Final Guidance,) 72 Fed. Reg. 59265. Because WDPI uses a three-year

longitudinal analysis to identify LEAs with disproportionate representation, WDPI is using a bridging method to analyze its 618 data for the 2010-11 and 2011-12 school years. WDPI selected a single bridging methodology based on the characteristics of local populations as well as data processing capabilities. Beginning with the 2012-2013 school, WDPI will report using seven racial and ethnic categories and consider whether disproportionate representation of children in the “two or more races” category is occurring. WDPI will analyze data for the “two or more races” category in the same manner as it analyzes the other six racial and ethnic categories.

The State’s definition of disproportionate representation is based on the following criteria:

- 1. Risk Ratio of 2.0 or Greater:** In calculating the risk ratio for over-representation, WDPI will use the Westat developed equation for risk ratio (risk for racial/ethnic group for disability category / risk for comparison group for disability category) with a comparison group of the remaining race/ethnic categories. WDPI does not use a risk ratio in determining under-representation but uses a calculation of risk as described below.
- 2. Calculating Risk:** Because white students have been the unit of comparison used by the National Research Council in their analysis of this issue, and because white students in Wisconsin have never been regarded as an over-represented racial group in special education, or in any disability category, their risk level for the state is used as the comparison group for this second factor.

For each racial group, over-representation may be considered where the risk level for the given group exceeds the state’s risk level of white students in that category by at least one percent. This additional measure also ensures that districts will not be considered for the highest level of review where the risk for a given group is low. To ensure that white students could be regarded as over-represented at the district level, white student risk level at the district level will be compared to white student risk level at the state level in the same manner as every other racial or ethnic group.

To be identified for under-representation based on statistical data, the district risk for a particular race/ethnic category must be one-fifth or less than the statewide risk for all students.

- 3. Cell size:** To be identified for over-representation based on statistical data, a racial or ethnic group must have at least ten members in a given cell used for risk ratio analysis, and a total enrollment of 100 students for any given racial group. The cell size of 10 is not used in calculating under-representation because, with under-representation, we are addressing the issue of low number of students identified in special education.

Consecutive Years: Because of changing demographics, anomalies in data collection, and other factors, WDPI requires districts to meet the above criteria for three consecutive years.

WDPI developed the definition of disproportionate representation (including both over-representation and under-representation) with assistance from Daniel Losen, a nationally recognized expert and editor of the book, *Racial Inequality in Special Education*, and the National Center for Culturally Responsive Educational Systems (NCCRESt). WDPI was selected as one of nine states to partner with NCCRESt to receive technical assistance and build capacity to address racial disproportionality in special education at both the state and district level.

Determination of Inappropriate Identification

Based on the above criteria, which includes use of multiple methods to calculate disproportionality, districts are identified after the first of the calendar year. Once districts are identified as having over-representation, they are required to form district wide teams comprised of staff from both general education and special education, including the Director of Special Education. The district teams meet with department staff to review the policies, procedures, and practices used in identification or placement of students with disabilities to determine they are race neutral and in compliance with Part B of IDEA 2004. District teams and department staff specifically review policies, procedures, and practices related to the requirements of 34 CFR 300.111, 300.201, and 300.301 through 300.311 to determine whether disproportionate representation is the result of inappropriate identification. The review process also includes consideration of the use of eligibility criteria checklists developed by WDPI program consultants in six disability areas (cognitive disabilities, visual impairments, hearing impairments, speech/language impairments, specific learning disabilities, and emotional behavioral disabilities). These checklists are included in the evaluation guides posted on the WDPI website and have been widely disseminated. When school districts use the eligibility criteria worksheets, the IEP team documentation of eligibility criteria is more likely to adequately address all of the required elements and result in fewer cases of inappropriate identification. Use of the eligibility checklists has been strongly encouraged as one measure for improving Wisconsin's performance related to the disproportionate representation of racial and ethnic groups in specific disability categories. Regional training opportunities exist for all LEAs on proper use of the eligibility criteria checklists conducted by WDPI consultant with categorical expertise.

LEAs identified with under-representation are required to conduct the same review of policies, procedures, and practices through a self-assessment process. LEAs submit an assurance that they have completed the self-assessment and identify whether the district has policies, procedures, and practices that result in inappropriate identification.

The review process for each district is documented and filed with the WDPI. If identified with inappropriate identification, districts revise written policies and procedures and develop improvement plans to address inappropriate identification practices. Any identified procedural noncompliance is corrected as soon as possible but no later than one year from identification. The district works with the WDPI assigned liaison to correct the noncompliance. The WDPI liaison further provides technical assistance to the district when implementing the improvement plan, and conducts periodic progress monitoring and verification of correction of noncompliance.

All districts identified with over-representation are also required to attend WDPI's annual Summer Institute on Addressing Disproportionality. This institute features both national and local efforts, initiatives, and issues involved in understanding, identifying, and addressing disproportionality.

Baseline Data for FFY 2005 (2005-2006):

The percent of districts with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification for the 2005-06 SY is 0%.

During the 2005-06 SY, WDPI identified ten districts with disproportionate over-representation and no districts with disproportionate under-representation in special education and related services based on Wisconsin's definition of disproportionate representation. Of the ten districts with disproportionate over-representation in special education, five of the districts have disproportionate representation of American Indian students, and five have disproportionate representation of African American students.

In its review of the policies, procedures, and practices of the ten districts with data indicating disproportionate over-representation, the department did not identify any areas of noncompliance with Part B. WDPI determined that the districts were in compliance with Part B by conducting a review of each districts' policies, procedures, and practices related to the requirements of 34 CFR 300.111, 300.201, and 300.301 through 300.311. The districts have either adopted WDPI's model policies and procedures or have submitted policies and procedures that have been reviewed and approved by WDPI staff. In addition, the districts have either adopted the department's model IEP forms or use forms approved by WDPI. In determining eligibility for special education, the districts use state eligibility criteria. Further, all policies, procedures, and practices are race neutral. Consequently, WDPI determined that there were no districts with disproportionate representation of racial and ethnic groups in special education and related services as a result of inappropriate identification.

Calculation

To determine the percent of districts, WDPI adds the number of districts identified with over-representation to the number of districts identified with under-representation (in this case $0 + 0 = 0$). This numerator is then divided by 444, the total number of LEAs, times 100 (in this case 0%). The total number of LEAs includes 426 public school districts, 16 independent charter schools, Department of Corrections, and the Department of Health and Family Services. The percent of districts with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification for the 2005-06 SY is 0%.

Discussion of Baseline Data:

Because the criteria for identifying districts is based on three consecutive years of data, WDPI used data from 2002-2003, 2003-04, and 2004-2005 school years to calculate the baseline and identify districts with disproportionate representation that was a result of inappropriate identification during the 2005-2006 school year.

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: Disproportionality

Indicator 10: Percent of districts with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification.

(20 U.S.C. 1416(a)(3)(C))

Measurement:

Percent = [(# of districts with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification) divided by the (# of districts in the State)] times 100.

Include State's definition of "disproportionate representation."

Based on its review of the 618 data for FFY2008, describe how the State made its annual determination that the disproportionate representation it identified (consider both over and under representation) of racial and ethnic groups in specific disability categories was the result of inappropriate identification as required by §§300.600(d)(3) and 300.602(a), e.g., using monitoring data; reviewing policies, practices and procedures, etc. In determining disproportionate representation, analyze data, for each district, for all racial and ethnic groups in the district, or all racial and ethnic groups in the district that meet a minimum 'n' size set by the State. Report on the percent of districts in which disproportionate representation of racial and ethnic groups in specific disability categories is the result of inappropriate identification, even if the determination of inappropriate identification was made after the end of the FFY 2008, i.e., after June 20, 2009. If inappropriate identification is identified, report on corrective actions taken.

Overview of Issue/Description of System or Process:

Wisconsin annually collects district-level data, disaggregated by race/ethnicity, for students aged 6 through 21 in special education and in all disability categories. Wisconsin Department of Public Instruction (WDPI) uses child count data to complete the *Report of Children with Disabilities Receiving Special Education under Part B of the Individuals with Disabilities Education Act*. All children with disabilities as reported on the state's child count are included when determining disproportionality. As directed by OSEP, WDPI includes under-representation, as well as over-representation, in the definition of disproportionate representation.

WDPI reports and analyzes data consistent with the Department's Final Guidance on Maintaining, Collecting, and Reporting Racial and Ethnic Data to the U.S. Department of Education, issued on October 19, 2007 (Final Guidance,) 72 Fed. Reg. 59265. Because WDPI uses a three-year longitudinal analysis to identify LEAs with disproportionate representation, WDPI is using a bridging method to analyze its 618 data for the 2010-11 and 2011-12 school years. WDPI selected a single bridging methodology based on the characteristics of local populations as well as data processing capabilities. Beginning with the 2012-2013 school, WDPI will report using seven racial and ethnic categories and consider whether

disproportionate representation of children in the “two or more races” category is occurring. WDPI will analyze data for the “two or more races” category in the same manner as it analyzes the other six racial and ethnic categories.

The State’s definition of disproportionate representation is based on the following criteria:

1. **Risk Ratio of 2.0 or Greater:** In calculating the risk ratio for over-representation, WDPI will use the Westat developed equation for risk ratio (risk for racial/ethnic group for disability category / risk for comparison group for disability category) with a comparison group of the remaining race/ethnic categories. WDPI does not use a risk ratio in determining under-representation but uses a calculation of risk as described below.
2. **Calculating Risk:** Because white students have been the unit of comparison used by the National Research Council in their analysis of this issue, and because white students in Wisconsin have never been regarded as an over-represented racial group in special education or in any disability category, their risk level for the state is used as the comparison group for this second indicator.

For each racial group, over-representation may be considered where the risk level for the given group exceeds the state’s risk level of white students in that category by at least one percent. This additional measure also ensures that districts will not be considered for the highest level of review where the risk for a given group is low. To ensure that white students could be regarded as over-represented at the district level, white student risk level at the district level will be compared to white student risk level at the state level in the same manner as every other racial or ethnic group.

To be identified for under-representation based on statistical data, the district risk for a particular race/ethnic category must be one-fifth or less than the statewide risk for all students.

3. **Cell size:** To be identified for over-representation based on statistical data, a racial or ethnic group must have at least ten members in a given cell used for risk ratio analysis, and a total enrollment of 100 students for any given racial group. The cell size of ten is not used in calculating under-representation because, with under-representation, we are addressing the issue of low number of students identified in a given disability category.

Consecutive Years: Because of changing demographics, anomalies in data collection, and other factors, WDPI requires districts to meet the above criteria for three consecutive years.

WDPI developed the definition of disproportionate representation (including both over-representation and under-representation) with assistance from Daniel Losen, a nationally recognized expert and editor of the book, *Racial Inequality in Special Education*, and the National Center for Culturally Responsive Educational Systems (NCCRESt). WDPI was selected as one of nine states to partner with NCCRESt to receive technical assistance and build capacity to address racial disproportionality in special education at both the state and district level.

Determination of Inappropriate Identification

Based on the above criteria, which includes use of multiple methods to calculate disproportionality, districts are identified after the first of the calendar year. WDPI applies the criteria disaggregated by each of the six specific disability categories (mental retardation, specific learning

disabilities, emotional disturbance, speech or language impairments, other health impairments, and autism). Once districts are identified as having over-representation they are required to form district wide teams comprised of staff from both general education and special education, including the Director of Special Education. The district teams meet with department staff to review the policies, procedures, and practices used in identification or placement of students with disabilities to determine they are race neutral and in compliance with Part B of IDEA 2004. District teams and department staff specifically review policies, procedures, and practices related to the requirements of 34 CFR 300.111, 300.201, and 300.301 through 300.311 to determine whether disproportionate representation is the result of inappropriate identification. The review process also includes consideration of the use of eligibility criteria checklists developed by WDPI program consultants in six disability areas (cognitive disabilities, visual impairments, hearing impairments, speech/language impairments, specific learning disabilities, and emotional behavioral disabilities). These checklists are included in the evaluation guides posted on the WDPI website and have been widely disseminated. When school districts use the eligibility criteria worksheets, the IEP team documentation of eligibility criteria is more likely to adequately address all of the required elements and result in fewer cases of inappropriate identification. Use of the eligibility checklists has been strongly encouraged as one measure for improving Wisconsin's performance related to the disproportionate representation of racial and ethnic groups in specific disability categories. Regional training opportunities exist for all LEAs on proper use of the eligibility criteria checklists conducted by WDPI consultants with categorical expertise.

LEAs identified with under-representation are required to conduct the same review of policies, procedures, and practices through a self-assessment process. LEAs submit an assurance that they have completed the self-assessment and identify whether the district has policies, procedures, and practices that result in inappropriate identification.

The review process for each district is documented and filed with the WDPI. If identified with inappropriate identification, districts revise written policies and procedures and develop improvement plans to address inappropriate identification practices. Any identified procedural noncompliance is corrected as soon as possible but no later than one year from identification. The district works with the WDPI assigned liaison to correct the noncompliance. The WDPI liaison further provides technical assistance to the district when implementing the improvement plan, and conducts periodic progress monitoring.

All districts identified with over-representation are also required to attend WDPI's annual summer institute on addressing disproportionality. This institute features both national and local efforts, initiatives, and issues involved in understanding, identifying, and addressing disproportionality.

Baseline Data for FFY 2005 (2005-2006):

The percent of districts with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification for the 2005-06 SY is 0%.

Based on the definition of disproportionate representation established by Wisconsin, WDPI identified 25 districts with disproportionate over-representation and 15 districts with disproportionate under-representation in one or more special education disability categories. Twelve districts were identified as having disproportionate over-representation of American Indians students in a special education disability category, and twelve districts were identified as having disproportionate over-representation of African American students. One district was identified with over-representation for both of these racial categories. Ten districts were identified as having under-representation of Asian students in a special

education disability category. Eight districts were identified as having under-representation of Hispanic students in a special education disability category. Three districts were identified with under-representation for both of these racial categories.

In its review of the policies, procedures, and practices of the districts, the department did not identify any areas of noncompliance with Part B. WDPI determined that the districts were in compliance with Part B by conducting a review of each districts' policies, procedures, and practices related to the requirements of 34 CFR 300.111, 300.201, and 300.301 through 300.311. The districts have either adopted WDPI's model policies and procedures, or have submitted policies and procedures that have been reviewed and approved by WDPI staff. In addition, the districts have either adopted the department's model IEP forms or use forms approved by WDPI. In determining eligibility for special education, the districts use state eligibility criteria. Further, all policies, procedures, and practices are race neutral. Consequently, WDPI determined that there were no districts with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification.

Calculation

To determine the percent of districts, WDPI divided 0 (0 districts with over-representation plus 0 districts with under-representation) by 444, the total number of LEAs, times 100. The total number of LEAs includes 426 public school districts, 16 independent charter schools, , the Department of Corrections, and Department of Health and Family Services. The percent of districts with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification for the 2005-06 SY is 0%.

Discussion of Baseline Data

Because the criteria for identifying districts is based on three consecutive years of data, WDPI used data from the 2002-2003, 2003-2004, and 2004-2005 school years to calculate the baseline and identify districts with disproportionate over- and under-representation that was a result of inappropriate identification during the 2005-2006 school year.

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: Effective General Supervision Part B / Child Find

Indicator 11: Percent of children who were evaluated within 60 days of receiving parental consent for initial evaluation or, if the State establishes a timeframe within which the evaluation must be conducted, within that timeframe.

(20 U.S.C. 1416(a)(3)(B))

Measurement:

- a. # of children for whom parental consent to evaluate was received.
- b. # of children whose evaluations were completed within 60 days (or State-established timeline).

Account for children included in a but not included in b. Indicate the range of days beyond the timeline when the evaluation was completed and any reasons for the delays.

Percent =[(b) divided by (a)] times 100.

Overview of Issue/Description of System or Process:

Since 1973, Wisconsin state law has required an evaluation for initial eligibility be completed and a placement notice to be sent to parents within 90 days of receipt of a referral for evaluation by the local educational agency (LEA). In interim guidance issued by the WDPI in May 2005, LEAs were advised to observe both the state-established timeline and the federal 60-day requirement. In July 2006, the Wisconsin Statutes were amended to repeal the 90-day time limit and establish the 60-day time limit at 34 CFR 300.301(c)(1)(i).

The State uses its procedural compliance monitoring system to collect data on the 60-day time limit for initial evaluations. Each year beginning in 2006-2007, the state will gather monitoring data from one-fifth of the LEAs in the state through an LEA self-assessment of procedural requirements related to monitoring priority areas and SPP indicators. Each year the cohort of districts are representative of the state considering such variables as disability categories, age, race, and gender. Milwaukee Public Schools, the only LEA with average daily membership of over 50,000, is included in the sample each year. WDPI will include every LEA in the state at least once during the course of the SPP. The self-assessment of procedural requirements includes data on each of the SPP indicators including the number of youth aged 16 and above with an IEP that includes coordinated, measurable, annual IEP goals and transition services that will reasonably enable the student to meet post-secondary goals (indicator #13). LEAs will report the self-assessment results to WDPI, along with planned corrective actions. LEAs will be required to correct noncompliance as soon as possible, but no later than one year from identification. The State ensures data are valid and reliable by conducting statewide training for LEAs on how to conduct the self-assessment of procedural requirements and report results. This training is posted on the WDPI website for easy access when needed. The self-assessment includes standards for reviewing the requirement to ensure consistency of application. LEAs submit data electronically; WDPI staff review reports and conduct verification activities.

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

Sampling is not used to gather indicator #11 data within each LEA; LEAs report the data for all students whose parents provided consent to evaluate as part of an initial evaluation. LEAs do not use an average, but look at each case and determine the number of days. The self-assessment includes reporting the required measurements (a., b., and c. above) to WDPI. LEAs report the range of days beyond the timeline when eligibility was determined and any reasons for the delays. 2005-2006 data was collected in the fall of 2006, and data will be collected in this manner for each year of the cycle. To ensure reliability of data, WDPI provides training and standards in conducting the self-assessment. WDPI further conducts verification activities as part of the procedural compliance self-assessment process.

Baseline Data for FFY 2005 (2005-2006):

Data was collected from one-fifth (88/440) of the LEAs in the state. The percent of children with parental consent to evaluate, who were evaluated and eligibility determined within 60 days during the 2005-06 SY was 88.41%. The number of cases evaluated within the 60 days include cases meeting the 60-day time limit requirement at 34 CFR 300.301(c) and the exception at 34 CFR 300.301(d). Consent was received for 9,837 children. 2,984 children whose evaluations were completed with 60 days were determined not eligible. 5,713 children whose evaluations were completed within 60 days were determined eligible. 1,140 children were not evaluated and their eligibility determined within 60 days.

Measurement:

• # of children for whom parental consent to evaluate was received:	9,837
• # determined not eligible whose evaluations and eligibility determinations were completed within 60 days:	2,984
• # determined eligible whose evaluations and eligibility determinations were completed within 60 days:	5,713
• # of children not evaluated and their eligibility determined within 60 days:	1,140

Formula:

Percent = b + c divided by a times 100.

88.41% = (2984 + 5713) ÷ 9837 x 100

Indicate the range of days beyond the timeline when eligibility was determined and any reasons for the delays.

The range of days beyond the 60-day time line is 1 day to 290 days. Over half of the districts that did not complete the initial evaluation within the 60 day time line did so within 30 days or less beyond the 60-day time line. There was only one instance where the time frame extended to 290 days.

A significant number of districts reported the reason for the delay was that during FFY 2005 districts continued to follow only the 90-day time limit under prior state law. Over half of the districts that did not complete the initial evaluation within the 60-day time line did so within the prior state law 90-day time limit. Districts reported that the 60-day timeline is now being fully implemented. Consequently, WDPI expects that the percentage of timely initial evaluations will increase next FFY.

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

Account for children included in a. but not included in b. or c.

1,140 children, or 11.59 %, were not evaluated and their eligibility determined within 60 days. Reasons for the delays include: change in state and federal law, unavailability of staff, outside evaluation data unavailable, scheduling problems, additional testing required, and school holidays.

Discussion of Baseline Data:

LEAs reported data on their total population of children for whom parental consent to evaluate was received as part of an initial evaluation. Sampling is not used to gather indicator #11 data within each LEA; LEAs report the data for all students whose parents provided consent to evaluate as part of an initial evaluation. LEAs do not use an average, but examine each case and determine the number of days. The data collected was from FFY 2005.

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: Effective General Supervision Part B / Effective Transition

Indicator 12: Percent of children referred by Part C prior to age 3, who are found eligible for Part B, and who have an IEP developed and implemented by their third birthdays.

(20 U.S.C. 1416(a)(3)(B))

Measurement:

- a. # of children who have been served in Part C and referred to Part B for Part B eligibility determination.
- b. # of those referred determined to be NOT eligible and whose eligibility was determined prior to their third birthdays.
- c. # of those found eligible who have an IEP developed and implemented by their third birthdays.
- d. # of children for whom parent refusal to provide consent caused delays in evaluation or initial services.
- e. # of children who were referred to Part C less than 90 days before their third birthdays.

Account for children included in a but not included in b, c, d or e. Indicate the range of days beyond the third birthday when eligibility was determined and the IEP developed and the reasons for the delays.

Percent = [(c) divided by (a – b – d - e) times 100.

Overview of Issue/Description of System or Process:

WDPI and the Wisconsin Department of Health Services (WDHS), the Part C lead agency, worked collaboratively to develop an electronic referral and reporting system to ensure children participating in county Birth to 3 programs (Part C) experience a smooth and effective transition to early childhood programs (Part B). Beginning with the 2008-09 data collection, county Birth to 3 programs use the Program Participation System (PPS) to refer children in county Birth to 3 programs to the local educational agency (LEA) for special education. LEAs receive these referrals electronically and submit data for Indicator 12 through PPS. In addition to ensuring a smooth and effective transition, this new data collection system promotes accurate reporting of data. LEAs report child-specific data on a real-time basis. This allows for monitoring of progress on Indicator 12 by the LEA and WDPI.

To assure accurate and timely reporting of data using the new data collection system, Directors of Special Education were required to:

- 1.) View the WDPI Mediasite webcasts (accessible from the Indicator 12 webpage) entitled:
 - a. "Program Participation System (PPS): Security Coordinator Training" and the accompanying demonstration;
 - b. "Program Participation System (PPS): Indicator 12 Module, LEA Training" and the accompanying demonstration; and
 - c. "Ready-Set-Go Ensuring a Smooth Transition from Birth to 3 to Special Education"
- 2.) Obtain a Web Access Management System (WAMS) ID as the Security Coordinator via the WAMS link on the Indicator 12 webpage. Register their WAMS ID with DPI to access PPS. WAMS ID have been submitted to DPI by October 17, 2008, via the Special Education

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

Web Portal.

3.) Identify who in the district will be designated to receive referrals from county Birth to 3 Programs, set-up their access in PPS via the Wisconsin Integrated Security Application (WISA) link on the Indicator 12 webpage, and ensure they receive training on PPS.

Additional Technical Assistance

- WDPI and WDHS offered five regional training opportunities in October for Directors of Special Education and LEA staff to learn more about PPS and to network with county Birth to 3 staff.
- In November 2008, WDPI presented information on PPS at the State Superintendent's Conference on Special Education & Pupil Services Leadership Issues. A panel of Directors of Special Education and county Birth to 3 providers shared effective strategies and experiences for ensuring a smooth transition.
- Technical assistance was also made available from CESA Early Childhood Program Support Teachers (PSTs), the Regional Service Network (RSN) Directors, County Birth to Three RESource staff, and the WDPI Early Childhood Consultant.

Baseline Data for FFY 2004 (2004-2005) (reporting period July 1, 2004, through June 30, 2005):

a. # of children who have been served in Part C and referred to Part B for eligibility determination:	2,717
b. # of those referred determined to be NOT eligible and whose eligibilities were determined prior to their third birthdays:	375
c. # of those found eligible who have an IEP developed and implemented by their third birthdays: This data set does not allow WDPI to determine if the IEP was developed and implemented by their third birthdays or if a parent refused services.	1,847

Data Source: DHFS

Actual Target Data for 2005-06:

The percent of children referred by Part C prior to age 3, who are found eligible for Part B, and who have an IEP developed and implemented by their third birthdays for the 2005-06 SY was 65.6%.

a. # of children who have been served in Part C and referred to Part B for eligibility determination:	2,829
b. # of those referred determined to be NOT eligible and whose eligibilities were determined prior to their third birthdays:	215
c. # of those found eligible who have an IEP developed and implemented by their third birthdays:	1,618
d. # of children for whom parent refusal to provide consent caused delays in evaluation or initial	147

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

services:	
-----------	--

Calculation: $1,618 / (2,829 - 215 - 147) = 65.6\%$

Data Source: Local Performance Plan (LPP).

Account for children included in a but not included in b, c, or d:

90 of those referred were determined to be NOT eligible and whose eligibilities were determined after the third birthdays.

715 of those referred were found eligible and had an IEP developed and implemented after their third birthday.

44 of those referred reported delays in their eligibility determination for reasons other than parent refusal to provide consent.

The range of days beyond the third birthday when eligibility was determined and the IEP developed: 1 to 365.

The reasons for the delays include:

- The referral was not made by Part C to the school district at least 90 days prior to the child's third birthday.
- The child was not available for the evaluation due to various circumstances such as being hospitalized, moving out of district, or family circumstances.
- The child moved into the district after the initial referral had been made.
- Parents did not provide timely consent for the evaluation.

Data Source: Local Performance Plan (LPP)

To ensure valid and reliable data for the required measurement, WDPI developed an electronic data collection system as part of the Local Performance Plan (LPP) for the purpose of collecting data for this indicator. Beginning with the 2005-06 school year, all districts are required to submit this data annually via their LPP for all children referred from Part C. The following data elements are collected through this electronic system:

- The number of referrals received from Part C to Part B between July, 1, 2005, and June 30, 2006.
- The number of students whose eligibility was not determined and the reasons for the determination not being made.
- The number of students found to be not eligible by their third birthday.
- The number of students found to be not eligible after their third birthday, the range of days beyond their third birthday, and the reasons for the delays.
- The number of students found to be eligible and whose IEP was developed and implemented by their third birthday.
- The number of students found to be eligible and whose IEP was developed and implemented after their third birthday, the range of days beyond their third birthday, and the reasons for the delays.

These data elements collected through this electronic data collection system allow WDPI to report the percent of children referred by Part C prior to age 3, who were eligible for Part B and who had an IEP developed and implemented by their third birthdays. WDPI staff reviewed the submitted data and contacted districts when reporting errors are identified. Districts resubmitted corrected data as necessary.

Discussion of Baseline Data:

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

Baseline data reported for the 2004-05 SY above was collected by DHFS and reported to WDPI. In an effort to determine the number of children found eligible who have an IEP developed and implemented by their third birthdays, DHFS conducted a review of exit codes for children turning 3 as reported by county agencies during 2004. DHFS determined the state average of children reported under "Code 24 – turned 3, special education eligibility not determined," and identified 18 counties that used this code at a percentage higher than the state average. Code 24 may be used for a child who was referred for an evaluation to determine special education eligibility, but eligibility was not determined by an IEP team by the time the child exited the Birth to 3 system. The 18 counties were contacted by DHFS and asked to identify the reasons that children in their county were reported under Code 24. They were asked to consider: 1) Did the county program make the referral to the school at least 90 days prior to the child's third birthday? 2) Did the child have a summer birthday? 3) Was the child ultimately found eligible for special education services? 4) Does this closing reason more typically apply to children who reside in certain districts?

DHFS determined three primary reasons why Code 24 was used: 1) 60% of the counties used the code incorrectly to report children who were not referred either because parents refused or the Birth to 3 team felt a referral was not appropriate. The codes have since been revised to capture this information. 2) The child was referred later than the 90-day timeline because parents had not made a decision or the child came in contact with the Birth to 3 program after age 33 months. 3) Schools did not complete the IEP process in time, usually because of the summer break. This occurred primarily in districts that have little experience with Birth to 3 transitions. WDPI will work collaboratively with DHFS to provide training and technical assistance to ensure that children found eligible have an IEP developed and implemented by their third birthdays (see improvement activities below).

The number of children referred from Part C to Part B appears to be holding steady for the past two years. Further analysis indicates a lower percentage of referrals were found not eligible than the previous year. However, due to an incomplete data set, it is not possible to make additional comparisons between the 2004-05 baseline data and the 2005-06 progress data. For the 2004-05 baseline data, WDPI did not use the required measurement in reporting data. The State provided data regarding the percent of children referred by Part C who were found eligible by their third birthday, not, as required, the percent of children referred by Part C prior to age 3, who were found eligible for Part B, and who had an IEP developed and implemented by their third birthday. WDPI relied on data collected by the Department of Health and Family Services (DHFS). DHFS did not have firsthand knowledge as to whether or not an IEP was developed and implemented by a child's third birthday since this is WDPI's responsibility. For the 2005-06 SY, WDPI developed its own data collection system in order to include the required data and calculations in reporting performance on this indicator. WDPI collected this data from LEAs with direct access to placement data. WDPI provided written instructions and technical assistance to assist LEAs in their data reporting. LEAs were required to report data for the 2005-06 SY by December 2006.

With the submission of the State's FFY 2005 APR, the State requested permission from the Office of Special Education Programs to use the 2005-06 data to set a new baseline of 65.6% due to missing data elements not collected during the 2004-05 SY (see reasons above). OSEP accepted the revision to the baseline.

	<p>strategies to correct timelines. The Cross Department Transition Team meets to review and analyze these plans and to develop a coordinated approach to improvement activities.</p> <p>This team will continue to monitor progress of transition data by examining data and analyzing strategies that result in improvement.</p>									
12 A B E	<p>Data Collection System</p> <p>While Wisconsin is developing a coordinated electronic data collection system between Birth to 3 and Part B, LEAs will annually report the required measurements to WDPI using their Local Performance Plans.</p> <p>WDPI will work to incorporate the needed data elements into an individual student record data collection system. This work will be accomplished through the General Supervision Enhancement Grant (GSEG) in partnership with DHS to build a comprehensive birth-6 longitudinal data system. The GSEG will allow WDPI to accomplish the following goals:</p> <ol style="list-style-type: none"> 1. Create a data system with a single identifier number to better inform state and local providers and schools. 2. Develop an accountability measurement method that enables local providers to reliably, efficiently, and consistently collect and report information related to the transition from Part C to Part B services. 3. Develop a technology solution that bridges existing data systems, provides a mechanism to collect and disaggregate child and family outcome data, is responsive to local providers and families, and maintains high levels of confidentiality. 4. Build the state and local infrastructure that includes policies and professional development to ensure that data-based decisions result in program improvements. <p>Both WDHS and WDPI have made efforts to improve their existing data systems to more accurately capture the specific required elements of the transition indicators. Although these systems have significant limitations, they</p>	X	X	X	X					<p>GSEG</p> <p>GSEG Consultant</p> <p>DHS & DPI Consultants</p> <p>DHS & DPI IT</p> <p>(cross department technology and program workgroups)</p>

State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	represent improvement over the capacity in previous years. WDHS and WDPI through their General Supervision Enhancement Grant (GSEG) have made great progress in developing a shared data system to capture more accurately transition information. This system will allow for encounter reporting through web access. The system is being created by WDHS under the leadership of a cross department technology and program workgroup. This system is built upon a Birth to 3 program database in which service providers enter identifying information about a child that is preparing for transition, including dates of the Transition Planning Conference. This shared data system will inform the LEA that they will receive a referral for this child. As the LEA moves through the eligibility determination process, they will enter information regarding eligibility status and date of IEP implementation for children determined to be eligible. The system will generate both monitoring and summary reports for both WDHS and WDPI.									
12 D E G	<p>Interagency Agreements</p> <p>WDPI and WDHS have created an advisory workgroup to guide the revision of current state interagency agreements related to Part C and Part B. The plan for this work includes a meeting of primary state partners, regional focus groups to identify practice issues, and implementation and training on the revised interagency agreement. The intent is to utilize the state agreement as a template for local early intervention and early childhood special education programs to develop local agreements. The activities associated with transition between programs including referral, transition planning conferences, and development and implementation of IEP by the child's 3rd birthday are important aspects of the interagency agreements.</p> <p>The Interagency Agreement Workgroup with members from DPI and DHS is preparing a new state interagency agreement that describes the responsibilities of each department specific to implementing IDEA 2004 and state policy. The transition of children between Birth to 3 and LEAs including LEA notification and transition planning conferences are major components of the revised agreement. Drafts of the Agreement will be finalized based upon issuance of IDEA Part C final regulations. The group has gathered input from</p>	X	X	X	X	X	X	X	X	WDPI & WDHS Cross-Agencies Workgroup

	local school districts and Birth to 3 programs, including tribal programs, regarding suggested content for the new interagency agreement. The departments will issue a joint bulletin/memo to county Birth to 3 programs and LEAs when the interagency agreement is finalized.									
12 A B	Program Participation System (PPS) PPS was developed jointly by the WDPI and WDHS (Part C) to collect data on children who transition from Part C to Part B. County Birth to 3 programs make electronic referrals to LEAs via PPS. LEAs record data for Indicator 12 in PPS.					X	X	X	X	Cross Department Transition Team
12 C D	Program Support Teacher Meetings Each year, the program consultants on the Special Education Team design and host program support meetings for interested stakeholders, including parents, school district staff, educational administration, paraprofessionals, and higher education faculty. The overarching goal of these program support meetings is to disseminate innovative information and current resources to the field. At these meetings, program consultants typically present information and training aimed at reducing the graduation gap and dropout rates. Specific topics include research-based strategies to increase student engagement, establish a positive school climate, increase options for student learning, and enhance staff knowledge and skills. These opportunities will continue in future years.						X	X	X	WDPI Early Childhood Special Education Consultant
12 C D	Training and Technical Assistance The Cross Department Transition Team is working to deliver common expectations regarding timely referral from Part C to B, participation of LEA in the transition planning conferences, IFSPs with transition steps, and LEA notification. One of the strategies for creating these common expectations and understanding of IDEA 2004 requirements is through the network of training and technical assistance providers. This network includes the Regional Service Network Directors, Birth to 3 RESource regional staff and early childhood program support teachers located in larger school districts and the CESAs. This network facilitates local meetings of Birth to 3, LEAs, and other community programs such as child care and Head Start as they develop interagency agreements. This network also coordinates the delivery	X	X	X	X	X	X	X	X	Cross Department Transition Team Birth to 3 RESource regional staff Early Childhood Program Support Teachers Regional Service Network Directors

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: Effective General Supervision Part B / Effective Transition

Indicator 13: Percent of youth with IEPs aged 16 and above with an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs. There also must be evidence that the student was invited to the IEP Team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority.

(20 U.S.C. 1416(a)(3)(B))

Measurement:

<p>Percent = [(# of youth with IEPs aged 16 and above with an IEP that includes appropriate measureable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs. There also must be evidence that the student was invited to the IEP Team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority) divided by the (# of youth with an IEP age 16 and above)] times 100.</p>
--

Overview of Issue/Description of System or Process:

The Wisconsin Department of Public Instruction (WDPI) has a long history of providing leadership and funding for a statewide systems change grant project known as the Wisconsin Statewide Transition Initiative (WSTI). The primary purpose of this project is to assist local educational agencies (LEAs) in addressing the transition requirements of the Individuals with Disabilities Education Act (IDEA). The WSTI state discretionary project features a comprehensive approach to providing transition services in Wisconsin. Twelve Cooperative Educational Service Agency (CESA) transition coordinators, a Milwaukee Public Schools transition coordinator, a project director, and a WDPI transition consultant offer comprehensive transition support services, information dissemination, and staff development to parents, students, education professionals, and community agency professionals throughout Wisconsin. WSTI coordinators provide technical assistance for Indicator 13 through CESA networking meetings.

In FFY 2012, WDPI implemented a web-based Individualized Education Plan: Postsecondary Transition Plan (PTP) application to collect Indicator 13 data from all LEAs with students aged 16 and above with an IEP. The PTP also ensures every student's IEP meets state and federal transition requirements. Individualized Education Program (IEP) teams develop a student's transition plan using the PTP in real time during an IEP team

meeting. Indicator 13 data is collected through the online application on an ongoing basis. Beginning in FFY 2012, the PTP is the state data system for monitoring Indicator 13 requirements. WDPI identifies a point in time during the SPP/APR reporting period when it reviews compliance data from the database and identifies noncompliance. In making compliance decisions, WDPI reviews all data it has received since the last time the State examined data from the database and made compliance decisions. WDPI makes findings of noncompliance and notifies LEAs when the data indicates noncompliance with the Indicator 13 transition requirements. WDPI verifies all identified noncompliance is corrected within one year.

Baseline Data for FFY 2009 (2009-2010):

With the revised Indicator 13 measurement in FFY 2009, OSEP directed States to set a new baseline. WDPI gathered data for Indicator 13 from 87 LEAs that performed the *Procedural Compliance Self-Assessment* (including Milwaukee Public Schools) during 2009-2010. LEAs were instructed to create a random sample of IEPs of youth 16 and above. During the 2009-10 school year, IEPs of 1,202 youth aged 16 and above were reviewed using the NSTTAC Indicator 13 Checklist. Of these IEPs, 856 met the standards for Indicator 13. The percent of youth aged 16 and above with an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs; evidence that the student was invited to the IEP Team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority for the 2009-10 school year is 71.21% (856/1202).

Indicator 13 Measurable and Rigorous Targets:

The targets for this indicator are set by OSEP.

FFY	Measurable and Rigorous Target
2010 - (2010-2011)	100% of youth with IEPs aged 16 and above have an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs. There also must be evidence that the student was invited to the IEP Team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority.
2011 - (2011-2012)	100% of youth with IEPs aged 16 and above have an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs. There also must be evidence that the student was invited to the IEP

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: Effective General Supervision Part B / Effective Transition

Indicator 14: Percent of youth who are no longer in secondary school, had IEPs in effect at the time they left school, and were:

- A. Enrolled in higher education within one year of leaving high school.
- B. Enrolled in higher education or competitively employed within one year of leaving high school.
- C. Enrolled in higher education or in some other postsecondary education or training program; or competitively employed or in some other employment within one year of leaving high school.

(20 U.S.C. 1416(a)(3)(B))

Measurement:

- A. Percent enrolled in higher education = [(# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education within one year of leaving high school) divided by the (# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school) times 100.
- B. Percent enrolled in higher education or competitively employed within one year of leaving high school = [(# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education or competitively employed within one year of leaving high school) divided by the (# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school) times 100.
- C. Percent enrolled in higher education, or in some other postsecondary education or training program; or competitively employed or in some other employment = [(# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education, or in some other postsecondary education or training program; or competitively employed or in some other employment) divided by the (# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school) times 100.

Overview of Issue/Description of System or Process:

With the change in measurement in FFY 2009, Indicator 14 is considered a new indicator. Wisconsin has developed a new baseline using the language of the revised measurement table (May 2010), set new measurable and rigorous targets, and identified related improvement activities.

In preparation for the revised Indicator 14 data collection for the SPP, the Wisconsin Department of Public Instruction (WDPI) participated in teleconferences with the National Post School Outcomes Center (NPSO) and with the Office of Special Education Programs (OSEP), as well as

utilized materials and technical assistance from the NPSO Center and OSEP websites. The post high school outcomes survey questions, survey design, information dissemination, and improvement activities are discussed at monthly meetings of the Wisconsin State Community on Transition (WiCoT). Input was received from state and local educational agencies, representatives from the two state parent advocacy agencies, representatives from the labor market, institutes of higher education, vocational rehabilitation, and individuals with disabilities, including former and current high school students with disabilities.

Input on setting the targets was obtained by the State Superintendent's Advisory Council on Special Education. Ann Bailey of the North Central Regional Resource Center facilitated the Council meeting, discussion, and setting of the targets for Indicator 14. The Council represents a diverse stakeholder group including parents of children with disabilities, regular education, special education, school boards, charter schools, private schools, institutions of higher education, the Wisconsin Department of Corrections, the Wisconsin Department of Children and Families, and the Wisconsin Department of Health Services.

Procedures for Establishing a Representative Sample

The U.S. Department of Education, Office of Special Education Programs (OSEP), requires states to report the percent of youth who had individualized education programs (IEPs), are no longer in secondary school, and who have completed at least one term in a higher education program, been competitively employed, completed at least one term in a some type of postsecondary school or training program, or have been participated in some other type of employment at least one year of leaving high school. In order to collect this information, states may conduct a census of "leavers", or use a sample of "leavers", but every local educational agency (LEA) in the state must be included in the sample within the period of the State Performance Plan (SPP). Furthermore, any district with an average daily membership of more than 50,000 students must be included in the sample each year.

For purposes of this survey, local educational agency (LEA) includes Wisconsin public school districts, the Wisconsin School for the Deaf (WSD), the Wisconsin School for the Visually Handicapped (WSVH), the Department of Corrections (DOC), and the Department of Health Services (DHS). "Leaver" means the student exited their high school education setting with a regular diploma, a modified diploma or certificate of attendance, left at maximum age of eligibility for special education and related services, or exited prior to graduation (dropped out).

Wisconsin has elected to implement a sampling plan to collect Indicator 14 data from LEAs. Sampling is completed without replacement, meaning each district participates once during a six-year period of the SPP. One district, Milwaukee Public Schools (MPS), has more than 50,000 students and is included in the survey each year. Each LEA sample is representative of all LEA "leavers" for race/ethnicity, disability categories and exit type. The State ensures each of the LEAs participates at least once every six years and annually includes Milwaukee Public Schools in the data collection. To create the sample, Wisconsin's LEAs were divided into five cohorts of approximately 88 LEAs. Each year, the sample is representative of the state population of "leavers" with disabilities. Averages were computed for incidence of gender, race/ethnicity, disability categories, and district size across one-fifth of the districts in the state and for the state as a whole. Comparisons between the selected LEA averages and the state averages are calculated to assure there are no statistical differences between the sample and the statewide averages on any of the demographic variables. If differences in the incidence of students with disabilities are present among districts, it will be possible to sample in a manner that accounts for those differences in the composition of the sample. This will ensure the distribution of students with IEPs form a representative sample when aggregated statewide. The goal in the sampling process is to maximize the similarity between the sample and the population while minimizing the differences and sampling error. If warranted, the analysis and correction of non-responders, poor response

rate, and selection bias will be conducted. The amount of acceptable sampling error will be plus or minus 3% at the 95% confidence level. Prior to sampling, the State's sampling plan was submitted to OSEP and approved. There has been no change in the approved sampling plan.

Results are reported annually to the public to guide program improvement efforts that will positively affect the educational achievement of students with IEPs.

Survey Methods

The Department contracts with Cooperative Educational Service Agency (CESA) 11 to conduct the Wisconsin Statewide Post High School Outcomes Survey. Each year, student data is entered into an Excel database through direct data transfer from the WDPI to CESA 11, and includes the sampling variables used to select the representative sample for the school year. All students with IEPs who are "leavers" in the selected districts are included when creating the representative sample. The survey includes all students with disabilities who completed school during the prior school year, who dropped out during the prior school year or who were expected to return but did not return for the current school year. Students who complete the spring semester of the previous school year but were not enrolled by the third Friday in September of the current school year are considered summer dropouts or "no shows." Summer dropouts are not counted as dropouts for the previous year. A dropout would be counted for the current school year if the student is not re-enrolled by the count date of the following school year.

Since 2000, data for Indicator 14 have been collected via a telephone survey by St. Norbert College Survey Center. Working under the direction of CESA 11, St. Norbert has conducted the interviews for the Wisconsin Statewide Post High School Outcomes Survey to ensure consistent inter-rater reliability. The data collection system is designed to ensure a strong response rate from former students and to provide valuable district data in addition to statewide data.

The following data collection activities occurred during the 2009-10 school year:

- Contact information on the exiting students was gathered by LEAs and reported to CESA 11 or securely held by the individual district.
- Between June 4 and Sept 17, 2010, data was collected on students who left school during 2008-2009. These students were contacted by telephone for an interview, timing the data collection so that at least one year had passed since the students left school.
- Responses were entered by St. Norbert College Survey Center on a web-based survey site (www.posthighsurvey.org) that allows for immediate data entry and retrieval.
- The interviews assessed former students' participation in adult living activities, participation in higher education and other types of postsecondary education and training, and participation in competitive and other employment at least one year of exiting high school.
- Additionally, youth participation in high school employment and IEP preparation were assessed.
- Data results may be disaggregated by the SEA and LEA by gender, ethnicity/race, disability and exit type.

Response Rates

Baseline data from the FFY 2009 interviews for Indicator 14 were collected from 143 LEAs, including Milwaukee Public Schools. All 2008-09 school year "leavers" with disabilities from these districts were included in the FFY 2009 survey, and were attempted to be contacted by St. Norbert's.

A response rate is one measure of the level of success or quality achieved in collecting survey data. It is the ratio of the number of completed surveys (the Respondent Group) to the total number of surveys intended to be completed (the Target Leaver Group). The table below summarizes what is known about the 2008-09 school "leavers".

Table 1. FFY 2009 Survey Response Status of 2008-09 School "leavers"		
	Count	Percent
Total School "leavers" in Sample	2982	100%
"leavers" successfully contacted	1198	42%
Ineligible Contacts	-125	4%
Total Eligible "leavers" in Sample	2857	100%
No Contact/Lost to Follow-up	1784	62.4%
Eligible: Refused/Unavailable	183	6.4%
Eligible: Completed Survey	890	31.2%

Table 1 indicates all 2008-09 "leavers" in the statewide sample (2982) were attempted to be contacted. Of the 1198 (42%) school "leavers" successfully contacted, 125 (4%) had returned to high school, never actually graduated, graduated more than one year from the survey date or were deceased, and therefore ineligible to participate in the post school outcomes survey. Another 183 (6%) declined to complete the survey, and 1784 (62%) of the school "leavers" were unable to be located. At the end of the survey period, there were 890 (31%) completed surveys for FFY 2009. This is 2% higher than for FFY 2008.

The response rate for the FFY 2009 survey is 31%, and reflects a confidence level of 95% +/- 2.73%, which meets the desired 95% +/-3% level. The confidence level indicates the data present a statistically valid level of confidence from which to draw comparisons between the target leaver group and the respondent group.

A review of the reasons for unsuccessful contacts indicates a high percentage of youth (44%) who were attempted to be contacted could not be reached because the interviewer was unable to locate a current phone number and the phone number provided by the district was not successful (e.g. the former student moved, the phone was disconnected, there was no forwarding phone number, the phone number was unable to be located, or there was no contact after more than six attempts). This is much lower than FFY 2008 reporting of 59%, and reflects much hard work on the part of the LEA in verifying at least one valid phone number prior to the beginning of the interviews. However, successfully contacting "leavers" one year after leaving high school continues to be a challenge.

Representativeness and Selection Bias

The validity of the data determines whether the respondent group (Statewide Respondents) is representative of the target group (Statewide Sample) and allows for more generalization of those results back to the target group. Collecting data from a sufficient number of individuals from either a census or a representative sample allows representation of what is actually occurring in the state and enables more accurate programmatic decisions to be made during state and/or local decision-making. Table 2 shows this comparison.

Table 2.
Representativeness of
FFY 2009 Wisconsin
Statewide Sample and
Statewide Respondents

NPSO Response Calculator		Representativeness								
	Overall	LD	ED	MR	AO	Female	Minority	ELL	Dropout	
Target Leaver Totals	2857	1476	519	335	527	968	684	0	327	
Response Totals	890	477	110	125	178	292	142	0	14	
Target Leaver Representation		51.66%	18.17%	11.73%	18.45%	33.88%	23.94%	0.00%	11.45%	
Respondent Representation		53.60%	12.36%	14.04%	20.00%	32.81%	15.96%	0.00%	1.57%	
Difference		1.93%	-5.81%	2.32%	1.55%	-1.07%	-7.99%	0.00%	-9.87%	
Note: positive difference indicates over-representation, negative difference indicates under-representation. A difference of greater than +/-3% is highlighted in red. We encourage users to also read the Westat/NPSO paper Post-School Outcomes: Response Rates and Non-response Bias, found on the NPSO website at http://www.psocenter.org/collecting.html .										

Wisconsin Disability Categories Equivalents: LD = Learning Disability (LD), ED = Emotional/Behavioral Disability (EBD), MR = Cognitive Disability (CD), AO = Low Incidence Disabilities (LI)

The NPSO Indicator 14 Response Calculator was used to calculate the representativeness of the respondent group on the characteristics of gender, ethnicity/race, disability, and exit type. The Response Calculator identifies significant differences between the Respondent Group and the Target Leaver Group. Negative (-) differences indicate an under-representation of the group and positive (+) differences indicate over-representation. In the Response Calculator, red color is used to indicate a difference that exceeds a $\pm 3\%$ interval.

- Gender – Male and Female respondents are equally represented.
- Ethnicity/Race - Minority respondents are underrepresented when compared to white respondents. When reviewing the response rates for subcategories of race, it is noted that Asian and Hispanic youth are representative of the Target Leaver Group, while African American youth are underrepresented; this trend is noted mainly in the state's largest districts. Minority youth were much more likely to have a non-viable phone number than white youth. Caution should be used when interpreting outcomes of minority youth, as their responses may not be representative of all minority youth with disabilities.
- Disability – Youth with Emotional/Behavioral Disabilities are slightly underrepresented. Caution should be used when interpreting outcomes of youth with EBD, as their responses may not be representative of all "leavers" with EBD.
- Exit Type – "leavers" who dropped out are significantly underrepresented when compared to "leavers" with a regular diploma, who reached the maximum age of eligibility for services, or received a certificate of attendance. Caution should be used when interpreting outcomes of youth who dropped out of school, as their responses may not be representative of all youth with disabilities who dropped-out.

The under-representativeness of youth in the categories of minority, EBD and drop-out could be attributed to the fact that these youth, in general, are difficult populations to locate, a trend that has been observed consistently throughout prior survey years. Respondents were not overrepresented in other categories, strategies will be developed that specifically addresses locating these populations. Current improvement strategies to contact minority and drop-out individuals seem to be effective, as evidenced by a closer representativeness from FFY 2008 to FFY 2009. These strategies will continue to be implemented in future data collections, and new districts will be alerted to this difficulty prior to interviewing so an extra effort can be made to locate at least one valid, working phone number for these youth.

Missing Data

An analysis of the missing data is conducted to determine patterns of missing information (i.e., did missing data vary across districts, disability categories, etc.). To address the missing and invalid contact information, to continue to improve response rates, and to address selection bias, several strategies were implemented.

- LEAs were asked to verify former student phone numbers in March and April after the student exited but prior to interviewing in June – September. To assist districts in strategies for locating current leaver phone numbers, the document “Improving Response Rates: A Special Message to Wisconsin Director of Special Education and Special Education Teachers” (based on the National Post School Outcomes Center resource “*Collecting Post-School Outcomes Data: Strategies for Increasing Response Rates*”) was created and shared with districts in their outcomes data collection year.
- District directors of special education were contacted when the survey center finished contacting all district “leavers” and given additional time to locate a working phone number. The survey center then attempted to again contact former students with the updated phone numbers.
- To better help youth and families understand the purpose and importance of participating in the survey, a document entitled “A Special Note to Youth and Families” (based on the National Post School Outcomes Center resource “*Post-School Outcomes Survey: Coming Soon to a Student Near You!*”) was created. LEAs included in the sample year were encouraged to share the Wisconsin document, along with a copy of the survey questions, with youth and families during the youth’s senior or final IEP meeting. By informing youth and parents about the upcoming survey, it seems that fewer declined to participate in the survey this year than last year when successfully contacted. A lower percent of youth declined to be interviewed this year (8%) than last year (9%) and the previous survey year (12%). This practice will be continued.
- Prior to beginning the survey, time was spent identifying possible sources of respondent and non-response bias. The statewide sample was selected consistent with the other sampling indicators. St. Norbert College Survey Center, an independent survey center, was hired to make the calls. They made up to six attempts to contact each former student in the sample, calling early morning, daytime, evenings and weekends to avoid selecting only those respondents home during the day. To prevent language barrier selection bias, interviewers conducted the interviews in other languages when requested (St. Norbert College Survey Center is housed next to the International Studies Program, where they have trained bilingual interviewers), and a special operator (TTY) was used in one interview. Youth were contacted in jail and the military when possible.
- Even with the concentrated efforts to call former students at various times throughout the day and evening, the largest school districts have had the lowest response rates. To address this, Milwaukee Public Schools hired four special education staff members to go to the homes of former youth to get current phone numbers. This effort resulted in additional completed surveys. While still under-represented when grouped as “minority,” American Indian, Asian and Hispanic respondents were representative of the youth in the sample. These extra steps have resulted in an increase in response rate from 15% for FFY 2008 to 20% in FFY 2009.

Baseline Data for FFY 2009 (2009-10):

Table 3 presents the Indicator 14 data components of youth engagement at least one year after leaving high school. To better understand this data, previous survey data was reviewed, including reviewing the responses of those who were never engaged or under-engaged. The current percentage of respondents who do not meet one of the criteria of Indicator 14 is 20.1%, which is close to the percentage of 21.2% who did not meet one of the criteria of Indicator 14 for FFY 2008 (2008-09). A closer review of this percentage indicates 14.0% have never been engaged in postsecondary education or employment, and 6.1% either had missing data elements or participated, but not to the level of the Indicator 14 criteria. FFY 2008 indicates 20.7% and .56%, respectively. This indicates fewer youth in FFY 2009 are reporting they never participated in any type of continuing education, training or employment than youth who were surveyed in FFY 2008.

Table 3. 2010 Wisconsin Statewide Indicator 14 Data for 2008-2009 "leavers"

All percentages based on current total of 890 statewide respondents

Data for Indicator 14 Categories	Count	Percentage
1. Higher Education <ul style="list-style-type: none"> Completion of at least one term at a 2-yr College or Technical College or 4-yr College or University - Regardless of participation in Employment or other Postsecondary Education or Training 	351	39.44%
2. Competitive Employment <ul style="list-style-type: none"> 90 consecutive or cumulative days in a community setting, working 20 hours or more per week and earning minimum wage or greater AND Never engaged in Higher Education and regardless of engagement in other Postsecondary Education or Training or Other Employment 	241	27.08%
3. Other Postsecondary Education or Training <ul style="list-style-type: none"> Completion of at least one term at any other short-term education or training program, humanitarian program or high school completion program AND Never engaged in Higher Education OR Competitive Employment and regardless of engagement in Other Employment 	18	2.02%
4. Other Employment <ul style="list-style-type: none"> 90 consecutive or cumulative days of employment in any setting AND Never Engaged in Higher Education OR Competitive Employment OR Postsecondary Education or Training Program 	101	11.35%

Post School Outcomes by Gender, Race/Ethnicity, Disability and Exit Reason

Much time and effort is spent reviewing outcomes by gender, ethnicity/race, disability and exit reason, and several reports are written which provide an in depth analysis on multiple levels. The WDPI has worked with the NPSO Center to create and implement a post high school data use toolkit and facilitator's guide to assist individual districts in data analysis of their local outcomes compared to statewide outcomes. Several reports are written which provide an in depth analysis on multiple levels.

Graph 1 shows the post high school engagement rate of youth with disabilities for gender and for disability areas. More females than males participate in all types of higher education programs; this is consistent with FFY 2008. In addition, a higher percentage of female youth than males had a paying job in the community while in high school, and more female youth than male youth disclose their disability and use accommodations and/or assistive technology at their place of postsecondary education. A significantly higher percentage of males than females are competitively employed, though more females report "other employment"; they are presumably working less than competitively to supplement their participation in post secondary education. When all areas of engagement are combined, males and females are engaged at approximately the same rate.

Graph 1 also indicates youth with cognitive disabilities are engaged in all post high school activities at a lower rate than other disability areas. A much higher percentage have never been engaged in higher education, other education, training or any type of employment. A significantly lower percentage report having a paying job in the community while they were in high school. A greater percentage of youth with low incidence disabilities participate in higher education than other disability areas, while fewer are competitively employed; again, presumably because they are engaged in a postsecondary education program.

While the outcomes of youth with emotional/behavioral disabilities should be interpreted cautiously because of underrepresentation of respondents, historically and for this survey year, outcomes indicate these youth are employed and are positively represented in competitive employment. However, many fewer youth with EBD report having a paying job in the community while they were in high school. Fewer also report have a valid driver's license one year after exiting high school or attending any type of postsecondary training program.

To address this, the Wisconsin Community on Transition (WICoT) has been working to serve difficult to reach youth with disabilities. The mission of WICoT is to build and support sustainable community partnerships that ensure youth and young adults with disabilities and special health care needs will transition successfully to adult life, including: competitive employment, education, training and lifelong learning, community participation, and adult health care. WICoT council members include high school and post high school members, so efforts and planning span from services for youth into young adulthood. In addition, this theme was carried forward into the Wisconsin Transition Conference in March 2010, where there was a record high participation rate.

Graph 1. Wisconsin FFY 2009 Indicator 14 Engagement Rates by Gender and Ethnicity

It should be noted that in addition to viewing outcomes data by the Indicator 14 components, which is a hierarchical unduplicated count of engagement, the SEA and LEA is provided with a duplicated count of participation in post high school activities. This way, the districts can view all the activities in which youth are engaged regardless of participation in just one thing. For example, if a youth was competitively employed during the summer months prior to college, then attended a 4-year college while maintaining a part-time job (e.g. 15 hours per week), the district can view all of these activities; under Indicator 14, only participation in higher education would be represented. Viewing the data two ways further assists the districts in developing improvement strategies.

Baseline and Measurable Indicator 14 Targets from FFY 2009 – FFY 2012

With input from the Wisconsin State Superintendent's Advisory Council on Special Education, WDPI set annual measurable and rigorous targets through FFY 2012. Ann Bailey, of the North Central Regional Resource Center, facilitated the discussion and setting of the targets for Indicator 14.

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

To assist in the consideration of the target options, WDPI presented baseline data and graphic representations of <1%, 5% and 8% increases over time. Minimal progression over time was immediately ruled out as all Council members believed more progress than that could be expected given the volume of transition-related activities occurring in the state for the past several years. After much consideration and discussion, the Council supported a 3% increase as most achievable within the timeframe, with all members understanding that obtaining an even higher rate of engagement would be the best outcome.

Graph 2 represents the baseline engagement rates of the Indicator 14 components of (A) higher education, (B) higher education plus competitive employment, and (C) education plus competitive employment plus other postsecondary education or training, plus other employment. The graph and table show steady gains for each of the Indicator 14 targets, with a total engagement rate that is just over 3% higher in FFY 2012 than FFY 2009.

Table 4 provides the actual target percentages.

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	analyze their own data by a collaborative staff team, to identify areas of need based on the data analysis, and to work towards a plan to address those needs building/district wide. To accomplish this statewide training, a "Train the Trainers" model was used. A two-day facilitated training was conducted for all Regional Service Network (RSN) directors and school improvement service (SIS) directors in the state. A model set of data was used for training purposes. After the RSN and SIS directors were trained, each CESA conducted trainings for its own school districts. Two follow-up meetings were conducted to provide support and technical assistance to those responsible for conducting special education data retreats. This data analysis component was further refined and integrated into Wisconsin's FM process as a beginning point for districts selected for FM and renamed the Focused Performance Review (FPR). Data continues to be disaggregated by disability area, and race/ethnicity whenever available.

14 C D	Program Support Meetings Each year, the program consultants on the Special Education Team design and host program support meetings for interested stakeholders, including parents, school district staff, educational administration, paraprofessionals, and higher education faculty. The overarching goal of these program support meetings is to disseminate innovative information and current resources to the field. At these meetings, program consultants typically present information and training aimed at reducing the graduation gap and dropout rates. Specific topics include research-based strategies to increase student engagement, establish a positive school climate, increase options for student learning, and enhance staff knowledge and skills. These opportunities will continue in future years.						X	X	X	Program Area Consultants
14 A B C D E F	Wisconsin Post High School Outcomes Survey (WPHSOS) Annually, from 1/5 of LEAs, WDPI collects data on post high school outcomes of youth with disabilities. Districts provide contact data of students the year prior to exit. St. Norbert Survey Center conducts a phone interview with students one year after exiting. The survey center makes multiple attempts to survey students. The WPHSOS provides training and technical assistance to St. Norbert and school districts to increase the accuracy of the data. Annually, a statewide Wisconsin Post High School Outcomes Survey (WPHSOS Summary Report (www.posthighsurvey.org)) is published in September and widely distributed throughout the year. To assist with determining improvement activities, data are disaggregated by gender, ethnicity, disability, and exit type. Districts have access to a Gender, Ethnicity, Disability, and Exit Type data chart, District Summary Report, District Report, Data Analysis Charts, and Improvement Planning Forms. Districts use the information to review their local outcomes in relation to local planning and improvement activities. The data analysis forms may be used in conjunction with the state-developed data retreat procedures, so districts can easily incorporate post high school outcomes data into analysis and improvement	X	X	X	X	X	X	X	X	WPHSOS Director WPHSOS Grant Transition Consultant

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: Effective General Supervision Part B / General Supervision

Indicator 15: General supervision system (including monitoring, complaints, hearings, etc.) identifies and corrects noncompliance as soon as possible but in no case later than one year from identification.

(20 U.S.C. 1416 (a)(3)(B))

Measurement:

Percent of noncompliance corrected within one year of identification:

- a. # of findings of noncompliance.
- b. # of corrections completed as soon as possible but in no case later than one year from identification.

Percent = [(b) divided by (a)] times 100.

States are required to use the "Indicator 15 Worksheet" to report data for this indicator (see Attachment A).

Overview of Issue/Description of System or Process:

Elements of the General Supervision System

The Wisconsin Department of Public Instruction (WDPI) worked in collaboration with the National Center for Special Education Accountability Monitoring (NCSEAM) to develop a general supervision system based on the six critical elements of general supervision described below. The details of the various elements are discussed in a number of the other indicators.

1) Measurable priorities – Through a stakeholder process, WDPI identified measurable priorities to address through its general supervision system. The priority areas include State Performance Plan (SPP) indicators and priority areas to be addressed through continuous improvement and focused monitoring. The measurable priority areas identified by stakeholders are the gap in graduation rates between students with disabilities and students without disabilities and the gap in 8th grade reading achievement between students with disabilities and students without disabilities. In addition, WDPI has identified racial disproportionality as a priority area to be addressed through a statewide initiative.

2) Establishment of effective model policies and procedures – WDPI ensures all local educational agencies (LEAs) have adopted policies and procedures that comply with IDEA 2004 and state law. Special education forms in use in LEAs will be reviewed to ensure compliance. Wisconsin's statewide initiative targeting racial disproportionality will also include a review of LEA policies, procedures, and practices that may be related to inappropriate identification.

As a condition of funding under the Individuals with Disabilities Education Act (IDEA), local educational agencies are required to establish written policies and procedures for implementing federal special education laws. In addition, Wisconsin law requires local educational agencies to establish written policies and procedures for implementing state and federal special education requirements. WDPI developed *Model Local Educational Agency Special Education Policies and Procedures* to help local educational agencies meet their obligation to establish and implement special education requirements. A local educational agency may establish special education requirements by adopting the model policies and procedures. The document may also be used as a reference tool and for staff development activities to promote understanding of and compliance with special education requirements. All LEAs are required to assure the department that they have adopted the model policies and procedures, or submit locally developed policies and procedures to the WDPI for review and approval.

WDPI provides sample forms and notices for use in the individualized education program (IEP) team process to assist districts in complying with state (Chapter 115) and federal (IDEA) special education requirements. The Sample Forms and the Reference Materials posted on the department's web site have been updated to reflect changes in the Individuals with Disabilities Education Improvement Act of 2004 that became effective July 1, 2005, and the regulations that became effective October 13, 2006. State statute requires all youth aged 14 and above have an IEP that includes coordinated, measurable, annual IEP goals and transition services that will reasonably enable the student to meet the post-secondary goals. WDPI provided model forms to all LEAs to assist with implementing the transition requirements. All LEAs are required to assure WDPI they have adopted the model forms and notices or submit their locally developed forms to the department for review and approval.

3) Data collection and analysis of program progress and results – WDPI collects data related to SPP indicators and priority areas through the LEA 618 data report, the Individual Student Enrollment System (ISES), and the LEA Local Performance Plan (LPP). For each school year, all Wisconsin LEAs, including charter schools, complete and submit an annual LPP to the WDPI for review. The LPP is an internet application and is the IDEA flow-through and preschool funding mechanism that must be completed in approvable form before a district may encumber and expend federal monies. Through the LPP, districts submit their IDEA flow-through and preschool budgets and provide assurance to WDPI of compliance with state and federal special education requirements. Districts are required to analyze their performance on specified indicators in the State Performance Plan, and develop and submit improvement activities for those indicators for which a district does not meet the established targets. The LPP is reviewed by a WDPI consultant assigned to work with the individual LEA. One component of the LPP is the Special Education District Profile, through which WDPI reports annually to the public on the performance of each LEA on the targets associated with Indicators #1-#14. The Special Education District Profile is used to analyze LEA performance on each of the indicators in the State Performance Plan (<https://www2.dpi.state.wi.us/DistrictProfile/Pages/DistrictProfile.aspx>). The Special Education District Profile includes; LEA data, state data, the target for each indicator, data sources for each indicator, and a link to more information about each indicator.

WDPI ensures the accuracy of data collected from LEAs through a variety of measures. In addition, WDPI reviews data from IDEA complaints, due process hearing decisions, and procedural compliance monitoring. The data collected through these systems has informed WDPI's establishment of priority areas, goals, and activities designed to achieve the goals and targets set out in the SPP.

4) Targeted training and technical assistance – Training and technical assistance focuses on priority areas established by stakeholders and SPP indicators. LEAs identified using the data systems described above receive targeted training and technical assistance to improve results for children, correct noncompliance, and address inappropriate identification resulting in racial disproportionality. IDEA funds support this targeted training.

5) Effective, responsive complaint process - The State has established effective, responsive systems for IDEA complaints, due process hearings, and mediation. These are described in indicator #15 below and indicator #19. Issues raised in these systems are considered in designing self assessment of procedural requirements required of all LEAs.

6) Meaningful focused monitoring – WDPI's Continuous Improvement and Focused Monitoring System (CIFMS) targets LEAs identified for improvement in the priority areas of graduation and 8th grade reading gap using data collected from LEAs. LEAs identified for improvement participate in a Focused Performance Review, drilling down in the data to develop hypotheses about poor outcomes for children. WDPI staff conduct onsite reviews to assist LEAs in identifying issues related to outcomes for children. LEA staff and WDPI staff collaboratively review results of these activities and develop an improvement plan. WDPI staff facilitate technical assistance for the LEA to meet the goals of its improvement plan. If noncompliance is identified during the CIFMS activities, the LEA is required to correct the noncompliance as soon as possible, but no later than one year after identification (see indicators #1 and #3). Also WDPI requires each LEA in the state to conduct a *Procedural Requirements Self-Assessment* focused on SPP indicators and other issues of statewide significance. LEAs develop a corrective action plan to timely correct noncompliance when it is identified. WDPI verifies LEA self-assessments through desk audits and site visits. The LEA self-assessment of procedural requirements is described below.

Compliance Monitoring

OSEP's March 10, 2010 verification letter required the State to, within 60 days from the date of OSEP's letter, provide to OSEP written documentation demonstrating that it revised its policies and procedures for determining timely correction of noncompliance, so that it determines that a finding of noncompliance has been corrected only if the LEA has both: 1. Is correctly implementing the specific regulatory requirements; and 2. Corrected each individual case of student-specific noncompliance (although late for timeline requirements) and verifies correction consistent with sections 612(a)(11) and 616 of the IDEA, 34 CFR §§300.149 and 300.600, and 20 U.S.C. 1232d(b)(3)(E), and with OSEP Memo 09-02.

In its April 15, 2010 response to OSEP, the State provided its revised policies and procedures (posted at <http://dpi.wi.gov/sped/osep-verif-visit.html>) for determining timely correction of noncompliance. With respect to the State's revised policies and procedures for determining timely correction of noncompliance, OSEP has determined that they are consistent with sections 612(a)(11) and 616 of the IDEA, 34 CFR §§300.149 and 300.600, and 20 U.S.C. 1232d(b)(3)(E), and with OSEP Memo 09-02. April 15, 2010, WDPI implemented these revised policies and procedures for determining timely correction of noncompliance.

Procedural Compliance Self-Assessment

Each year beginning in 2006-2007, the state will gather monitoring data from one-fifth of the LEAs in the state through an LEA self-assessment of procedural requirements related to monitoring priority areas and SPP indicators. LEAs conduct the self-assessment using a sample of student individualized education program (IEP) records. Each year the cohort of districts are representative of the state considering such variables as disability categories, age, race, and gender. Milwaukee Public Schools, the only LEA with average daily membership of over 50,000, is included in the sample each year. WDPI will include every LEA in the state at least once during the course of the SPP. The self-assessment of procedural requirements includes data on each of the SPP indicators including the number of youth aged 16 and above with an IEP that includes coordinated, measurable, annual IEP goals and transition services that will reasonably enable the student to meet post-secondary goals (indicator #13) and the percent of children with parental consent to evaluate, who were evaluated and eligibility determined within 60 days (indicator #11). LEAs will report the self-assessment results to WDPI, along with planned corrective actions. LEAs will be required to correct noncompliance as soon as possible, but no later than one year from identification.

Annually, WDPI will review all LEA self-assessments, conduct validation activities on a portion of the LEA self-assessments, and verify all identified noncompliance has been corrected. Based on its review, WDPI will provide technical assistance to LEAs, which may result in revisions to their planned corrective actions. LEAs will report the status of their corrective actions to ensure correction within one year of identification of the noncompliance. WDPI will verify that all noncompliance has been corrected within one year. LEAs failing to correct noncompliance within one year of identification will be required to report the reasons and the specific steps that will be implemented to correct the noncompliance. These LEAs will be assigned to a more intensive level of oversight.

State IDEA Complaints, Due Process Hearings, Mediations**Complaints**

WDPI is responsible for investigating complaints and issuing decisions within 60 calendar days of receipt of the complaint. WDPI staff review all relevant information and make an independent determination, based upon a preponderance of the evidence, about whether the district has met a requirement. WDPI's decision includes findings of fact and a conclusion for each issue. When the district already has taken child-specific or general action to correct noncompliance, the decision reflects the district's corrective measures. If the district must take additional corrective action, generally the decision includes a directive for the agency to submit to WDPI, within a specified time, generally within 30 days of the decision, a corrective action plan. The plan addresses each violation and specifies the time period, not to exceed one year from the date of the decision, within which compliance will be achieved. Complaint decisions occasionally specify the action to be taken and a time for correction. The directive addresses corrective actions appropriate to the specific child or children whose education is the subject of the complaint and corrective actions to insure appropriate future provision of services for all children with disabilities. If no corrective action is required, the letter includes a statement closing the complaint. The CAP or decision will include a date for submission of documentation that corrective activities have been completed. The complaint is closed when the WDPI verifies the LEA: 1.) is correctly implementing the specific regulatory requirements; and 2.) corrected each individual case of student-specific noncompliance.

Due Process

Currently there is a one-year state statute of limitations for due process hearing requests. A hearing is requested by sending a letter or a completed sample form to WDPI. The parent request includes the name and address of the child, the name of the school the child is attending, a description of the nature of the problem relating to the hearing request including the facts relating to such problem, and a proposed resolution of the problem to the extent known and available to the parents at the time. WDPI acknowledges receipt of a hearing request in a letter describing district responsibilities including the holding of a resolution session within 15 days of receiving the hearing request. When a hearing is requested, WDPI, by contract with the Wisconsin Department of Administration--Division of Hearings and Appeals (DHA), appoints an impartial hearing officer to conduct the hearing. Hearing officers are attorneys who receive an initial, and at least annual, training from WDPI regarding special education requirements. Except in cases requiring an expedited hearing, the hearing officer must issue a written decision based solely upon the evidence presented at the hearing within 45 days following completion of the 30-day resolution period or the day after one of the following events: (1) both parties agree in writing to waive the resolution meeting; (2) after either the mediation or resolution meeting starts but before the end of the 30-day period, the parties agree in writing that no agreement is possible; (3) if both parties agree in writing to continue the mediation at the end of the 30-day resolution period, but later, the parent or public agency withdraws from the mediation process. The hearing officer may extend the 45-day timeline, for cause, if the parent or the school district requests an extension. The hearing decision notifies the parties that, within 45 days after the

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

administrative law judge's decision has been issued, either party may appeal the decision to the circuit court for the county in which the child resides or to federal district court.

Baseline Data for FFY 2004 (2004-2005):

See Tables 15A, 15B and 15C.

Monitoring

See Tables 15A and 15C attached.

Complaints

In 33 of 34 investigations with findings, noncompliance was corrected within one year. (See below.)

Due process

There was one fully-adjudicated decision with a finding of noncompliance. WDPI did not determine whether correction was completed within one year. WDPI has since confirmed with the district that corrective action required through the hearing decision has been completed and noncompliance has been corrected.

Discussion of Baseline Data:

Compliance Monitoring

Baseline data was obtained from on-site monitoring of 22 LEAs during the 2003-2004 school year and correction of noncompliance within one year of identification during the 2004-2005 school year. These activities occurred prior to OSEP's development of the SPP priority areas and indicators. Therefore, many requirements monitored during the period are not related to an SPP indicator. The compliance monitoring system was redesigned to focus on assessing requirements related to the priority areas and indicators and other statewide issues. Based on OSEP's draft guidance on requirements related to indicators, WDPI performed an analysis of requirements monitored during the baseline period to determine if they were related to SPP indicators. Requirements were assigned to SPP indicators as appropriate.

Until 2004-05, WDPI's monitoring procedures did not require WDPI to verify correction of noncompliance within one year after the identification of the LEA's noncompliance. If the initial corrective action plan was not successful in correcting noncompliance, the LEA was required to implement a second or a third plan. The baseline percentage of noncompliance corrected within one year reflects WDPI monitoring procedures prior to 2004-05. Although procedures did not require WDPI to verify that noncompliance was corrected within one year of identification, more than one-third of noncompliance related to monitoring priority areas was corrected within one year of identification. Similarly, the low percentage for requirements not related to indicators reflects WDPI's procedures in place at the time. WDPI has since then required LEAs to correct all noncompliance within one year of identification. WDPI verifies correction using their two-pronged procedures ensuring current compliance and each individual case of noncompliance is corrected.

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

Complaints

During the baseline period, WDPI's complaint procedures did not require WDPI staff to verify the correction of noncompliance within a year of identification. During the period, 60 complaints were filed. The investigations of these complaints resulted in 34 decisions with findings that the districts' actions did not meet requirements for at least one issue. While WDPI's procedures did not require correction of noncompliance within one year of identification, WDPI verified correction of noncompliance for 33 decisions with findings within one year of identifying noncompliance. Often the investigations were closed within a matter of two to three months. In one investigation noncompliance was fully corrected six weeks beyond the one year deadline; however, child-specific corrective action was completed within several months following issuance of the decision.

Measurable and Rigorous Target

Targets for this indicator are set by OSEP.

FFY	Measurable and Rigorous Target
2005 (2005-2006)	100% of findings of noncompliance are corrected as soon as possible, but in no case later than one year from identification.
2006 (2006-2007)	100% of findings of noncompliance are corrected as soon as possible, but in no case later than one year from identification.
2007 (2007-2008)	100% of findings of noncompliance are corrected as soon as possible, but in no case later than one year from identification.
2008 (2008-2009)	100% of findings of noncompliance are corrected as soon as possible, but in no case later than one year from identification.
2009 (2009-2010)	100% of findings of noncompliance are corrected as soon as possible, but in no case later than one year from identification.
2010 (2010-2011)	100% of findings of noncompliance are corrected as soon as possible, but in no case later than one year from identification.
2011 (2011-2012)	100% of findings of noncompliance are corrected as soon as possible, but in no case later than one year from identification.

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

2012 (2012-2013)	100% of findings of noncompliance are corrected as soon as possible, but in no case later than one year from identification.

State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
C D G	<p>monitoring priority areas and SPP indicators. For indicator 11, LEAs conduct a review of all initial evaluations where parental consent was received during the reporting period. Each year, the cohort districts are representative of the state considering such variables as disability categories, age, race, and gender. Milwaukee Public Schools, the only LEA with average daily membership of over 50,000, is included in the sample each year. WDPI will include every LEA in the state at least once during the course of the SPP. The self-assessment of procedural requirements includes data on each of the SPP indicators including the percent of children with parental consent to evaluate, who were evaluated and eligibility determined within 60 days (Indicator #11). LEAs report the self-assessment results to WDPI, along with planned corrective actions. LEAs are required to correct noncompliance as soon as possible, but no later than one year from identification.</p> <p>To assure valid and reliable data, WDPI provides web-based training in how to conduct the self-assessment. The self-assessment checklist includes standards for reviewing the procedural requirements. Information about the self-assessment is posted on the WDPI website at http://sped.dpi.wi.gov/sped_spp-selfassmt.</p> <p>LEAs in each cohort of the Procedural Compliance Self-assessment conduct the self-assessment and report the percent of children with parental consent to evaluate, who were evaluated and eligibility determined within 60 days. For children found eligible whose evaluations and eligibility determinations do not meet the 60-day time limit requirement, LEAs must consider compensatory services as soon as possible. Each LEA's noncompliance is corrected through developing and implementing agency-wide corrective actions. The self-assessment process requires districts to have an internal district control system that further ensures future compliance with this requirement. WDPI staff provides technical assistance and conduct verification activities to ensure correction of noncompliance as soon as possible, but no later than one year after identification. WDPI annually publishes a report summarizing the findings</p>									LPP Consultants

Monitoring Priority: Effective General Supervision Part B		
Indicator	Measurement Calculation	Explanation
<p>15. General supervision system (including monitoring, complaints, hearings, etc.) identifies and corrects noncompliance as soon as possible but in no case later than one year from identification.</p> <p>C. Percent of noncompliance identified through other mechanisms (complaints, due process hearings, mediations, etc.) corrected within one year of identification:</p> <p>a. # of agencies in which noncompliance was identified through other mechanisms.</p> <p>b. # of findings of noncompliance made.</p> <p>c. # of corrections completed as soon as possible but in no case later than one year from identification.</p> <p>Percent = c divided by b times 100.</p> <p>Note: As of December, 2005, 100% of the noncompliance findings have been corrected.</p>	<p>a = 24</p> <p>b = 48</p> <p>c = 47</p> <p>47/48 = 98%</p> <p>98% of noncompliance identified through other mechanisms were corrected in a timely manner.</p>	<p>24 agencies had issues in the dispute resolution system where findings were made.</p> <p>There were 48 findings of noncompliance in the following areas –</p> <p>8 proper IEP 7 evaluation 4 records 3 transfer 3 suspension 23 properly implemented IEP</p> <p>47 of the findings were corrected within one year of identification</p> <p>The areas in which correction was not completed within one year were evaluation, suspension and IEP properly implemented (child-specific correction was completed within one year in all instances)</p> <p>Note: There were 4 additional findings made in due process. These are not included in the calculation because during the relevant time period there was no requirement for the department to ensure correction.</p>

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: Effective General Supervision Part B / General Supervision

Indicator 16: Percent of signed written complaints with reports issued that were resolved within 60-day timeline or a timeline extended for exceptional circumstances with respect to a particular complaint, or because the parent (or individual or organization) and the public agency agree to extend the time to engage in mediation or other alternative means of dispute resolution, if available in the State.

(20 U.S.C. 1416(a)(3)(B))

Measurement:

Percent = $[(1.1(b) + 1.1(c)) \text{ divided by } 1.1] \text{ times } 100.$

Overview of Issue/Description of System or Process:

The Wisconsin Department of Public Instruction (WDPI) is responsible for investigating complaints and issuing a decision within 60 calendar days of receipt of the complaint. A complaint must be in writing and signed, it must allege a violation of subchapter V of Chapter 115, Stats., state rules, the Individuals with Disabilities Education Act (IDEA) and/or 34 CFR Part 300, and it must set out sufficient facts to permit WDPI to initiate an investigation of the allegation. Parents periodically decide to withdraw complaints, often in light of action taken by the district in response to the complaint; and in such cases WDPI closes the investigation. WDPI sets aside a complaint issue when a due process hearing has been requested on the same issue. A complaint alleging an agency's failure to implement a due process decision will be resolved through the complaint procedures. WDPI may extend the 60-day time limit for exceptional circumstances such as the unavailability of necessary parties or information. WDPI carries out an independent investigation, on site if necessary. Department staff review all relevant information and make an independent determination, based upon a preponderance of the evidence, about whether the district has violated a requirement. WDPI's decision includes findings of fact and a conclusion for each issue.

Baseline Data for FFY 2004 (2004-2005):

See attachment 1.

Discussion of Baseline Data:

WDPI received 66 complaints during the period July 1, 2004, to June 30, 2005. Five complaints were withdrawn. One complaint was set aside because the issues were being addressed in due process, but has since been decided. Fifty-one complaints were resolved within 60 days of receipt. Ten complaints were not resolved within 60 days. During the reporting period, the percentage of complaint investigations completed within required time limits is 84%.

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

WDPI reported in the APR dated March 2005 that 60 of 61 complaint investigations received during the period July 1, 2003, to June 30, 2004, were completed within required time periods and that the one untimely decision was one day late. The percent of investigations not completed within time requirements for 2004-2005 is similar to what it had been for several years prior to the period covered in the March 2005 APR. Several factors may account for late decisions. In several cases materials requested from school districts by complaint investigators did not arrive in a timely manner. Several of the decisions which were issued late contain multiple and complex issues. The decisions in all but one of the late decisions were due after April 2005. Several of the staff who investigate complaints also were responsible for developing and providing information to districts and parents about the December 2004 revisions to IDEA and for developing forms for district use in meeting the new requirements. These tasks may have impacted unfavorably on their ability to resolve complaints within time limits.

FFY	Measurable and Rigorous Target
2005 (2005-2006)	100%
2006 (2006-2007)	100%

Wisconsin
State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	determines how to meet the 60-day timeline. The letter sent to the school district acknowledging the complaint specifies a date by which materials are needed from the district. WDPI ensures complaint staff follow the internal complaint procedures for receiving information from the district when materials have not been received in a timely manner. Electronic reminders for the due date are sent to complaint staff. Periodically and prior to the submission of each APR during the SPP period, WDPI reviews the timeliness of complaint decisions to ensure timely decisions. If a complaint decision is not timely, WDPI will analyze the reasons to determine appropriate corrective actions. A lead complaint coordinator oversees the progress of all complaints to ensure that timelines are followed and that reviews of such complaints are expedited. An additional tracking mechanism alerts staff that an open complaint investigation is approaching the one-year anniversary of a finding of noncompliance.									Lead Complaint Coordinator

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: Effective General Supervision Part B / General Supervision

Indicator 17: Percent of fully adjudicated due process hearing requests that were adjudicated within the 45-day timeline or a timeline that is properly extended by the hearing officer at the request of either party or in the case of an expedited hearing, within the required timelines.

(20 U.S.C. 1416(a)(3)(B))

Measurement:

Percent = [(3.2(a) + 3.2(b)) divided by 3.2] times 100.

Overview of Issue/Description of System or Process:

When a hearing is requested, the Wisconsin Department of Public Instruction (WDPI), by contract with the Department of Administration--Division of Hearings and Appeals (DHA), appoints an impartial hearing officer to conduct the hearing. Hearing officers are attorneys who receive initial, and at least annual, training from WDPI regarding special education requirements. Except in cases requiring an expedited hearing, the hearing officer must issue a written decision based solely upon the evidence presented at the hearing within 45 days following completion of the 30-day resolution period or the day after one of the following events: (1) both parties agree in writing to waive the resolution meeting; (2) after either the mediation or resolution meeting starts but before the end of the 30-day period, the parties agree in writing that no agreement is possible; (3) if both parties agree in writing to continue the mediation at the end of the 30-day resolution period, but later, the parent or public agency withdraws from the mediation process. The hearing officer may extend the 45-day timeline, for cause, if the parent or the school district requests an extension. The vast majority of hearing requests have been settled informally or by settlement agreements rather than by hearing officers' decisions. The hearing decision notifies the parties that, under state law, within 45 days after the administrative law judge's decision has been issued, either party may appeal the decision to the circuit court for the county in which the child resides or to federal district court.

Since 1996, WDPI has contracted with DHA to complete IDEA due process hearings. DHA maintains an electronic tracking system which monitors decision due dates. The system tracks extensions of the initial 45-day time limit and the dates when the hearing is to occur and the decision is due. This information is available to each hearing officer. WDPI has maintained an electronic log of critical information related to receipt of due process hearing requests for many years. The information includes elements such as the names of the parties, filing date, initial 45-day time limit, dates of extensions and date of the decision. During the year department staff also track hearing due dates. In preparing reports to OSEP, department staff confer with DHA staff prior to reporting the timeliness of completed due process hearings. For several years, including for each annual performance report (APR), WDPI has determined that all hearings were held within required time limits.

Baseline Data for FFY 2004 (2004-2005):

See attachment 1.

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

Discussion of Baseline Data:

All four fully adjudicated due process hearing requests resulted in decisions within the 45-day timeline or a timeline that was properly extended by the hearing officer at the request of either party.

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: Effective General Supervision Part B / General Supervision

Indicator 18: Percent of hearing requests that went to resolution sessions that were resolved through resolution session settlement agreements.
(20 U.S.C. 1416(a)(3(B))

Measurement:

Percent = (3.1(a) divided by 3.1) times 100.

Overview of Issue/Description of System or Process:

Prior to the opportunity for an impartial due process hearing, a local educational agency (LEA) must convene a meeting with the parents and the relevant member(s) of the IEP Team who have specific knowledge of the facts identified in the complaint within 15 days of receiving notice of the parents' complaint unless the parents and the LEA agree in writing to waive the meeting, or agree to use mediation. During the resolution session, the parents of the child discuss their complaint, and the facts that form the basis of the complaint, and the LEA is provided the opportunity to resolve the complaint.

Since 1996, WDPI has contracted with the Wisconsin Department of Administration--Division of Hearings and Appeals (DHA) to complete IDEA due process hearings. When a hearing is requested, WDPI, by contract with DHA, appoints an impartial hearing officer to conduct the hearing. Hearing officers are attorneys who receive initial, and at least annual, training from WDPI regarding special education requirements. When a hearing file is returned to WDPI by the Department of Administration--Division of Hearings and Appeals (DHA), WDPI staff reviews the file to locate information needed to accurately report indicator #18.

WDPI has collected in electronic log critical information related to due process hearing requests for many years. The information includes elements such as the names of the parties, filing date, initial 45-day time limit and date of the decision. WDPI has modified this log to capture the information required for this data element.

In October 2006, CIFMS stakeholders considered information on due process hearing resolution sessions to assist WDPI in setting measurable and rigorous targets. WDPI met with stakeholders and presented baseline data. Stakeholders entered into discussion regarding setting appropriate targets for Wisconsin.

Baseline Data for FFY 2005 (2005-2006):

During the baseline year (July 1, 2005, and June 30, 2006), Wisconsin had 31 hearing requests (see Table 7). Four were dismissed by a hearing officer, eight were resolved through mediation, five were decided following a full hearing and seven were resolved through resolution session agreement. The stakeholders agreed the department should consider seven of 14 (31 minus 4 minus 8 minus 5) requests led to resolution agreements, resulting in a baseline for this indicator of 50%.

Discussion of Baseline Data:

To assure valid and reliable data, when a hearing file is returned to WDPI by the Department of Administration--Division of Hearings and Appeals (DHA), which conducts the hearings, WDPI staff reviews the file to locate information needed to accurately report indicator #18. Discussions were held with administrators at the DHA regarding maintaining this information. WDPI staff has worked closely with DHA staff during the current school year to ensure that required data is available in the returned file. When additional information was required, WDPI staff contacted district staff and, as necessary, the parent to complete the log entry.

Stakeholders agreed that other than providing training to those involved in resolution sessions and developing awareness of the option, the department has very limited options for effecting change in the percent of hearing requests that went to resolution sessions that were resolved through resolution session settlement agreements. Further, factors outside the department's control will impact the outcome of resolution sessions. These factors include past history between the parties and the unique nature of each dispute. Keeping these considerations in mind, the stakeholders concluded targets should be set to reflect encouragement of the resolution session process. Stakeholders determined to set the annual targets at 1% increments per year with a 2010-11 school year goal of 55% of hearing requests that go to resolution sessions are resolved through resolution session settlement agreements.

FFY	Measurable and Rigorous Target
2005 (2005-2006)	50%
2006 (2006-2007)	51%
2007 (2007-2008)	52%
2008 (2008-2009)	53%
2009 (2009-2010)	54%
2010 (2010-2011)	55%
2011 (2011-2012)	56%
2012 (2012-2013)	57%

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: Effective General Supervision Part B / General Supervision

Indicator 19: Percent of mediations held that resulted in mediation agreements.

(20 U.S.C. 1416(a)(3)(B))

Measurement:

Percent = $[(2.1(a)(i) + 2.1(b)(i)) \text{ divided by } 2.1] \text{ times } 100.$

Overview of Issue/Description of System or Process:

The Wisconsin Department of Public Instruction (WDPI) provides mediation, as a dispute resolution option, through the Wisconsin Special Education Mediation System (WSEMS). WSEMS models district and parent collaboration. It is directed by a Special Education Director for a cooperative educational service agency (CESA), who provides a school district perspective, and a Co-Director of a Parent Training and Information Center, who provides a parent perspective. WSEMS maintains a list of mediators who are from a wide range of professional backgrounds. Each mediator is required to complete five days of training on special education mediation and annually to complete an additional day of training. The system also provides a facilitated individualized education program (IEP) meeting process. Mediation and the IEP meeting facilitation are provided at no cost to the parties. Participants are requested to complete a survey following the mediations. Survey data consistently indicates that participants are overwhelmingly satisfied with the mediation process.

Baseline Data for FFY 2004 (2004-2005):

For the 2004-2005 federal fiscal year, 88% of mediations held resulted in a mediation agreement. See attachment 1 for baseline data for the 2004-2005 year.

Data Source: WSEMS

Discussion of Baseline Data:

For the 2004-2005 year, there were 66 cases that went to mediation. Sixteen of the mediated cases related to due process. Of those 16 cases, 15 resulted in a mediation agreement. Fifty of the mediated cases were not related to due process. Of those 50 cases, 43 resulted in a mediation agreement. Thus, for the 2004-2005 federal fiscal year, 88% of mediations held resulted in mediation agreements. The percentage was calculated using the formula for measurement of indicator #19.

The targets for this indicator were unanimously decided by the continuous improvement and focused monitoring system (CIMFS) stakeholders. In setting the targets, the stakeholders were concerned that setting the target rates too high might result in coercive tactics which would undermine the voluntary nature of mediation. Stakeholders recognized that this voluntary or self-determination component is essential to a successful

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

mediation system. Furthermore, stakeholders relied on input from Eva Soeka, the Director of the Marquette University Center for Dispute Resolution Education. Professor Soeka, in a memorandum provided to stakeholders, states that “[h]igh target rates send a message to mediators that they are expected to ‘get a settlement’ if they are to be viewed favorably by the system’s administration. This type of implicit pressure violates the Model Standards of Mediators.” Stakeholders also relied on guidance from OSEP in the document titled “Part B State Performance Plan Questions and Answers,” which directed states to look at previous annual performance report (APR) attachments to set targets. Stakeholders reviewed targets in previous APR attachments and settlement rates for the previous five school years. For the 2002-2003 reporting period, the target was a settlement range which began at 65%. This was increased to 75% for the 2003-2004, and 2004-2005 reporting periods. The stakeholders began with the 75% target rate, and increased it to 80% over the six-year period.

FFY	Measurable and Rigorous Target
2005 (2005-2006)	At least 75% of mediations held will result in mediation agreements.
2006 (2006-2007)	At least 76% of mediations held will result in mediation agreements.
2007 (2007-2008)	At least 77% of mediations held will result in mediation agreements.
2008 (2008-2009)	At least 78% of mediations held will result in mediation agreements.
2009 (2009-2010)	At least 79% of mediations held will result in mediation agreements.
2010 (2010-2011)	At least 80% of mediations held will result in mediation agreements.
2011 (2011-2012)	At least 81% of mediations held will result in mediation agreements.
2012 (2012-2013)	At least 82% of mediations held will result in mediation agreements.

Overview of the State Performance Plan Development:

Refer to the overview section, pages 1-7.

Monitoring Priority: Effective General Supervision Part B / General Supervision

Indicator 20: State reported data (618 and State Performance Plan and Annual Performance Report) are timely and accurate.

(20 U.S.C. 1416(a)(3)(B))

Measurement:

State reported data, including 618 data and annual performance reports, are:

- a. Submitted on or before due dates (February 1 for child count, including race and ethnicity, placement; November 1 for exiting, discipline, personnel and dispute resolution; and February 1 for Annual Performance Reports and assessment); and
- b. Accurate, including covering the correct year and following the correct measurement.

States are required to use the "Indicator 20 Scoring Rubric" for reporting data for this indicator (see Attachment B).

Overview of Issue/Description of System or Process:

The Wisconsin Department of Public Instruction's (WDPI) data collection procedures have been revised to improve the accuracy of federal data reports and the timely submission of all reports. See the discussion of the baseline data and the improvement activities below for more information about the mechanisms implemented to ensure accuracy.

Baseline Data for FFY 2004 (2004-2005):

90% of State reported data (618 and State Performance Plan and Annual Performance Report) are timely and accurate. Baseline data from the required year (2004-05) was not available for indicators #1 and #2 when the SPP was submitted on December 1, 2005.

Measurements:

- A) Submission: During the 2004-05 baseline reporting period, all 618 data reports were submitted on or before the due dates. However, the necessary graduation and dropout data for the required baseline data year of 2004-05 was not available at the time of submission of the SPP. This was because WDPI was using two data collection reports, the Federal Student Data Report (child count) and Individual Student Enrollment System (ISES). The Federal Student Data Report was used to accurately and timely complete the 618 Data Table 4 – Exiting Special Education. ISES data was used to report baseline data for SPP indicators #1 and #2 because a comparison of all students was

required and the child count report only includes students with disabilities. With ISES being a new data collection system, WDPI allowed districts as much time as possible to submit the data which meant it was not available by December 1, 2005, to include in the SPP. ISES uses a unique student identification number for every student which will allow a cohort of children with and without disabilities to be tracked over time. This data will enable staff to gather reliable data on how children with disabilities perform or improve as compared to their nondisabled peers.

- B) Accuracy: During the 2004-05 baseline reporting period, WDPI's Federal Student Data Report was used to collect individual student records which form the basis of the Child Count, FAPE, and Exiting special education data reports submitted to OSEP. A new internet application was launched in 2002 to replace the diskette collection system. This application was designed to improve the accuracy and efficiency of the federal data collection.

Accuracy: Beginning in 2005-06 SY, WDPI's Individual Student Enrollment System (ISES) formed the basis of the Child Count, FAPE, and Exiting Special Education data reports submitted to OSEP. ISES collects individual student records for all students (students with and without disabilities) using a unique student identifier (number). This system is designed to improve the accuracy and efficiency of the federal data collection. This system allows students to be tracked over time and for like comparisons to be made for students with and without disabilities. ISES was first used for collecting the Exiting Special Education data during the 2005-06 SY and for the Child Count and FAPE data during the 2007-08 SY.

Environment Data Accuracy

In the 2003-04 SY, during the six-year onsite compliance monitoring cycle, WDPI identified LEA confusion regarding the meaning of two data concepts: 1) the amount of time a child with a disability is removed from the regular classroom and 2) the amount of special education a child receives according to his or her individualized education program (IEP). As a result of this confusion, WDPI required all districts with identified errors to submit a corrective action plan and correct all noncompliance. During the 2004-2005 school year, WDPI concluded its verification activities, having verified correction of all previously identified noncompliance including requirements related to amount of removal.

WDPI created an internal workgroup to train the field on how to ensure the accuracy of placement/ environment data. Each year, WDPI staff offer training on federal data collection at inservice meetings sponsored by software vendors. Hundreds of LEA staff from across the state attend the trainings. Additionally, WDPI staff review and update directions and software for the Federal Student Data Report and post it to the special education team website.

New Data Collection – ISES

Beginning with the 2006-07 SY, in an effort to collect data for Indicators #1 and #2, eliminate duplication of effort and ease the data collection burden on LEAs, the Department began the process of eliminating its separate special education child count software and began collecting common data used by the state through the Wisconsin Student Locator System (WSLS) and Individual Student Enrollment System (ISES) data collections. ISES includes the assignment of a number to each student name to act as a unique student identifier. This number follows a student throughout the student's enrollment in the public education system, including when a student transfers to another district. This allows for more accurate reporting of exit data.

Previously, the Special Education Team collected the child count of students with disabilities separately, but this did not allow the State to accurately compare the graduation and dropout rates of students with disabilities with all students. Beginning with the 2007-08 SY, all required data for Tables 1, 3, 4, and 5 are now collected through WSLS and ISES, and the Special Education Team no longer supports a separate data

Part B State Performance Plan (SPP) for 2005-2010

Wisconsin
State

collection system. WDPI established a cross-team workgroup consisting of members of the Special Education Team and the Applications Development Team to manage issues of timely and accurate data.

Discussion of Baseline Data:

WDPI has met all deadlines for submitting 618 data reports for many years and will continue to do so. The implementation of ISES as described above, as well as the ongoing improvement activities described below, will ensure the data submitted with the SPP and APR are timely and accurate.

20 A B C	Academy for New Special Education Leadership An academy for personnel new to special education leadership positions was developed. The purpose of this professional development opportunity is to increase the knowledge, skills, and dispositions of new directors of special education regarding current special education issues, including the SPP Indicators.				X	X	X	X	X	WDPI Special Education Team
20 A B C D G	Cross-Department Data Workgroup Beginning with the 2007-08 SY, all required data for Tables 1, 3, 4, and 5 are now collected through the Wisconsin Student Locator System (WSLS) and Individual Student Enrollment System (ISES). This has helped to ensure timely and accurate data collections from all local education agencies across the state. However, because this data collection is done outside of the Special Education Team, it was important to establish cross-department procedures for data verification and accuracy. During the 2007-08 SY, WDPI established a cross-department data workgroup consisting of members of the WDPI Special Education Team as well as the WDPI Data Management and Reporting Team. The purpose of this workgroup is to examine incoming LEA data and help identify possible reporting errors and then assist districts with the correction. Based upon the data collected, this workgroup will also develop training materials to assist LEAs with the reporting of accurate and timely data.					X	X	X	X	
20 A C D	Data Collection – ISES and Child Count In its February 9, 2007, verification letter, OSEP found that the State was not in compliance with the requirements of 34 CFR 300.641(a), which requires that, for purposes of the annual report required by section 618 of the Act and 34 CFR 300.640, the State must count and report the number of children with disabilities receiving special education and related services on any date between October 1 and December 1 of each year. OSEP's letter required the State to submit, within 60 days, its plan for correcting this noncompliance, and ensuring that the		X							Team Director Assistant Director Data Coordinator Data Consultant

State

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	State's next submission of child count data under section 618 meets the requirements in 34 CFR 300.641(a) for a count date between October 1 and December 1. On April 4, 2007, the State submitted its plan for ensuring compliance with that requirement. OSEP accepted the State's plan.									
20 A C D	To achieve compliance with 34CFR 300.641(a), the State required LEAs to conduct a child count of children with disabilities on October 1 of each year, beginning with the 2007-08 school year. Each LEA compared their 3 rd Friday of September enrollment statement with their October 1 child count of students with disabilities. If the child count of students with disabilities has changed, the LEA submitted such changes to the state. In addition, all LEAs certified the data are accurate and the number of students reported as eligible represents an unduplicated count of students with disabilities receiving special education and related services who meet eligibility criteria for the IDEA child count. Thus, for the purpose of the annual report required by section 618 and 300.641(a), the State will count and report the number of children with disabilities receiving special education and related services on October 1 of each year. 20 A, C, D	Data Collection and Reporting: Program Participation System (Indicator 12) Activities surrounding the Program Participation System (PPS), the new data collection system for indicator 12, have previously been reported under Indicator #12 in the APR and SPP. With the implementation of this new system, the timeliness and accuracy of the data will be enhanced as it will allow for child-specific reporting, rather than aggregate student counts. Due to this outcome, WDPI felt it was important to include this information under indicator #20 as well. Through their General Supervision Enhancement Grant (GSEG), WDHS and WDPI continued their collaborative work to build and launch a coordinated web-based data collection system to allow for electronic referrals from Part C to B and to ensure a timely, smooth, and effective transition. This new cross-department system will also serve as the data collection mechanism for Indicator B12/C8. 20 A H	Data Management Steering Committee A Special Education Assistant Director is a member of the department-wide data management steering committee which is developing guiding principles for data collection and reporting. The committee is monitoring the development of a comprehensive longitudinal data system to increase the WDPI's data system capacity, including the ability to generate and use accurate and timely data and engage in data-driven decision-making to improve student achievement. The Special Education Data Coordinator and Special Education Data Consultant are members of several of the Data Management subcommittees. The Special Education Applications Development Staff is dedicated to developing applications to collect special education data and works collaboratively with the subcommittees. 20	Data Verification Workgroup WDPI created a Data Verification Workgroup that continues to examine educational environment data and trends over the prior three years. The Data Verification workgroup developed a data verification protocol for school-age environment data with the assistance of the National Center on Special Education Accountability and Monitoring (NCSEAM) staff, and piloted it in local education agencies. As a result of these onsite, WDPI will continue to develop training materials for statewide dissemination to assist districts in accurately reporting student placement data. A policies and procedures manual has been developed that includes criteria for selection of districts for onsite monitoring. Districts will be selected according to the highest and lowest percentages of students on the three sub-indicators.	X	X	X						Data verification workgroup

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY 2011	FFY 2012	Resources & Responsibility
	<p>In November 2004, the workgroup produced a statewide Wisline (online) training to ensure local district personnel's understanding of the early childhood and school-age environment codes. The training stressed the importance of data accuracy and provided participants with working examples. A PowerPoint presentation of the training was subsequently posted on the WDPI's website to serve as a resource for all school districts. See http://dpi.wi.gov/sped/cc_data.html. WDPI has updated this statewide training to reflect the environment code changes as outlined in IDEA 2004. The PowerPoint presentation is posted on WDPI's website.</p> <p>The workgroup expanded its verification efforts to include the LEA's data management systems. First, it modified and adapted the Appendix B Verification questions from OSEP's continuous improvement and focused monitoring system (CIFMS) accountability manual to use at a local agency level. As a result of piloting this tool in local educational agencies, WDPI made further modifications to provide a more concise means of understanding the LEA's data management systems. The process also provides the LEA a natural starting point to develop an improvement plan for their data.</p>									
20 A B C D E G	<p>Focused Performance Review</p> <p>During the 2003-2004 SY, WDPI in collaboration with CESAs #7 and #5 developed the Special Education Data Retreat Model to provide a unique, structured forum where collaborative teams of special educators, administrators, along with regular educators evaluated their systems for design and delivery of special education and related services. Focused data analysis enabled educators to develop internal accountability leading toward the development of school/district plans to address identified needs and improve student outcomes. Some of the data analyzed includes graduation, dropout, suspension, expulsion, participation and performance on statewide assessments, and educational environments. Data is disaggregated by disability area, gender, and race/ethnicity whenever it is available. During the 2004-2005 SY, statewide training was provided to give all Wisconsin school districts the opportunity to analyze their own data by a collaborative staff team, to identify areas of need based on the data analysis, and to work towards a plan</p>	X	X	X	X					<p>Graduation and Reading FM workgroups</p> <p>Data Consultant</p> <p>CESA #5 staff</p>

Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY2011	FFY2012	Resources & Responsibility
	<p>to address those needs building/district wide. To accomplish this statewide training, a "Train the Trainers" model was used. A two-day facilitated training was conducted for all RSN directors and school improvement service (SIS) directors in the state. A model set of data was used for training purposes. After the RSN and SIS directors were trained, each CESA conducted trainings for its own school districts. Two follow-up meetings were conducted to provide support and technical assistance to those responsible for conducting special education data retreats. Beginning with the 2005-2006 SY, this data analysis component was integrated into Wisconsin's Focused Monitoring (FM) process as a beginning point for districts selected for focused monitoring and renamed the Focus Performance Review.</p> <p>For the 2006-2007 SY, the Focused Performance Review continues to be an integral piece of Wisconsin's Focused Monitoring process. Further refinements to the data analysis and improvement plan writing processes were made. Data continues to be disaggregated by disability area, and race/ethnicity whenever available. Findings identified during the Focused Monitoring visits are integrated into the district-wide improvement plans to directly address those needs.</p>									
20 A C D	<p>Indicator #12</p> <p>To ensure valid and reliable data are collected for Indicator #12, WDPI developed an electronic data collection system as part of the Local Performance Plan (LPP) for the purpose of collecting data for this indicator. Beginning with the 2005-06 school year, all districts are required to submit this data annually via their LPP for all children referred from Part C. The following data elements are collected through this electronic system:</p> <ul style="list-style-type: none"> • The number of referrals received from Part C to Part B between July, 1, 2005, and June 30, 2006. • The number of students whose eligibility was not determined and the reasons for the determination not being made. • The number of students found to be not eligible by their third birthday. • The number of students found to be not eligible after their third birthday, the range of days beyond their third birthday, and the reasons for the delays. 20 A, B, C, D, E, G	School Improvement: Focused Review of Improvement Indicators (FRII) During the 2007-08 SY, WDPI began working to expand upon the successful focused monitoring model previously utilized to provide districts a mechanism for conducting a similar process of data analysis and improvement planning around the SPP improvement indicators of math achievement, preschool outcomes, parent involvement, and post-high school outcomes. WDPI will also be working with CESA based Regional Service Network (RSN) providers to employ various technical assistance options, including statewide summits. Category	Improvement Activity Description	FFY 2005	FFY 2006	FFY 2007	FFY 2008	FFY 2009	FFY 2010	FFY 2011	FFY 2012	Resources & Responsibility
	WDPI is currently building the infrastructure to execute and support this process with statewide implementation. WDPI believes this refined school improvement process will not only address the needs of both urban and rural districts, but it will continue to promote data driven decision making as well as identifying promising practices that can be acknowledged and disseminated statewide.									
20	<p>The Special Education Web Portal / Local Performance Plan (LPP), https://dpi.wi.gov/sped/educators/local-performance-plans For each school year, all Wisconsin LEAs, including charter schools, complete and submit an annual LPP to the WDPI for review. The LPP is an internet application and is the IDEA flow-through and preschool funding mechanism that must be completed in approvable form before a district may encumber and expend federal monies. Through the LPP, districts submit their IDEA flow-through and preschool budgets and provide assurance to WDPI of compliance with state and federal special education requirements. Districts will be required to analyze their performance on specific indicators in the State Performance Plan and develop and submit improvement activities for those indicators for which a district does not meet the established targets through the Special Education Web Portal. The improvement plan is reviewed by a WDPI consultant assigned to work with the individual LEA.</p> <p>One component of the Special Education Web Portal is the Special Education District Profile, through which WDPI reports annually to the public on the performance of each LEA on the targets associated with Indicators #1-#14. The Special Education District Profile is used to analyze LEA performance on each of the indicators in the State Performance Plan (https://www2.dpi.state.wi.us/DistrictProfile/Pages/DistrictProfile.aspx). The Special Education District Profile includes LEA data, State data, the target for each indicator, data sources for each indicator, and a link for more information about each indicator.</p>	X	X	X	X	X	X	X	X	LPP Consultants Data Coordinator Data Consultant WDPI Applications Development Team
